

“

[A lot of farmers] don't like spending money and then not seeing like, you know, I spent this \$60,000 on these [crop insurance] premiums here for 2020/2021. And that kind of leaves a bad taste in your mouth. But I've been on the other end where it's like, "oh my gosh. If we didn't have this." Like back in '09, I had \$15 milk, and it went to \$9. That was, uh, you know,—it put a world of hurt on most dairy producers.

(dairy farmer in his 50s)
