

All Night Urgent Care for Children

Parents are left with an uneasy feeling when their child is sick and their primary physician's office is closed. Good Night Pediatrics gives parents an innovative alternative.

"It is so helpful to be able to go somewhere that's all children, has pediatricians on staff, a kids' movie to watch in the waiting room, and can get us in and out usually in two hours or less," said the mother of a past patient.

Good Night Pediatrics is an all night urgent care for children. Every patient is seen by a Pediatrician. The physicians treat patients aging from newborns to 18 year olds. All facilities

are open every night of the year from 5 p.m. to 5 a.m. and have x-rays and labs onsite. The clinics accept all AHCCCS plans and major insurance carriers, as well as offer cash discounts.

Good Night Pediatrics follows a passion statement with each of its visitors: no child should have to go to the emergency room, unless it is an emergency.

"It is a very simple philosophy, but one that we abide by. The kids, a lot of times, end up in the ER at night simply because of a lack of alternatives," said Larry Blumenthal, CFO.

The pediatricians at GNP treat children

with asthma, fevers, sore throats, ear aches and other medical occurrences that are not severe enough for a hospital visit.

"We have a tremendous amount of positive feedback from patients and a significant amount of our patient volume is driven by positive word of mouth," said Blumenthal.

Since the first clinic opened in November of 2004, Good Night Pediatrics has served more than 400,000 patients. After eight years of service, there are five facilities in the Phoenix metro area and one in Las Vegas.

Good Night Pediatrics is always looking to expand their facilities to better serve the community. Blumenthal states that the company is hoping to open more facilities in the fall of 2014.
