Subject: RE: City of Athens

Below are two answers from Ron Lucas with the City of Athens about the bid due date being moved, and number of customers. We are still waiting on the performance bond/bid bond, franchise map, tonnages.

There is concern that due to the nature of the study required to submit a bid accurately that the date of April 18th, 2019 is too soon for bid submission. The city agrees with this concern and the timeline will be adjusted to the following:

Deadline for Questions (4:00 PM):	Thursday, April 18 th , 2019
Bid Due (2:00 PM):	Thursday, April 25 th , 2019
Bid Presentations (Tentative):	Week of May 6 th , 2019
Bid Award (Tentative):	Week of May 20 th , 2019

There was a question about the number of residential accounts to use for refuse collection and recycling collection. That number is part of Section 10 of the bid packet. Use the same number of accounts for both refuse collection and recycling collection, which is 4002.

As I receive answers from Ron, I will forward on to you.

Thank you,
Nick Rupert

Subject: Fwd: Addendum to Legal Ad

More clarification on bid bond and performance bond.

Get [Outlook for iOS](#)

From: Ron Lucas <rlucas@ci.athens.oh.us>
Sent: Wednesday, April 17, 2019 11:10 AM
To: Ron Lucas
Subject: Addendum to Legal Ad

There is a question regarding using the Ohio Revised Code 153.54 language for the refuse and recycling bid since it typically applies to Public Improvement Projects.

The legal ad states:

"Each bid shall contain the full name and address of each person or company interested in the same. It shall be accompanied by a proposal bond in the amount of one hundred percent (100%) of the bid, or by a certified check, cashier's check or irrevocable letter of credit for ten percent (10%) of the bid, made payable to the City of Athens, Ohio, conditioned that if the bid is accepted, a contract will be entered into within ten (10) days after notice of acceptance. A performance bond of one hundred percent (100%) of the amount of the contract with a satisfactory surety company, conditioned according to law, will be required for the faithful performance of the contract."

The bid packet cites section 1.5 Compliance With Local Laws, cites Athens City Code section 5.02.14. - Performance bond. This states:

"The licensed hauler shall furnish to the city a performance bond for the faithful performance of this agreement. It shall be a cash bond deposited with the city or a bond executed by a surety company licensed to do business with the state. Said bond shall indemnify the city against any loss resulting from or any failure of performance by the licensed hauler. The bond shall be established by the service-safety director and shall not be less than the sum of \$20,000.00."

The city will accept a bid bond that will become a performance bond for the awarded bidder. For purposes of this bid, the bidder will provide a bid bond in the amount of six months service, or a certified check, cashier's check or irrevocable letter of credit for ten percent (10%) of six months of service. This will become the performance bond for the awarded bidder. The bidders not awarded will have their bid bonds, certified check, cashier's check or irrevocable letter of credit returned.

Thanks,

Ron

Subject: RE: City of Athens Refuse and Recycling Bid Question #11 - #15

A series of questions asked. My responses in red:

11. Historical Container/Service Requests for Special Events Hosted By City for the Following:
 - a. Halloween – Three (6 yard) dumpsters set up at specified uptown locations.
 - b. Block Party – not sure what block party this entails, as there is only Halloween
 - c. Clean Up – One week in the spring, unlimited amount of bags at the curb for every resident. Two roll off dumpsters at the city service garage for trash and scrap metal. Those emptied upon phone call from city.
 - d. Sandlot – Two dumpsters in place from March through the end of July. One for trash and one for recycling. Empty twice per week.
12. Franchise District
 - a. If we pick a location up 24 times one month and 18 times the next, is that how the city is billed? Yes
13. How many Residential Refuse Subscribers are billed for more than one 30GAL container? Awaiting report from our utility software provider. Will send it as soon as I receive it.
14. Can you provide any information on what type of service frequency the municipal locations are? Most are twice a week, some are daily (City Hall)
15. Was the City able to produce any data on waste collected during 2018? No

BID GUARANTY AND CONTRACT BOND

SECTION 153.571 Ohio Revised Code

Bond No.: 870263

KNOW ALL MEN BY THESE PRESENTS, That we, the undersigned Rumpke of Ohio, Inc., 3990 Generation Drive, Cincinnati, OH 45251, as Principal and Evergreen National Indemnity Company, 6140 Parkland Boulevard, Suite 321, Mayfield Heights, OH 44124, as Surety, are hereby held and firmly bound unto City of Athens, 8 East Washington Street, Athens, OH 45701, as Oblige in the penal sum of the dollar amount of the bid submitted by the Principal to the Oblige April 25, 2019 to undertake the Project known as:

Municipal Refuse and Recycling Collection

The penal sum referred to herein shall be the dollar amount of the Principal's bid to the Oblige incorporating any additive or deductive alternate proposals made by the Principal on the date referred to above the Oblige which are accepted by the Oblige. In no case shall the penal sum exceed the amount of _____.

