

DO YOU TRAIN, SUPERVISE, OR HIRE YOUNG AGRICULTURAL WORKERS?

As harvest is ramping up, now is a great time to think about how to protect the safety and health of adolescent and young adult workers who are at higher risk of injury. A free, evidence-based training is available for **supervisors, parents, and teachers**. Topics include supervision, training, and communicating more effectively.

The training and supplemental materials in English and Spanish can be found [here](https://hwc.public-health.uiowa.edu/protecting-young-ag-workers):
