IN THE 12TH JUDICIAL CIRCUIT COURT, WARREN COUNTY, MISSOURI

Judge or Division:
PROBATE

Case Number: 16BB-PR00046

In the Estate of:

DONALD LEE MCNEW, Deceased.

AMENDED NOTICE OF LETTERS TESTAMENTARY GRANTED
(Independent Administration)

To All Persons Interested in the Estate of DONALD LEE MCNEW, Decedent:

On JUNE 10, 2016, the last will of the decedent having been admitted to probate, the following individual was appointed the personal representative of the estate of DONALD LEE MCNEW, decedent, by the Probate Division of the Circuit Court of Warren County, Missouri. The personal representative may administer the estate independently without adjudication, order, or direction of the Probate Division of the Circuit Court, unless a petition for supervised administration is made to and granted by the court. The name and address of the personal representative is:

DONNA JEAN HOWARD, P.O. BOX 92, WARRENTON, MO 63383

The personal representative's attorney's name, business address and phone number is:

MELISSA Q. LEAVY, 7409 MANCHESTER ROAD, ST. LOUIS, MO 63143, (314) 932-5573

All creditors of said decedent are notified to file claims in court within six months from the date of the first publication of this notice or if a copy of this notice was mailed to, or served upon, such creditor by the personal representative, then within two months from the date it was mailed or served, whichever is later, or be forever barred to the fullest extent permissible by law. Such six-month period and such two-month period do not extend the limitation period that would bar claims one year after the decedent's death, as provided in Section 473.444, RSMo, or any other applicable limitation periods. Nothing in Section 473.033, RSMo, shall be construed to bar any action against a decedent's liability insurance carrier through a defendant ad litem pursuant to Section 537.021, RSMo.

Date of the decedent's death: DECEMBER 2, 2015

Date of first publication: JUNE 23, 2016

Sheryl Schimweg, Clerk

Publish in the Warren County Record June 23, 30, July 7 and 14, 2016.

IN THE CIRCUIT COURT OF WARREN COUNTY, MISSOURI PROBATE DIVISION

In the Estate of:

RICHARD CARL DAVIS

Estate No. 15BB-PR00129

NOTICE OF FILING OF FINAL SETTLEMENT AND PETITION FOR DISTRIBUTION

TO ALL PERSONS INTERESTED IN THE ESTATE OF RICHARD CARL DAVIS, Deceased:

You are hereby notified that the undersigned Personal representative will file a Final Settlement and Petition for determination of the persons who are the successors in interest to the personal and real property of the decedent and of the extent and character of their interest therein and for distribution of such property, in the Probate Division of the Circuit Court of Warren County, Missouri, on or about August 1, 2016, or as may be continued by the Court, and that any objections or exceptions to such Final Settlement or Petition or any item thereof must be in writing and filed within twenty (20) days after the filing of such Final Settlement.

Bid specifications can be found on the district's website at www.wrightcity.k12.mo.us under Departments – Business – RFPs or by calling (636) 745-7201.

Bids must be submitted on the District's forms, sealed, marked **“BREAD BID”** and submitted to:

Lynn Gmeiner, Director of Food Service
Wright City R-II School District
90 Bell Road, Wright City, MO 63390

All bids must be received by 4:00 p.m., Monday, July 11, 2016.

The Wright City Board of Education reserves the right to accept or reject any/or all bids. This institution is an equal opportunity provider.

Publish in the Warren County Record June 30, 2016.

Water Quality Report

Optional Monitoring (not required by EPA) Optional Contaminants

Monitoring is not required for optional contaminants.

Table with columns: Secondary Contaminants, Collection Date, Your Water System Highest Sampled Result, Range of Sampled Result(s) (low - high), Unit, SMCL. Lists various contaminants like ALKALINITY, CALCIUM, CHLORIDE, etc.

Secondary standards are non-enforceable guidelines for contaminants that may cause cosmetic effects (such as skin or tooth discoloration) or aesthetic effects (such as taste, odor or color) in drinking water.

Publish in the Warren County Record June 30, 2016.

NOTICE OF APPOINTMENT OF GUARDIANSHIP/ CONSERVATORSHIP

RICHARD L. SCHEIBE, JUDGE

STATE OF MISSOURI)
) ss
COUNTY OF WARREN)

IN THE CIRCUIT COURT, PROBATE DIVISION, WARREN COUNTY, MISSOURI

IN THE ESTATE OF:

DAVID ALLEN REYNOLDS, Incapacitated/Disabled

ESTATE NO.: 16BB-PR00025

TO ALL PERSONS INTERESTED IN THE ESTATE OF DAVID ALLEN REYNOLDS AN INCAPACITATED AND DISABLED PERSON

On the 1st day of JUNE, 2016, REGINALD J. REYNOLDS and THERESA ANN REYNOLDS were appointed Co-Guardians/Conservators of DAVID ALLEN REYNOLDS, a person adjudged incapacitated/disabled under the laws of the State of Missouri...