(If the above line is left blank, the penal sum will be the full amount of the Principal's bid including alternates. Alternatively, if completed, the amount stated must not be less than the full amount of the bid including rates, in dollars and cents. A percentage is not acceptable.) For the payment of the penal sum well and truly to be made, we hereby jointly and severally bind ourselves, our heirs, executors, administrators, successors, and assigns.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, that whereas the above named Principal has submitted a bid on the above referred project;

NOW, THEREFORE, if the Oblige accepts the bid of the Principal and the Principal fails to enter into a proper contract in accordance with the bid, plans, details, specifications and bills of material; and in the event the Principal pays to the Oblige the difference not to exceed ten percent of the penalty hereof between the amount specified in the bid and such larger amount for which the Oblige may in good faith contract with the next lowest bidder to perform the work covered by the bid; or in the event the Oblige does not award the contract to the next lowest bidder and resubmits the project for bidding, the Principal will pay the Oblige the difference not to exceed ten percent of the penalty hereof between the amount specified in the bid, or the costs, in connection with the resubmission, of printing new contract documents, required advertising and printing and mailing notices to prospective bidders, whichever is less, then this obligation shall be void, otherwise to remain in full force and effect. If the Oblige accepts the bid of the Principal and the Principal within ten days after the awarding of the contract, enters into a proper contract in accordance with the bid, plans, details, specifications and bills of material, which said contract is made a part of this bond the same as though set forth herein; and

IF THE SAID Principal shall well and faithfully perform each and every condition of such contract; and indemnify the Oblige against all damage suffered by failure to perform such contract according to the provisions thereof and in accordance with the plans, details, specifications, and bills of material therefore and shall pay all lawful claims of subcontractors, materialmen, and laborers, for labor performed and materials furnished in the carrying forward, performing, or completing of said contract; we agreeing and assenting that this undertaking shall be for the benefit of any materialman or laborer having a just claim, as well as for the Oblige herein; then this obligation shall be void; otherwise the same shall remain in full force and effect; it being expressly understood and agreed that the liability of the Surety for any and all claims hereunder shall in no event exceed the penal amount of this obligation as herein stated.

THE SAID Surety hereby stipulates and agrees that no modifications, omissions, or additions, in or to the terms of said contract or in or to the plans and specifications therefore shall in any wise affect the obligations of said Surety on this bond, and it does hereby waive notice of any such modifications, omissions or additions to the terms of the contract or to the work or to the specifications.

SIGNED AND SEALED This 25th day of April (year) 2019.

David A. Canzone, Treasurer

Waste & Recycling Services

BID CLARIFICATIONS

2.2 *Specific History and Current Information*

The city is soliciting requests for bids for the purpose of managing Solid waste and recycling collection and processing services for all city related operations, with service beginning July 1, 2019. These services include the collection and processing of all landfilled waste and recycling for all residential housing, a geographically delineated franchise area and numerous special events that occur on an annual basis. The

city is seeking to build upon existing solid waste and recycling collection systems in effort to achieve all future waste related diversion and minimization goals.

For purposes of this bid the terms “standard recycling” and “standard single-stream recycling” are defined to include at minimum paper, cardboard, pasteboard, steel, aluminum, plastic and glass.

Currently, The city waste management efforts in the franchise area is accomplished with a combination of rear-loader dumpsters for trash and cardboard, 1 and 2 yard tilt carts for cardboard and Rubbermaid “Tote” style bins for “standard” recycling collection. The current recycling system is multi-streamed. Residential collection is two-fold. Refuse material is picked up at the curb in containers of the customer’s

choice. Recycling is collected from standardized bins in which the customer manages material sorting. Materials are collected with a combination of rear loader packer trucks for landfill and cardboard as well as flat-bed trucks with custom compartments for manual loading of separated recycling categories. As

detailed below, The city is accepting bids from qualified applicants to ensure all standard recycling operations are serviced as single-stream in an effort to simplify and standardize collection systems.

The city has existing collection and recycling systems for categories including but not limited to E-Waste; discs and data; lightbulbs; batteries; toner cartridges; Styrofoam packaging; books; confidential materials; scrap metal; yard waste; and systems of donation. The city will accept recommendations for collection processes that would accommodate one or more of these efforts in addition to the single stream recycling collection/processing and food waste/composting, though it is not a requirement of a bid submission.

As the city desires to become a Zero Waste community, a sustainability-focused waste management plan is integral to the overall success of the city’s commitment to reducing solid waste and increasing waste diversion. The city defines sustainability as the ability to meet the needs of the present without compromising the ability of future generations to meet their needs. The core tenet of sustainability at the city is the concept of the “triple bottom line” of Economy, Environment and Equity. The city is requiring that all future efforts associated with waste management processes successfully address the triple bottom

line. Successful respondents to this bid will address how their program offerings positively impact each aspect of the triple bottom line and should include at minimum:

1. **Economy:** impact on local jobs, contributions to local community and long-term investment in the region.

Rumpke's Southern Ohio Market (Athens area) currently employs about 200 employees including drivers, equipment operators, mechanics, general laborers, commercial and municipal sales representatives, managers and administrative personnel. Rumpke has approximately 150 trucks, including roll off, front load and rear load for both waste and recycling collection in our Southern Ohio Market as well as 3 landfills, 2 transfer stations and several other service stations. Rumpke will continue to provide a positive impact on local jobs in the area, contributions to the local community as well as a positive long-term investment in the region.

2. **Environment:** projected carbon footprint of waste management operations associated with services to the city and efforts taken to offset this footprint in support of the city's efforts toward carbon neutrality. This assessment should include miles driven per service day, type of fuel utilized, offsets associated with operations, landfill contributions, etc. The city may utilize the CarbonMAP online calculator.

At this time, without tonnages of recycling and waste, container sizes, service frequencies, and number of containers, Rumpke cannot provide an accurate carbon footprint until Rumpke starts services so waste and recycling audits can be taken of the services requested.

