THE ENVIRONMENT

New abandoned mine land projects in Mahaska County

FAIRFIELD — Pathfinders Resource Conservation and Development, in partnership with the Mahaska Soil and Water Conservation District, received three Watershed Cooperative Agreement grants from the U.S. Department of Interior's Office of Surface Mining.

Two \$100,000 grants were awarded to help fund reclamation of the "Meyer" and "Mummelaar" Abandoned Mine Land sites in Mahaska County. Another \$200,000 grant was awarded to help fund the "Logan" AML reclamation. Other project partners in the Iowa Department of Agriculture and Land Stewardship

Division of Soil Conservation and Mahaska County Secondary Roads.

Surface coal mines that ceased operations before 1977 were not required to be "reclaimed" by the operator once the mining stopped. This means an area strip-mined for coal was often left with large piles of the overburden that was stripped away so coal could be extracted. These are areas referred to as "unreclaimed" or "abandoned mine land."

Iowa has more than 230 unreclaimed mine sites affecting 12-13,000 acres. The Meyer site is 16.6 acres and located just west of the city of Oskaloosa. The Mummelaar site is 11

acres and located south and east of the city of Leighton. Acid mine drainage from both sites negatively affects Muchakinock Creek. The Logan site is 98 acres and, to date, is the largest reclamation project to be taken on as a single reclamation project in Iowa. The Logan project is located 5 miles northeast of Eddyville and will mitigate acid mine drainage affecting Turkey Run and Bluff Creek.

Unreclaimed mine lands present several environmental and aesthetic problems. These include exposed remnant coal leading to acid mine drainage and acid mine drainage lowering the pH in receiving waterbodies

which negatively affects aquatic life and reduces biodiversity. In addition, acidic soils do not support the growth of vegetation so landscapes look barren and the soil continues to runoff without vegetation to hold it in place. Lastly, dangerous "highwalls" and large, steep spoil piles from mining activity can be hazardous to people and animals traversing the site.

"Reclamation plays an integral role in meeting our goals of watershed protection and water quality improvement," states Mahaska SWCD Chairman Robert Oldham. "The Muchakinock Creek Watershed has been a priority watershed for the SWCD since the late 1990s and we're pleased to

have two more reclamation projects supporting our other conservation efforts in the watershed."

While reclamation provides important environmental benefits, it's also expensive. The \$300,000 in grant dollars are being leveraged with another \$2.64 million to complete these three reclamation projects. "Reclamation continues to be a pricey endeavor," says Pathfinders RC&D Executive Director Detra Dettmann. "With reclamation costing \$15,000 - \$20,000 per acre, every grant dollar secured helps complete more of this important work in Iowa."

To date, Pathfinders RC&D has partnered on

more than 30 AML projects in six counties, receiving over \$3 million in grant dollars from the Office of Surface Mining. "This is some of the most rewarding our nonprofit has been involved in," states Dettmann. "The changes before and after are very dramatic."

Pathfinders RC&D is a nonprofit organization that assists local communities with initiatives related to natural resource conservation and rural economic development. Pathfinders RC&D has served southeast Iowa since 1978.

To learn more, contact Pathfinders RC&D by calling 641-472-6177 or visit www.PathfindersRCD.org.

ARTIFACT

Do you know what this is?

By **DUANE NOLLEN**
The Oskaloosa Herald

OSKALOOSA — This past week's artifact from the Nelson Pioneer Farm is an Edison Phonograph.

Several readers made guesses as to the identity of the artifact.

Dorothy Vos wrote via email: "The artifact in the shopper is an Edison home cylinder phonograph player. It was invented around 1875 during the time Edison was developing the telephone and telegraph. The small round cylinders had the recorded music stored on them. There are many types of these cylinder players."

Henrietta Veldhuizen also wrote via email: "I think the mystery artifact in the Herald of April 16 is an Edison Phonograph with cylinder and horn."

Myrna Piersel wrote via email: "That is an old Edison Phonograph from around 1900. The cylinder records were interesting and worked well. I used to have a big collection of the records and an old player but don't know what happened to it. I could spend a lot of hours with it as a kid."