20225 PRAIRIE EDGE LANE, WARRENTON, MO 63383

The business address and phone number of the attorney for the Co-Guardians/Conservators is:

LORNA L. FRAHM, 5770 MEXICO RD, STE A, ST. PETERS, MO 63376, 636/229-4070

All creditors of said disabled person are notified to file their claims in the Probate Division of the Circuit Court of Warren County, Missouri, within six months from the date of first publication of this Notice, or be forever barred.

Date of first publication: JUNE 9, 2016

Sheryl Schimweg, Probate Clerk

Publish in the Warren County Record June 9, 16, 23 and 30, 2016.

BREAKING NEWS... warren county record.com. Includes a Facebook icon.

MISSOURI STATE TREASURER CLINT ZWEIFEL. www.ShowMeMoney.com. Unclaimed Property. Notice of Names of Persons Appearing to be Owners of Abandoned Property. Includes photo of Clint Zweifel.

Large table listing unclaimed property with columns: Name, Address, City. Lists numerous individuals and their associated addresses across various Missouri cities.

Continuation of the unclaimed property table from the previous block, listing names and addresses.

Water Quality Report

MONTGOMERY CO PWS D 1 2015 Annual Water Quality Report (Consumer Confidence Report)

This report is intended to provide you with important information about your drinking water and the efforts made to provide safe drinking water.

Atencion!

Este informe contiene información muy importante. Tradúscalo o preguntele a alguien que lo entienda bien. [Translated: This report contains very important information. Translate or ask someone who understands this very well.]

What is the source of my water?

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and groundwater wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Our water comes from the following source(s):

Source Name	GROUND WATER
WELL #5 and 6	GROUND WATER
LAKEVIEW	GROUND WATER
OAK GROVE	GROUND WATER
OWL CREEK	GROUND WATER

Source Water Assessment:

The Department of Natural Resources conducted a source water assessment to determine the susceptibility of our water source to potential contaminants. This process involved the establishment of source water area delineations for each well or surface water intake and then a contaminant inventory was performed within those delineated areas to assess potential threats to each source. Assessment maps and summary information sheets are available on the Internet at <http://maproom.missouri.edu/swipmaps/pwssid.htm>. To access the maps for your water system you will need the State-assigned identification code, which is printed at the top of this report. The Source Water Inventory Project maps and information sheets provide a foundation upon which a more comprehensive source water protection plan can be developed.

Why are there contaminants in my water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Contaminants that may be present in source water include:

- A. **Microbial contaminants**, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- B. **Inorganic contaminants**, such as salts and metals, which can be naturally occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.
- C. **Pesticides and herbicides**, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- D. **Organic chemical contaminants**, including synthetic and volatile organic chemicals, which are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.
- E. **Radioactive contaminants**, which can be naturally occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, the Department of Natural Resources prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Department of Health regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Is our water system meeting other rules that govern our operations?

The Missouri Department of Natural Resources regulates our water system and requires us to test our water on a regular basis to ensure its safety. Our system has been assigned the identification number MO6024406 for the purposes of tracking our test results. Last year, we tested for a variety of contaminants. The detectable results of these tests are on the following pages of this report. Any violations of state requirements or standards will be further explained later in this report.

How might I become actively involved?

If you would like to observe the decision-making process that affects drinking water quality or if you have any further questions about your drinking water report, please call us at **636-456-8227** to inquire about scheduled meetings or contact persons.

Do I need to take any special precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Terms and Abbreviations

Population: 4,500. This is the equivalent residential population served including non-bill paying customers.
MCLG: Maximum Contaminant Level Goal, or the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
MCL: Maximum Contaminant Level, or the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
SMCL: Secondary Maximum Contaminant Level, or the secondary standards that are non-enforceable guidelines for contaminants and may cause cosmetic effects (such as skin or tooth discoloration) or aesthetic effects (such as taste, odor or color) in drinking water. EPA recommends these standards but does not require water systems to comply.
AL: Action Level, or the concentration of a contaminant which, when exceeded, triggers treatment or other requirements which a water system must follow.
TT: Treatment Technique, or a required process intended to reduce the level of a contaminant in drinking water.
90th percentile: For lead and copper testing. 10% of test results are above this level and 90% are below this level.
Range of Results: Shows the lowest and highest levels found during a testing period, if only one sample was taken, then this number equals the Level Found.
RAA: Running Annual Average, or the average of sample analytical results for samples taken during the previous four calendar quarters.
LRAA: Locational Running Annual Average, or the locational average of sample analytical results for samples taken during the previous four calendar quarters.
TTHM: Total Trihalomethanes (chloroform, bromodichloromethane, dibromochloromethane, and bromoform) as a group.
HAA5: Halocetic Acids (mono-, di- and tri-chloroacetic acid, and mono- and di-bromoacetic acid) as a group.
ppb: parts per billion or micrograms per liter.
ppm: parts per million or milligrams per liter.
n/a: not applicable.
NTU: Nephelometric Turbidity Unit, used to measure cloudiness in drinking water.
nd: not detectable at testing limits.

