MEET MADDY

The Princess Warrior

When Maddy King's preschool teacher shared concerns about her extreme developmental delays, her mother, Laura, took Maddy to the pediatrician for answers. She asked if the development issues could be related to neurofibromatosis, a condition Maddy was diagnosed with at two weeks old. Characterized by light brown spots on the skin, the condition also can indicate a risk of tumor formation, especially in the brain. After testing, her parents absorbed the shocking news — at just four years old, Maddy had cancer.

Since that difficult day more than a year ago, Maddy has bravely battled her fear of hospitals during regular visits to Niswonger Children's Hospital for treatments. The staff, experienced at interacting with children in a medical environment, has helped Maddy and her family, including big brother Isaac, navigate this life-changing journey with hope that can only be found in a place like Niswonger Children's Hospital — a place just for kids and their families.
