 **Miravis® Neo**

*Based on average yield response across 174 on-farm corn trials and 82 on-farm soybean trials conducted from 2019–2025 comparing Miravis Neo with fungicides tested in those trials, where Miravis Neo achieved higher yields than competing products approximately 80% of the time. Corn locations: IA(43), IL(52), IN(16), KS(2), MN(12), MO(4), NE(14), NJ(1), OH(17), WI(13). Soybean locations: AR(11), IA(14), IL(13), KS(1), MN(7), MO(4), ND(1), NE(6), OH(14), SD(3), WI(9). Additional support comes from 12 tar spot university/research trials conducted from 2019–2024 and Beck’s Hybrids 2026 PFR Proven Fungicide Trial Results for Corn. Actual results will vary based on disease pressure, timing, geography and agronomic conditions. All photos are either the property of Syngenta or are used with permission. Product performance assumes disease presence. Performance assessments are based upon results or analysis of public information, field observations and/or internal Syngenta evaluations. Trials reflect treatment rates commonly recommended in the marketplace. © 2026 Syngenta. Important: Always read and follow label instructions. Some products may not be registered for sale or use in all states or counties. Please check with your local extension service to ensure registration status.