Nelson Pioneer Farm Curator Kelly Halbert did some research on the

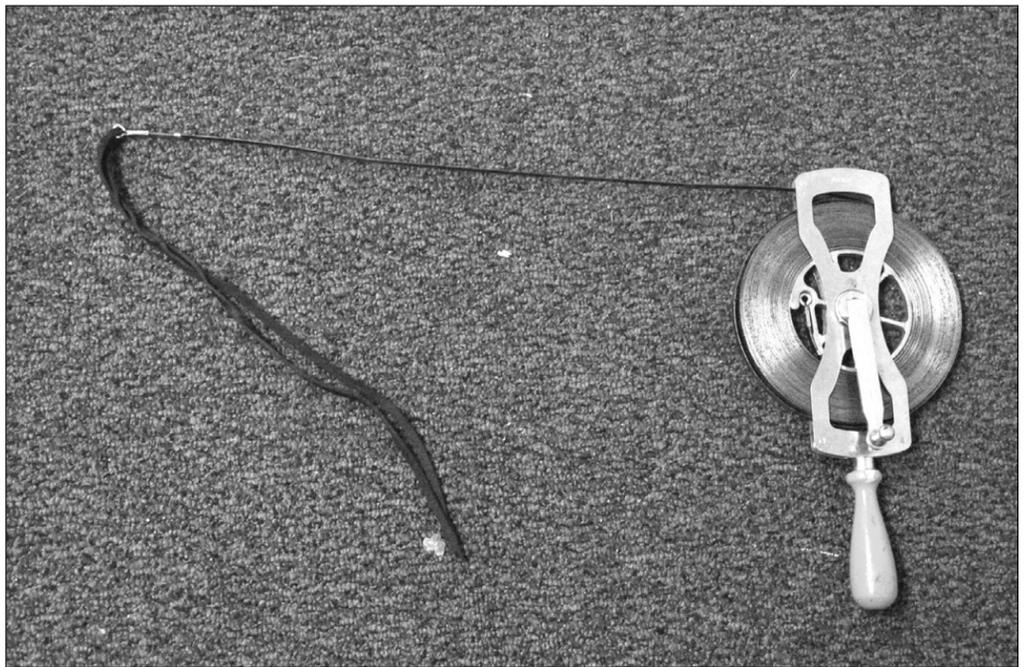

artifact. She wrote: "Edison Phonograph"

What do telephones, cement, telegraphs, phonographs, movie cameras, ore separators, and light bulbs have in common? Thomas A. Edison! The inventor had something to do with each of these products as well as over 1000 others.

This week's artifact, The Edison Phonograph and record player, was a popular and affordable source of music and entertainment in 1900. Invented in 1877, the first recording was of himself reciting Mary Had a Little Lamb.

The phonograph was a device developed for the mechanical recording and reproduction of sound. Using tin foil cylinders as a medium, Edison used one needle for recording and another needle for playing the impressions of sound.

"The sound vibrations or waveforms are recorded as corresponding physical deviations of a groove engraved or impressed into the surface of a rotating cylinder or disc. To recreate the sound, the surface is similarly rotated while a playback stylus traces the groove and is therefore vibrated by it, very faintly reproducing the

recorded sound. In early acoustic phonographs, the stylus vibrated a diaphragm which produced sound waves which were coupled to the open air through a flaring horn."

Many inventors has worked to record sounds, but Edison was the first to create a way to play back the recordings. The tinfoil cylinders evolved into hard rubber cylinders that were mass marketed by 1900.

Eventually phonograph became gramophone, cylinders became discs, and recording by vibration evolved into recording electronic impulses.

It has been said that this invention was his favorite."

The Oskaloosa Herald and the Nelson Pioneer Farm are teaming up to test your knowledge of historical artifacts.

The Nelson Pioneer Farm has about 15,000 artifacts in its collection

spanning in age from the 1840s to the present.

The Herald will take a picture of an artifact and publish it in the Herald section of the Oskaloosa Shopper, The Oskaloosa Herald on the Herald's Web site, www.oskaloosa.com. People can make a guess on what they think the object could be.

People can either email their guess to oskynews@oskyherald.com or mail their guess to

The Oskaloosa Herald, P.O. Box 530, Oskaloosa, IA 52577. You can vote from Wednesday through Saturday.

