

THE POWER OF CHOICE

9RX NARROW TRACK TRACTORS

9RX Narrow Tractors feature a narrow undercarriage and tracks ideal for use in 22-, 30- and 40-inch row crops. These high-horsepower, high-flotation row-crop tractors are just what you need to handle higher-speed planters, nutrient application bars, and larger grain carts.

Nobody offers you so many choices in large-horsepower tractors. Need a track or wheel model? A wide range of horsepower to fit your row-crop operation? Wide or narrow tracks? Discover the new power of choice at your John Deere dealer today. **Nothing runs like a Deere.™**