3. **Equity:** it is imperative that the issue of regional environmental impact be addressed in any bid response. The successful respondent will supply information regarding downstream outlets and processing efforts engaged with each commodity collected and how that process impacts the region to which it is sent.

See information graphic on how recycling works & 2019 End User Flyer

The City of Athens community extends well beyond the residential and franchise areas. Ohio University's Athens Campus has over 22,000 students, plus 1,194 faculty members and 2,411 staff members. Ohio University manages a housing system of 42 residence halls that house nearly 8,000 students during the academic year. That equates to approximately 35% of the student population. The vast majority of the remaining 65% of the student population, staff and faculty live off campus yet within the city and surrounding counties. Numerous employers and employees that work in the city commute from surrounding cities and counties. For purposes of this bid please consider the "greater City of Athens community" to include all daily members of our city.

Additionally, the city is a driving force within the Athens Hocking Solid Waste District (AHSWD) efforts to meet EPA required recycling and waste reduction benchmarks as well as other educational and operational goals. The successful respondent will address how in partnership, their services may assist in providing waste related, waste reduction and recycling opportunities throughout the city, the AHSWD, the "greater City of Athens community" and the SE Ohio region.

Section 3 Scope of Work

3.1 Deliverables

The City of Athens is seeking a three year agreement with a maximum of three optional one-year renewals. The agreement will be awarded to a qualified hauler who can support all hauling and manage processing of landfill tipping and single-stream recycling for the city residential areas, franchise district and special events.

Detailed Operational Schedule, Refuse and Recycling Routes, Franchise Centralized Locations and Pick Up Schedule

Respondents will provide the city with a detailed operational schedule. This schedule must include residential refuse collection and recycling collection. The schedule must include servicing of the centralized franchise district by location and frequency.

- Franchise area: Rumpke proposes to standardize this area by providing all current customers who have a trash can(s) or loose waste with an appropriate amount of 95-gallon trash carts. We believe once the number of containers are determined, and service levels set, this will clean up the Franchise area. Also, Rumpke will be placing dumpsters in current locations so overflow will be cut to a minimum during normal service weeks. Rumpke will utilize 2 single axle rear load trucks for waste removal, and 1 single axle rear load truck for single stream recycling. Each truck will have a driver and helper and start at 4am to begin service in the franchise area. Service days in the Franchise will be Saturday – Sunday. However, once volumes and service levels are determined, Rumpke will work with the City to determine if Sunday service is warranted every week. Once the franchise area is serviced, these trucks will help support the residential waste & recycling routes and operate on the streets needing a single axle truck to service.
- Residential: Rumpke will use 3 rear load tandem trucks for waste and 1 rear load tandem truck for single stream recycling to service the City of Athens Monday thru Friday starting at 7am.

Annual Holiday Delay Calendar, Contact Information for Emergency Maintenance or Additional Collection

Respondents must provide an annual holiday delay calendar, contact information for emergency and additional collection.

Please see attached Rumpke Holiday Schedule

Contact Information

- Mark Ramey – Operations Manager – 740-412-9032
- Jeff Legg – Region Sales Manager – 740-823-1153
- John Thornsberry – Route Manager -- 740-418-5822
- Shawn O’Nail – Route Manger – 740-978-8334
- Nick Rupert – Municipal Sales Representative – 740-418-0695
- Josh Ray – Vehicle Maintenance Manger – 740-577-4608

Number of Vehicles, Weight, Year, Make, Model and Primary Use

Respondents must include detailed fleet information that includes the number of vehicles, vehicle weights, and vehicle information (year, make, model and primary use).

Please see attached Equipment List

Detailed Summary of Billing Process, Data Tracking Programs with Examples of Set Out Rates, Weight and Other Tracking Measures

Respondents must provide a detailed summary of the billing process. Include information about data tracking programs with various tracking measures (set out rates, weight, landfill diversion, etc.)

Rumpke will invoice the City of Athens on a monthly basis for the current month. Rumpke can provide all necessary reports including active residential units, number of carts, dumpsters, and recycling participation.

Annual Licensing Fee

Respondent will include annual licensing fee to the City of Athens in compliance with Athens City Code 5.02.08 B.

Upon award of Contract, Rumpke will provide all licensing and fees required in accordance with Athens City Code 5.02.08 B.

The successful candidate must be able to begin full service to the city on July 1, 2019.

3.2 Services Requested

The selected firm will perform all recycling and solid waste collection and processing including, but not limited to:

A. Residential Refuse Removal

1. Qualified respondents will detail their ability, during standard operations, to ensure that neither hauling nor disruptive service noise will occur in the residential areas prior to 7am. Some programs and special events do not fall within "standard operations".

Rumpke will start service in the Athens residential area starting at 7am Mon-Fri except when a holiday falls in the week or during inclement weather, then Rumpke will operate one day behind. Rumpke will start service in the franchise area at 4am Sat -Sun. These start times will continually discussed during monthly safety meeting, and driver meetings.

2. Qualified respondents will detail their projected schedule, during standard operations, to complete daily service in such a way that minimizes disruption to residential areas.
To minimize disruptions to residents, Rumpke will use 3 trucks for waste, and 1 for recycling in the residential area along with support from 2 additional waste and 1 additional recycling truck.
3. Qualified respondents will provide same day service on high priority issues if communicated by the city, Monday through Friday by 2pm, next day service on all issues communicated between 2pm and 5pm and 2nd day service on all issues communicated after 5pm including but not limited to: additional placement of capacity; additional collection; and, emergency maintenance of sites or equipment.

