

PLANTER BOX ADDITIVE

NutriShield

WHAT IS NUTRI-SHIELD?

NUTRI-SHIELD combines talc and graphite with two foundational products found in Hefty Complete: Nutri-Cycle and Heat Shield. Previously, this technology was available only as part of Hefty Complete Seed Treatment or with in-furrow systems.

NUTRI-SHIELD contains pure talc as a carrier mechanism to add Nutri-Cycle and Heat Shield directly into the planter box.

COMPONENTS:

- 26 nutrient solubilizers and 6 strains of trichoderma that break minerals down into plant-available nutrient form.

APPLICATION GUIDELINES:

- A 4.3-pound container treats 50 units of corn or 90 units of soybeans.
- Dump contents of Nutri-Shield into central fill planter or individual planter box units.
- Can be mixed in with the seed tender, or as seed is being filled into planter units.
- If additional talc or graphite is needed, add at the same time as Nutri-Shield is being mixed in.

NUTRI CHARGE

POWER PLANT

WHAT IS NUTRICHARGE POWERPLANT?

NUTRICHARGE POWERPLANT is a planter box product that replaces traditional talc and graphite.

Not only do you still get the benefits of seed flow and lubrication, but also the patented NutriCharge technology that helps protect phosphorus from being tied up to calcium in your soil. One molecule of NutriCharge has the ability to capture over 65 times its weight in calcium. Think of a shield protecting your investment of phosphorus in your soil.

APPLICATION GUIDELINES:

- 3 oz. per unit of corn or 2 oz. per unit of soybeans gets you the equivalent of 3.2 oz. of NutriCharge on the acre.
