

THE ONLY PLANTER BOX ADDITIVE PRODUCT THAT IS **TALC FREE!**

WHAT IS NUTRICHARGE POWERPLANT?

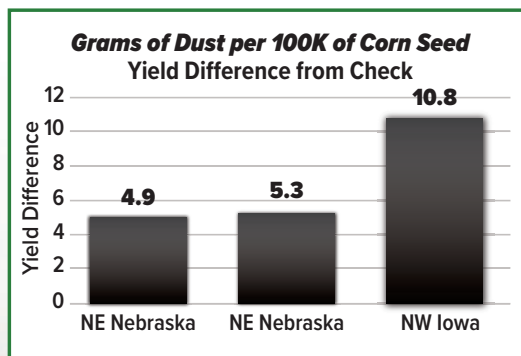

NUTRICHARGE POWERPLANT IS A PLANTER BOX PRODUCT THAT REPLACES TRADITIONAL TALC AND GRAPHITE.

Not only do you still get the benefits of seed flow and lubrication, but also the patented NutriCharge technology that helps protect phosphorus from being tied up to calcium in your soil. One molecule of NutriCharge has the ability to capture over 65 times its weight in calcium. Think of a shield protecting your investment of phosphorus in your soil.

POWERPLANT also contains micro-algae that feeds native biology in your soil.

4^{TO}1 ROI **IN THE CURRENT MARKET**

by changing out your traditional talc and graphite with NutriCharge POWERPLANT.

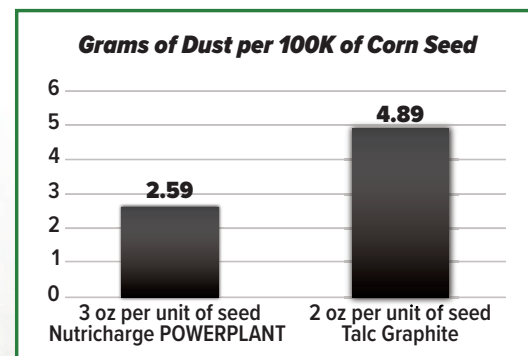

APPLICATION GUIDELINES:

- 3 oz. per unit of corn or 2 oz. per unit of soybeans gets you the equivalent of 3.2 oz. of NutriCharge on the acre.

23% **LESS DUSTOFF**

than traditional talc and graphite!

Study completed by Independent Party SGS

BENEFITS:

NUTRICHARGE POWERPLANT is the only planter box product in the market that can protect against phosphorus tie up, provide key micronutrients to the seed, feed native biology, and help with seed flow and planter lubrication.

ALL THIS FOR AROUND \$6 AN ACRE.