Driver will stop by or call in to the City of Athens before leaving town after routes are done to address any same day services. If City contacts Rumpke after 2pm, service will be the next day. If after 5pm service will be within two days.

4. Qualified respondents will provide same day service on high priority issues if communicated by the city Saturday, Sunday and Holidays by 8am, next day service on all issues communicated between 8am and 5pm and 2nd day service on all issues communicated after 5pm including but not limited to additional placement of capacity, additional collection and emergency maintenance of sites or equipment.

Contact Nick Rupert at 740-418-0695 by 8am for same day service, between 8am and 5pm. If contacted after 5PM, service will be the next day.

5. Roads less than 14 feet wide must be serviced with a single axle vehicle.
Rumpke will provide waste and recycling services on the streets designated by the city requiring a single axle rear load truck which are being used daily in the franchised area.

B. Residential Single Stream Recycling

6. Qualified respondents will ensure 100% of standard recycling operations will be serviced as single-stream. At minimum single-stream is to include glass bottles (all colors), 1-#7 bottle and non-bottle shaped plastic, aluminum, steel, paper, pasteboard and cardboard. Any contract executed will include a clause requiring the respondent to process single stream recyclable materials and qualified respondents will provide a letter certifying they are prepared to offer such services by July 1st, 2019 at no additional fee.

Acceptable Single Stream items are: office paper, junk mail, folders, magazines, catalogs, telephone books, newspaper including inserts, paperboard, clean pizza boxes, cardboard flattened to fit in bin or cart, plastic bottles & jugs where the opening is smaller than the base, aseptic containers (milk cartons, juice boxes, etc), aluminum cans, steel cans, tin cans, and glass bottles & jars (any color).

See Attached Flyer with Acceptable Items

7. Qualified respondents will describe their systems regarding the acceptability of single-stream recycling collected in plastic bags, the potential for plastic bags as an accepted material in single stream, the acceptability and downstream systems for #1-#7 non-bottles shaped plastics, and acceptability of cartons and aseptic packaging.

Bags: NO BAGS. All recycling must be loose inside a container/dumpster. At this time, bags of any type are not acceptable, if there is a chance to recycle in the future, Rumpke will work with the City to start accepting. The only plastics acceptable in the program are plastic bottles of any color where the opening is smaller than the base. Aseptic containers are acceptable in Rumpke's single stream program.
8. Qualified respondents will describe their current or anticipated systems regarding handling of common contaminants and other challenges of single stream processing, including but not limited to wet paper/cardboard, food waste, food related plastics or other food contaminated materials, PLA compostable plastics, broken glass residue (specifically in the paper stream), Styrofoam, poly-lined cups and lids, small electronics, books and metals items other than aluminum or steel cans.

Rumpke will only accept items on our acceptable items list. Any items other than the ones on the acceptable items list can cause a downgrade or rejection of loads.
9. Qualified respondents will detail current or anticipated recycling recovery rates of single-stream materials after processing and detail the percent and composition of "residual" sent to the landfill. Through, Rumpke's Columbus Material Recovery Facility recovers 86.5% of all material processed thru the facility at 30 tons per hour. The remaining residual waste of 13.5% is made up of plastic film and bags, dirt, organic material, construction debris, clothing, etc.
10. Qualified respondents will work with the city to determine if select high volume locations are best serviced by continuing source separated cardboard collection. These locations may include but are not limited to City Hall, the Law Administration Building, the Community Center, Engineering and Public Works and seasonal use of city parkland.

Rumpke will collect cardboard in the single stream recycling route.
11. Qualified respondents will commit that any landfilling of the city's dedicated recycling stream beyond a pre-approved "residual" rate is unacceptable and will be considered a breach of contract unless approved in advance by an authorized representative of the city.

Rumpke will work with the city to determine a pre-approved residual rate.
12. Roads less than 14 feet wide must be serviced with a single axle vehicle.

Rumpke will provide waste and recycling services on the streets designated by the city requiring a single axle rear load truck which are being used in the franchised area.
- C. **Franchise District Refuse Removal, Franchise District Recycling, Franchise District On Street Refuse/Recycling Collection**
13. Qualified respondents will propose refuse and recycling collection for the centralized franchise district. Detail bid with recycling and landfill collection systems for each location including an anticipated timeline to provide color-coded two or three dumpster systems at all sites in which space and access allow. Respondent will detail the cost to the city and their ability to service multiple sites requiring manual moving and/or emptying of bins.

Rumpke will provide all current customers who have a trash can(s) or loose waste with an appropriate amount of brown 95-gallon trash carts. Dumpsters for waste will be brown, and Recycling rear-load containers will be green labeled with acceptable item stickers. The City

provides blue 65-gallon trash carts to customers for recycling. Rumpke will perform a waste & recycling audit at each location in the franchise area to determine the correct number of containers and frequency of service to attain a total yardage of waste and recycling in order to reach an accurate monthly price. Pricing for the manual moving and or emptying bins is figured in the franchise cost.

14. Qualified respondents will work with the city to determine best collection container types, size and placement. As landfill volumes reduce and single-stream recycling volumes increase, the city will require the flexibility of any qualified respondent to adjust haul schedules as well as shift or replace appropriately color-coded containers to meet the fluctuating needs of the waste stream. Rumpke will work with the City of Athens on waste and recycling audits to best measure volumes and service levels in the franchise area.

