

High rise tip protects locking thumb for extended wear of main knife body.

Front
profile of
CC-440

DUAL BANDING KNIFE

Fits behind any Lange knife providing dry fertilizer placement approximately 1" above the NH₃ placement

CC-440 KNIFE

It's beefy, shorter profile gives the CC-440 the ground clearance and strength needed for today's newer chisel plows, while still providing maximum sealing of your fertilizer in wet or dry soil, just like it's time tested brother, the CC-240!