The identity of the artifact and the vote breakdown will be announced in each Wednesday's Herald Shopper along with the week's new artifact.

Herald Editor Duane Nollen can be reached by email at oskynews@oskyherald.com

You can get more news and sports just like this delivered in your mail all week long.

Sash making kids happy

Photos provided

Former Oskaloosa High School standout and New York Giant safety Tyler Sash spent part of last Wednesday at the Oskaloosa Elementary celebrating Samba and Jamar Cisse's birthdays. Sash, who played on the Giants' Super Bowl championship team his rookie season, had pictures taken with the Cisses and the class. Sash was very humble through the whole experience, telling the youngsters "to say thank you to your uncle and your aunt for doing this for you." Also pictured are the boys' aunt, Alex Hunt, and Hunt's son, Skylar.

The many benefits of hiring a professional landscaper

The flowers are blooming, and the grass has begun to grow anew, making spring a great time for homeowners to once again turn their attention to landscaping. Those who aren't looking forward to dusting off their lawnmowers and rethreading their string trimmers may want to hire professional landscapers to tend to their lawns and gardens.

A recent joint study by the National Gardening Association, Residential Lawn and Landscape Services and the Value of Landscaping found that homeowners spend roughly \$45 billion per year on professional lawn and landscape services, as nearly 30 percent of all households across the United States use at least one type of lawn or landscape service. The rising use of lawn care services is indicative of homeowners' appreciation of the convenience and craftsmanship professional services can provide. While the impact professional landscapers can have on a property's aesthetic appeal is considerable, homeowners also benefit from working with professional landscapers in various other ways.

• Time savings: One of the biggest benefits of leaving lawn care to the professionals is the amount of time it will save for the average homeowner. Lawns generally need to be mowed once per week during the spring and summer seasons and, depending on the size of the property, that can take an hour or more. Add the time it takes to clean up clippings, mulch landscaping beds and edge the property, and homeowners can expect to devote a significant chunk of their weekends to caring for their lawns. Lawn services employ a few workers

who make fast work of the job, leaving homeowners time to enjoy their weekends however they see fit.

• Reduced risk for injury: Maintaining a landscape is hard work, and those unaccustomed to this type of activity may find themselves winded or at risk of injury. Improper use of lawn equipment also is a safety hazard. Leaving the work to professionals can help homeowners avoid strained backs, lacerations,

Time saved and a professional job are just two of the reasons homeowners hire lawn care companies.

pulled muscles, sunburns, and any other dangers that can result when tackling landscaping projects.

• Financial savings: On the surface, hiring a landscaping service may seem like a costly venture. However, after crunching some numbers, many homeowners realize that doing the work themselves may cost more in the long run than hiring a professional landscaping service. Homeowners who decide to go it alone must purchase expensive equipment, and those lawn tools will require routine maintenance, which

costs additional money. Inexperienced homeowners may incur extra fees to "fix" mistakes that occur during the learning process. Each year, new seed, fertilizer, mulch, pesticides, and other supplies also must be purchased. But professional lawn care services typically charge a set fee per month, and that fee covers the maintenance of both your property and the equipment needed to keep that

property looking great.

• Know-how: Many professional landscapers know how to address lawn care issues that may arise throughout the year. They will know how to deal with dry patches of lawn or poorly draining areas, and they also can make recommendations on plants that will thrive under certain conditions.

• One-stop shopping: Certain landscaping services provide many different options for prospective customers. Basic lawn cuts may be one package, but there also may be

services for seasonal seeding, weeding, leaf clean-up, and winterizing.

• Consistent maintenance: Homeowners who frequently travel or spend much of their summers away from home often find that lawn care companies are a wise investment. Established weekly schedules ensure the landscape always will look its best whether homeowners are home or out of town.

Spring is a great time for homeowners to decide if hiring professional landscaping services is in their best interests. The time and money saved, as well as impact professional landscapers can have on a property, makes landscaping services a great investment for many homeowners.

HELP WANTED
Use the classifieds to fill YOUR next open position. Call us today!

Cargill
Cargill Inc., a world leader in Agricultural Business, has one opening for a Custom Applicator position located in New Sharon, Ia. If you are a motivated individual seeking a career change that will allow you to join a team of over 158,000 employees worldwide...Cargill is the place for you.