15. Qualified respondents will propose a schedule for collection of on-street refuse and recycling containers located in the franchise area.
Rumpke will check/service the on street refuse and recycling containers in the franchise area daily. The City will communicate to Rumpke when the curbside belly waste & recycling compactors need to be serviced.

16. Qualified respondents will provide same day reporting of problem areas including sites that are blocked, need maintenance or in which there is significant contamination of single-stream recyclables or significant recyclables in with trash.

Rumpke's Operation team will work with the City on a daily basis to work on problem areas, blocked containers/alleys and containers which are contaminated with waste.

17. Qualified respondents will provide a weekend and holiday "on call" contact number to assist in resolution of high priority issues.

Nick Rupert 740-418-0695 will be the emergency contact.

D. Special Events

18. Qualified respondents will provide additional coverage of special events and high volume times of the year including, but not limited to, additional capacity, hauls, tracking and reporting during Ohio University Move-In week, Ohio University Move-Out week, Halloween block party, Sand- lot baseball, the city's annual Spring Clean-Up Week, the weeks preceding Ohio University spring break and winter break and various community events.

Rumpke will service the special events with roll off containers which will give accurate tonnage reports. If using rear load service, tons will be estimated by using number of yards for the event.

E. Safety and Cleanliness

19. Qualified respondents will address the safety measures taken to ensure that city residents will not be harmed or negatively impacted by the presence of waste hauling trucks, systems and other infrastructure provided by the respondent.

Rumpke holds daily driver huddles before drivers leave the office to discuss safety issues/procedures. Rumpke's safety department holds monthly safety meetings with the drivers. Also, Rumpke has a yearly driver safety bonus for drivers who have no accidents for a year which compounds yearly with no accidents.

20. Qualified respondents will ensure that all infrastructures provided to or used to service the city including, but not limited to dumpsters, bins, and trucks, must be maintained and managed with consideration to preventing leakage, managing a positive aesthetic reputation and controlling odor.

Route Auditors and Drivers note if containers are missing lids, leaking, or damaged containers so Rumpke's container shop can replace them.

21. Qualified respondents will commit to maintain the cleanliness of all recycling and landfill collection sites and ensure their ability to manually manage and remove all litter and overflow materials within ten feet of any recycling and landfill site.

Driver will take note of container locations and pictures of overage. This will be sent to the City with charges.

F. Residential Special Haul Service

22. Qualified respondents must detail collection of residential large item disposal. This must include a base rate for items up to three cubic yards in volume and a cost for each additional cubic yard collected. Items should be collected on the same day of the normal route schedule.

Resident calls into Rumpke's Toll Free Number 1-800-828-8171 to let customer service know of extra items so a work order can be created, and the The City of Athens can be billed.

23. Qualified respondents will detail their ability to provide, service, track and report weights for multiple Construction and Demolition Debris (C&DD) related roll-off dumpsters and haul to the closest appropriate recycler or outlet as decided by the city. These may include but are not limited to open top or sealed roll-offs for large landfill items, scrap metal, wood items for recycling, carpet, and mixed C&DD waste.

All CD&D material will be hauled to Rumpke's Beech Hollow location to be disposed of unless there is mutual agreement between Rumpke and The City of Athens of the materials destination.

Roll Off tonnage will be provided to the City for tracking purposes.

G. Extra Cans/Bags

24. Qualified respondents will detail costs of collecting additional cans and/or bags of refuse in residential areas of the city. Additional refuse must be tracked during collection and provided to the city daily for billing.

Rumpke will charge \$10 per additional bag(s) and report back to the City. The driver will note each address with multiple bags of waste along with the address. Operations will note these addresses and communicate this information to the City of Athens

H. Municipal Facility Refuse/Recycling Collection

25. Qualified Respondents will provide refuse and recycling collection to municipal facilities including City Hall, Athens Police Department, Athens Fire Department Headquarters, Athens Fire Department Station 2, Engineering and Public Works, Code Enforcement, Public Works Annex, Water Treatment Plant, Wastewater Treatment Plant, City Laboratory, Community Center, Arts West and the City Pool. These sites may be serviced with dumpsters or cans. Pick up schedules must be provided based on volume produced.

Rumpke will charge per yard for waste & recycling.

I. Billing

26. Qualified respondents will provide a billing system that is sub-invoiced by site use type.

Rumpke can provide detailed billing information based upon customer service level.

- J. ***Other Potential Services, Considerations and Proposals:*** Successful respondents to this bid are encouraged to address in detail each of the following that are applicable to their systems and service capabilities:

27. A billing and/or reporting system that provides adequate data to analyze landfill and recycling costs to the city by total residential operations, special events operations, franchise area operations and by individual building/site.

Rumpke can provide detailed billing information based upon customer service level.

28. A flexible billing system that, at minimum, reflects reductions, fluctuations and system changes including but not limited to changes in dumpster capacity, pick-up locations and haul schedules on the following month's invoice.

Rumpke will work with the City on any and all service level changes which will reflect on the monthly invoice.

29. Ability to ensure that all contaminants in the recycling stream are managed outside of the city. The city wishes to dissuade in town drivers from removing bags and/ or items from the Recycling stream and placing into the landfill dumpsters.