Contaminants Report

MONTGOMERY COUNTY PWS D 1 will provide a printed copy of the CCR upon request. To request a copy of this report to be mailed, please call us at 636-456-8227. The CCR can also be found on the Internet at www.dnr.mo.gov/ccr/MO6010874.pdf.

The state has reduced monitoring requirements for certain contaminants to less often than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year. Records with a sample year more than one year old are still considered representative.

Regulated Contaminants

Regulated Contaminants	Collection Date	Highest Test Result	Range of Sampled Result(s) (low - high)	Unit	MCL	MCLG	Typical Source
BARIUM	9/11/2014	0.0728	0.0716 - 0.0728	ppm	2	2	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
CHROMIUM	9/11/2014	2.92	0 - 2.92	ppb	100	100	Discharge from steel and pulp mills
CYANIDE	9/8/2011	3.7	3.7	ppb	200	200	Discharge from steel/metal factories; Discharge from plastic and fertilizer factories
FLUORIDE	9/11/2014	1.26	1.26	ppm	4	4	Natural deposits; Water additive which promotes strong teeth
NITRATE-NITRITE	10/5/2015	0.095	0.088 - 0.095	ppm	10	10	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits

Disinfection Byproducts	Sample Point	Monitoring Period	Highest LRAA	Range of Sampled Result(s) (low - high)	Unit	MCL	MCLG	Typical Source
(HAA5)	DBPDUAL-01	2015	0	0 - 0	ppb	60	0	Byproduct of drinking water disinfection
TTHM	DBPDUAL-01	2015	0	0 - 0	ppb	80	0	Byproduct of drinking water disinfection

Lead and Copper	Date	90th Percentile: 90% of your water utility levels were less than	Range of Sampled Results (low - high)	Unit	AL	Sites Over AL	Typical Source
COPPER	2012 - 2014	0.0247	0.00418 - 0.0815	ppm	1.3	0	Corrosion of household plumbing systems
LEAD	2012 - 2014	1.09	1.09 - 1.33	ppb	15	0	Corrosion of household plumbing systems

Radionuclides	Collection Date	Highest Value	Range of Sampled Result(s)	Unit	MCL	MCLG	Typical Source
COMBINED RADIUM (-226 & -228)	7/10/2013	1.6	1.2 - 1.6	pCi/l	5	5	Erosion of natural deposits
GROSS ALPHA PARTICLE ACTIVITY	1/14/2013	7.6	5.7 - 7.6	pCi/l	15	0	Erosion of natural deposits
GROSS ALPHA, EXCL. RADON & URANIUM	1/14/2013	7.8	5.7 - 7.8	pCi/l	15	0	Erosion of natural deposits
RADIUM-226	7/10/2013	1.6	1.2 - 1.6	pCi/l	5	0	Erosion of natural deposits

Microbiological	Result	MCL	MCLG	Typical Source
No Detected Results were Found in the Calendar Year of 2015				

Violations and Health Effects Information

Compliance Period	Analyte	Type
03/01/2015 - 03/31/2015	COLIFORM (TCR)	MONITORING (TCR), ROUTINE MINOR

Additional Required Health Effects Language: Certain minerals are radioactive and may emit a form of radiation known as alpha radiation. Some people who drink water containing alpha emitters in excess of the MCL over many years may have an increased risk of getting cancer.

Special Lead and Copper Notice:

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. MONTGOMERY CO PWS D 1 is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline (800-426-4791) or at <http://water.epa.gov/drink/info/lead/index.cfm>.

You can also find sample results for all contaminants from both past and present compliance monitoring online at the Missouri DNR Drinking Water Watch website <http://dnr.mo.gov/DWW/indexSearchDNR.jsp>. To find Lead and Copper results for your system, type your water system name in the box titled Water System Name and select *Find Water Systems* at the bottom of the page. The new screen will show you the water system name and number, select and click the Water System Number. At the top of the next page, under the *Help* column, find *Other Chemical Results by Analyte*, select and click on it. Scroll down alphabetically to *Lead* and click the blue Analyte Code (1030). The Lead and Copper locations will be displayed under the heading *Sample Comments*. Scroll to find your location and click on the *Sample No.* for the results. If your house was selected by the water system and you assisted in taking a Lead and Copper sample from your home but cannot find your location in the list, please contact MONTGOMERY COUNTY for your results.

Publish in the Warren County Record June 30, 2016.

This report is intended to provide you with important information about your drinking water and the efforts made to provide safe drinking water.
