**WASHINGTON FIREWOOD LAW**

State law requires firewood to be sold by the cord or fraction of a cord. A cord is 128 cubic feet, which is a stack 4 feet wide, 4 feet tall, and 8 feet long, or equivalent. A cord of wood cut 16 inches long would be three stacks 4 feet tall and 8 feet long.

The terms "rack," "unit," "pile," and "truckload" are not to be used when advertising firewood. State law requires that a delivery ticket or sales invoice be presented by the seller to the purchaser at the time of sale. The sales invoice is to include the name and address of the seller, name and address of buyer, quantity delivered, price, and date of delivery. State law suggests that firewood be described for sale by species such as 50 percent oak and 50 percent alder.

This notice approved by the state Department of Weights and Measures, (360) 902-1854, Larry Kanouse (360) 902-1857, Kirk Robinson (360) 902-1856, and provided as a public service by The Reflector.