Rumpke will not sort recycling at the curb. If contents of the container have unacceptable items in the container, the container will be stickered as to why it has been left, and the driver will proceed with his/her recycling route.

30. Ability to provide calendar year reporting on locations for processing of all landfill, single-stream and specialty recycling materials including location of down-stream vendors and end markets demonstrating a focus on supporting the triple bottom line as described in section 2.2.

Rumpke can provide the customer names of where The City of Athens recycling material is shipped to for end markets. Cartons – Tissue Paper & Office Paper, Glass Bottles & Jars – Glass Bottles & Jars and Insulation, Paper & Cardboard – Paper Products, Steel Cans – Steel Parts, Aluminum Cans – Aluminum Cans, Plastic Bottles & Jugs – Drainage Pipe and Strapping Tape. See Information Graphic on How Recycling Works 1-30-2018.

31. Qualified respondents will work with the city to undertake quarterly reviews of landfill and single-stream recycling and landfill material weights, contamination rates, haul schedules and the most efficient bin/dumpster sizes with consideration to effects on quality of service, expense, effect on carbon footprint and the triple bottom line.

Rumpke will work with the City quarterly to review landfill and recycling tonnages along with contamination, haul schedules and sizing appropriate dumpsters.

32. Ability to provide calendar year reporting of single-stream facility recovery rates and contamination rates of city specific single-stream recycling. Such data points are used in demonstrating the effects of waste related services on triple bottom line considerations (as described in section 1), including but not limited to: annual weights of total recycled materials associated with this contract; carbon footprint calculations (utilizing CarbonMAP data sets); miles traveled as a result of this contract; amount and location of jobs created or retained as a result of this contract; and, economic development contributions to the local community.

Rumpke can provide a carbon footprint, but at this time without volumes, tonnages, sizes of containers, and frequencies, we are not able to provide a carbon footprint. However, once Rumpke starts collection services and performs audits, a carbon footprint will be provided.

33. Qualified respondents are asked to provide a proposal for how they will support the city's sustainability plans and Zero Waste goals with their efforts to provide the community with appropriate educational materials regarding the city's waste stream and how they will assist with the new bin placement or signage efforts upon transitioning to Single Stream.

The City has already switched to single stream recycling. The Rumpke Marketing Department will work with the City to design recycling flyers for education, and provide to the City to distribute and/or place on the City website.

34. Ability to partner with the city to the potential mutual benefit of city specific operations as well as Ohio University, Athens county, the AHSWD and/or the "greater City of Athens community" (as described in section 2.2) on "non-standard" materials that the city currently recycles or anticipates doing so in the future.

Rumpke understands partnerships. Partnerships are part of Rumpke's success in the waste and recycling business. 98% of all recyclable material Rumpke markets stays in the domestic market. Rumpke is always working to expand the recovery of materials. Also, Rumpke is currently working with the Ohio EPA & Recycling partnership on education and a statewide message of what can be recycled.

35. Qualified respondents will dispose of all refuse materials in an Ohio EPA approved location within the Athens County Solid Waste District. Primary recycling processing and hauling efforts will be managed within 150 road miles of the the city. Respondents will highlight any programs within Athens County and/or Athens Hocking Solid Waste District.

Waste will be disposed of at the Rumpke Beech Hollow Landfill located at 28 AW Long Road in Wellston, Ohio. Single Stream Recycling will be processed at Rumpke's Material Recovery Facility located at 5535 Vine Street - Cincinnati, Ohio or 1191 Fields Avenue – Columbus, Ohio 43201.

36. Qualified respondents will detail a curbside compost collection plan. This plan should initially outline single home residential accounts with a maximum of three units. Respondent should provide details on collection schedules, routes and frequency. Compost collection shall include the use of a covered bed vehicle in order to mitigate spillage. Respondent must process collected compost at an EPA approved processing facility. Respondent may detail compost collection of larger residential accounts (multi-unit apartments or large apartment complexes).

At this time, Rumpke will not be offering a curbside compost program.

Waste & Recycling Services

UPHOLSTERED ITEMS

All upholstered items (mattresses, box springs and furniture) must be wrapped in plastic prior to pick-up.

Waste & Recycling Services

STATEMENT OF QUALIFICATIONS

Our Story

Rumpke Consolidated Companies, Inc. is one of the largest waste and recycling firms in the United States. The company began in 1932, when William F. Rumpke operated a coal and junkyard business in Carthage, Ohio, which later morphed into a hog farm. William, with the help from his brother Bernard collected garbage from business owners to feed their large hog stock. As the years passed, William and Bernard converted their hog farm into a trash collection business and created the company's first landfill. Today, the company is managed by William Rumpke's grandson, William Rumpke Jr., along with other family members, an outside board of directors and a corporate team of managers.

Over the years, Rumpke has increased its service area to become the third largest, privately-owned waste hauler and one of the largest waste hauler in the nation, serving hundreds of thousands of residential, commercial and industrial customers throughout the United States.

Rumpke continues to grow through acquisitions, organic opportunities and investments in technology. Today, the company owns or operates 11 landfills, 15 transfer stations and 9 recycling centers serving customers throughout Ohio, Kentucky, Indiana and West Virginia.

With a fleet of more than 1,400 hauling vehicles (1,800 total vehicles) and a workforce of approximately 2,700 employees, Rumpke is a leader in solid waste solutions. After more than 85 years, Rumpke remains a strong player in the industry, serving more than 1.4 million residential and commercial customers, and more than 370 municipal contracts daily.

