

Average Temperature (°F): Departure from 1991-2020 Normals
March 01, 2026 to March 31, 2026

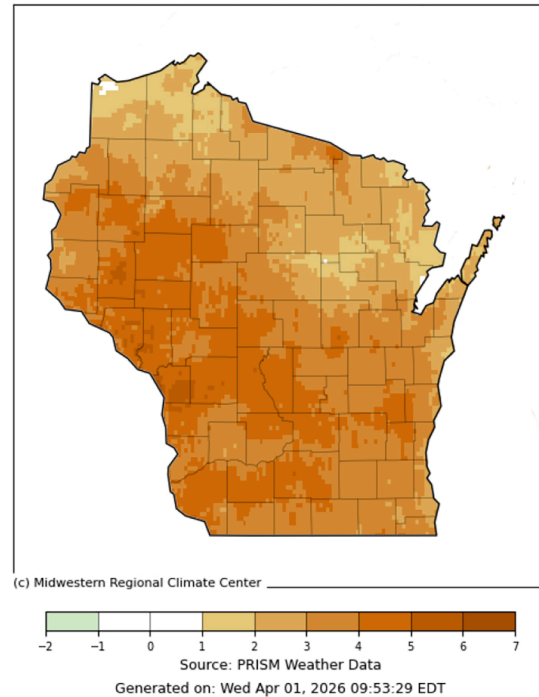

Figure 2 (left). March average temperature in degrees Fahrenheit. Average temperatures ranged from 25 to 35 degrees from central to northern Wisconsin and 35 to 40 degrees from central to southern Wisconsin.

Figure 2 (right). March average temperature departure from normal. The state averaged two to five degrees warmer than normal, with parts of west-central to southwestern Wisconsin seeing some of the largest anomalies.
