

Scott-Hourigan co.

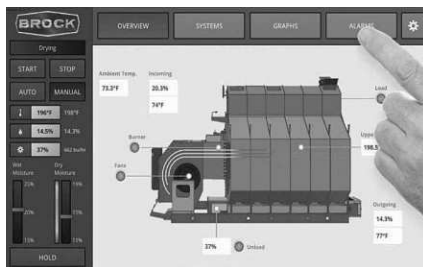

Family Owned for THREE Generations!!

Brock TrueGrain™ Moisture Sensor Sys.

- Consistent & accurate measure of moisture levels on Brock grain dryers rated up to 10,000 BPH
- Grain is metered through a vertical chamber at a constant speed. This prevents fines & condensation from accumulating which can distort measurements.
- Metering Wheel provides access to grain samples for manual cross-checking moisture content

Brock Intui-Dry® Controller

- Automates grain drying to provide total dryer management for accuracy in controlling grain moisture during the drying process.
- Web-based monitoring gives enhanced remote access through a personal computer
- Works with Brocks TrueGrain™ Moisture Sensor System