One of Rumpke's other divisions, The William-Thomas Group, also services national accounts using a nationwide network of nearly 5,000 waste haulers.

Rumpke's first landfill is one of the largest Sub-Title D landfills in the United States, accepting up to 10,000 tons of trash daily. The landfill is located in Colerain Township (near Cincinnati), and serves as the company's corporate headquarters. Rumpke owns or operates the following landfills:

- Bartholomew County Landfill (Columbus, Indiana)
- Beech Hollow Landfill (Wellston, Ohio)
- Bond Road Landfill (West Harrison, Ohio)
- Boyd County Sanitary Landfill (Ashland, Kentucky)
- Brown County Landfill (Georgetown, Ohio)
- Jackson County Landfill (Medora, Indiana)
- Lake County Landfill (Painesville, Ohio - effective July 1, 2017)
- Montgomery County Landfill (Mt. Sterling, Kentucky)
- New Baltimore Landfill (New Baltimore, Ohio)
- Noble Road Landfill (Shiloh, Ohio)
- Pendleton County Landfill (Butler, Kentucky)
- Pike Sanitation Landfill (Waverly, Ohio)
- Rumpke Sanitary Landfill (Colerain Township, Ohio, near Cincinnati)

Waste & Recycling Services

STATEMENT OF QUALIFICATIONS

Commitment to Sustainability

Rumpke continually works with businesses, industries, residents, communities and municipalities to start and sustain successful recycling programs. Rumpke's first recycling location was established in 1941 in Southwestern Ohio. The operation was primitive compared to today's recycling technologies, and consisted mostly of manual sorting.

In 1989, Rumpke purchased a recycling operation in Pickaway County, Ohio. This purchase—which marked the start of Rumpke's official recycling division—was followed by a second site in Cincinnati in 1991. Dual-stream facilities opened in Columbus and Dayton, Ohio, Louisville and Ashland, Kentucky, and Indianapolis, Indiana, throughout the 1990s. The facilities met a critical demand for communities seeking to divert material from landfills.

As the recycling industry grew, Rumpke remained at the forefront and continued investing in the latest technologies. Today, Rumpke provides the regional framework necessary to serve residential, commercial and industrial customers.

Rumpke owns and operates three of the most advanced recycling facilities in the nation, including a facility in Columbus, Ohio, a newly renovated glass processing site in Dayton, Ohio, and a \$32 million facility in Cincinnati, Ohio, capable of sorting more than 100,000 pounds of recyclables per hour. These newly updated and advanced facilities make Rumpke a regional recycling leader.

Via positive negotiations, Rumpke has secured long-term marketing agreements with manufacturers that purchase recyclables for use as raw materials and therefore has ensured the best recycling opportunities for its customers.

Rumpke offers complete environmental solutions including much more than earth-friendly disposal and recycling services. Rumpke services also include composting, construction recycling and e-waste and universal waste hauling options for recycling.

Rumpke is even making a difference at its landfills. At Rumpke Sanitary Landfill, near Cincinnati, the company recovers landfill gas and converts it into natural gas energy for up to 25,000 homes. The operation is the largest landfill gas to direct pipeline energy system in the world, and it's been in operation since 1986.

Rumpke also works to make sustainability common practice throughout company operations by educating employees and implementing practices to conserve water, construction materials and fuel. Today, Rumpke recycles 2.5 million tires annually, using them as drainage layers or separation barriers for landfills. In 2011, the firm opened slow fueling compressed natural gas filling stations and began a pilot program to run garbage trucks on green energy. Today, Rumpke's compressed natural gas fleet has grown to 180 plus vehicles.

Rumpke is also a leader in transparency, community outreach and education. More than 10,000 visitors tour Rumpke sites each year to learn more about proper waste and recycling practices and environmental protection. The firm offers presentations and hosts open houses to teach the public about the components of a complete environmental solution.

Waste & Recycling Services

STATEMENT OF QUALIFICATIONS

Compliance

Rumpke's Engineering and Environmental Affairs Division oversees landfill regulatory compliance, environmental monitoring, planning and design, and construction management. Rumpke's engineers, environmental scientists and technicians work with consultants to meet or exceed all compliance standards set forth by local, state and federal regulators.

Staying Safe

Safety is a top priority at Rumpke. Rumpke and its divisions employ a Corporate Safety Department with members working throughout Rumpke's service regions. The safety team consists of Department of Transportation (DOT), Occupational Safety and Health Administration (OSHA) and Loss Control departments, as well as site safety supervisors. Beyond conducting compliance and safety audits, the team presents continuing education opportunities for all Rumpke employees.

Monthly "tool box talks" highlight seasonal safety issues, and throughout the year specialized courses are developed and implemented. Techniques are learned, practiced, observed and evaluated for continuous improvement.

Rumpke divisions strive to comply with all OSHA, DOT, EPA and other regulatory agencies. Each manager and supervisor is required to attend the OSHA 30-hour voluntary outreach program. Employees attend new hire, annual and in-service safety and health training for the tasks they are assigned to perform.

Safety is a primary component of the Rumpke culture internally as well as externally. The National Waste and Recycling Association recently partnered with the National Institute for Occupational Safety and Health (NIOSH) and the U.S. Department of Health and Human Services (HHS), to develop driver safety communications based on Rumpke's public awareness campaign, "Slow Down To Get Around."

