

# If you need to plant saved seed!!

---

- **Step One:** Determine if you can legally plant the wheat seed you saved.
- **Step Two:** Once you have determined if you can legally plant the seed you saved, the next step is to clean the wheat seed.
- **Step Three:** Perform a germination test.
- **Step Four:** Assess the need for a seed treatment. A number of fungicides and insecticides are labeled for use as seed treatments on winter wheat and are listed in [\*Pest Management in Wisconsin Field Crops 2020\*](#) (UW-Extension A3646).