This position will be responsible for handling fertilizer and chemicals within the guidelines of the label instructions, using basic computer and math skills. Applicants will be expected to maintain accurate mixing, blending, delivery, and application records. As a Fertilizer Production Employee, you will:

- Operate safely with Cargill policy, procedures, and governmental regulations and fully participate in Cargill Safety programs (BBS, SafeStart etc.).
- Mix and blend chemical and fertilizer.
- Perform critical operations to keep facility running; delivery of fertilizer, chemicals, & seed, as well as operate chemical and fertilizer application equipment, and blending of fertilizer and chemicals.
- Perform daily vehicle/equipment inspections. Clean, maintain, and assist with mechanical items.
- Inventory management.

This is an excellent opportunity for qualified individuals interested in:

- Working in a highly efficient fertilizer facility
- Team environment
- Working toward career advancement
- Competitive salary
- Incentive program
- Benefits package

Required:

- Have, or have the ability to obtain a CDL and Commercial application license
- Must be able to read maps (S-T-R) and follow directions
- Ability to work from heights
- Ability to work irregular hours
- Ability to lift 50lbs.
- Basic math skills
- Basic computer knowledge
- Verbal and written communication skills a must

Preferred:

- High school diploma, or equivalent
- Experience mixing and blending of agriculture chemicals and fertilizer
- Experience mixing and blending of agriculture chemicals and fertilizer
- Previous operation of commercial application equipment
- Chemical and Fertilizer knowledge

Applicants can log onto www.cargill.com and reference job number NEW00876 to apply.

Successful applicants will be required to pass company paid physical, which includes a drug and alcohol screen. Cargill is an Equal Opportunity Employer

BRINGING HONOR TO THOSE WHO SERVED

THE ROCK

This is the actual rock. The rock and it's transportation have been donated by Ben Shinn in Eddyville.

HOW CAN I HELP?
The Freedom Rock will be a lasting tribute to all those who have served our country, are currently serving our country, and those who will do so in the future. Projected cost of the project will be upwards of \$20,000 so community support is needed. There are several ways you can help honor the Veterans of our great country and community.

Donations are being accepted in 3 ways.

- Cash to be used for the general project expenses.
- Purchase of an engraved paver(s) which will be used to make the walkway around the memorial.
- Donation of goods/services.

For questions about the Freedom Rock Project please contact:
Kim Dixon 641-673-0220
or kjdixon@mahaska.org

BRINGING HONOR TO THOSE WHO SERVED
The original Freedom Rock is located in Adair County, a mile south of I-80 on exit #86. It is re-painted every year by Ray "Bubba" Sorenson II just in time for Memorial Day. Bubba's goal is to et a Freedom Rock in all 99 counties in Iowa. Even though he won't be able to re-paint the county rocks every year like he does the original, this will be a one-of-a-kind statewide Veterans Memorial that will lead tourists across our state to see each rock, providing small towns and counties with a unique tourist attraction.
HOW CAN I HELP?
The Freedom Rock will be a lasting tribute to all those who have served our country, are currently serving our country, and those who will do so in the future.
Projected cost of the project will be upwards of \$20,000 so community support is needed.
There are several ways you can help honor the Veterans of our great country and community. Donations are being accepted in 3 ways.
1. Cash to be used for the general project expenses.
2. Purchase of an engraved paver(s) which will be used to make the walkway around the memorial.
3. Donation of goods/services.
For questions about the Freedom Rock Project please contact:
Kim Dixon 641-673-0220 or kjdixon@mahaska.org

Help Wanted:

NuMark Building Corporation, a post-frame construction company, is seeking full-time personnel to join our team.

This position would serve as a member of our wood/post frame construction crew. Post frame, steel frame, or general construction experience preferred. This position is based out of Pella, IA but would travel throughout central Iowa and would include fabrication work.

This position is full time, hourly rate, with overtime. Typical work week is 45 hours. We also offer benefits such as vacation, health insurance and 401K.

If interested, please visit our website at www.NuMarkbuildings.com to print and fill out an application or visit our office at 1108 Franklin St., Pella • 641-628-2260