Rumpke initiated the "Slow Down" campaign in 2004, following two accidents in one week in which waste collection drivers were struck by passing motorists. The team developed public service announcements, truck decals and other promotional materials. To date, more than 300 municipalities and firms world-wide have adopted the campaign including Cincinnati, New York and many others.

Strong Foundation Provides Best Service and Best Practice

The Rumpke family's involvement, a well-trained and qualified staff, and the best technology available combine to ensure a wonderful experience for customers. Rumpke's commitment to providing the best service available at a fair price is an advantage that encourages customers such as Kroger Retail, Distribution & Manufacturing, Procter & Gamble, Duke Energy Corp., Columbus Blue Jackets, Cincinnati Reds, Yum Brands, U.S. Postal Service and Home City Ice to count on Rumpke to manage all their waste and recycling needs.

RUMPKE'S SOUTHERN OHIO LOCATIONS

Background: Rumpke operates four facilities in Southern Ohio, including:

- Beech Hollow Landfill in Wellston, Ohio
- Boyd County Sanitary Landfill in Ashland, Kentucky
- Pike County Landfill in Waverly, Ohio
- Chillicothe buy back and transfer station
- Hauling and transfer locations in Chillicothe and Ironton, Ohio (Ohio Valley District)
- Maintenance facility
- Administrative offices

Equipment: About 150 trucks, including roll off, front load and rear load for both waste and recycling collection.

Employment: About 200 employees including drivers, equipment operators, mechanics, general laborers, commercial and municipal sales representatives, managers and administrative personnel.

Service Offerings: Rumpke's Southern Ohio operations offers comprehensive waste removal, disposal and recycling options to residential, commercial and industrial customers.

Services include municipal solid waste removal and disposal, roll off containers, commercial containers, a full line of compactors and residential and commercial recycling collection where available.

Service Territory: Rumpke's Southern Ohio operations provides service to communities and businesses in the following counties in Ohio, Kentucky and West Virginia:

- | | |
|--------------|-----------|
| • Athens | • Gallia |
| • Hocking | • Jackson |
| • Lawrence | • Meigs |
| • Pike | • Ross |
| • Scioto | • Vinton |
| • Washington | • Greenup |
| • Boyd | • Lewis |
| • Lawrence | • Mason |
| • Cabell | |
| • Wayne | |

Municipal Contracts: Rumpke's Beech Hollow District provides contracted residential waste removal services, and drop-off box recycling programs for 17 municipalities and solid waste districts within its service footprint.

Key Personnel: Key management personnel for Rumpke of Northern Ohio include the following:

- Andrew Rumpke, Area President
- Brian Waters, Region Vice President
- Jeff Legg, Regional Sales Manager
- Steve Sargent, Director of Recycling
- Nick Rupert, Municipal/Public Sector Representative
- Bruce Downard, Landfill Manager
- Mark Ramey, Operations Manager

Waste & Recycling Services

Holiday Schedule

Holidays that may affect your Rumpke service day:

- New Year's Day
- Memorial Day
- Independence Day
- Labor Day
- Thanksgiving Day
- Christmas Day

If the date of the actual holiday is the day-of or a weekday before your service day:
Service will be delayed 1 day that week.

If the date of the actual holiday is on a weekday after your service day or on Saturday or Sunday:
Service will occur as scheduled.

Visit www.rumpke.com for a complete holiday schedule.

CONTINUATION CERTIFICATE

The Ohio Indemnity Company, as Surety on bond number 301585 in the amount of Forty Thousand and 00/100 Dollars (\$40,000.00), on behalf of Rumpke of Ohio, Inc., the Principal, in favor of the University of Cincinnati, the Obligee, hereby continues the term of said bond in the amount of Forty Thousand and 00/100 Dollars (\$40,000.00), for the period beginning the 1st day of July 2018, and ending the 30th day of June 30, 2019, subject to all covenants and conditions as set forth and expressed in said bond.

This Continuation Certificate is executed upon the express condition that the Company's liability under said bond and this and all Continuation Certificates issued in connection therewith shall not be cumulative and shall not in any event exceed the sum of the said bond in force at the time of default.

Signed and sealed this 27th day of June, 2018.

Landfill Waste Restriction Reminder

Thank you for choosing Rumpke Waste & Recycling. We are pleased to be your service provider. Since our early beginnings, more than 80 years ago, our mission has not only been to provide the best hauling, waste and recycling services possible, but also to do so with safety, environmental protection and compliance in mind.

To reach this objective we are constantly cooperating with local, state and federal regulators to adhere to any adjustments to laws and regulations and to educate our clients to assure their compliance as well.

As a useful reminder, we have included below a complete list of landfill restrictions and waste generator responsibilities. Please review them once again and keep them in mind. As always, you may call us with specific questions. Rumpke is glad to assist with all of your waste solution needs.

Rumpke Landfill Waste Restrictions

Applicable Federal, State and Local laws require that you (the waste generator) dispose of your waste materials appropriately, and you will remain responsible for these materials if they are not disposed of properly. Municipal Solid Waste Landfills, such as Rumpke's are not permitted to accept and dispose of certain types of materials, including hazardous wastes.

None of the following materials may be sent to Rumpke for disposal:

- Hazardous wastes
- Liquids (may be solidified, but require prior approval)
- Corrosive, flammable, reactive, explosive, toxic, or otherwise hazardous materials
- Lead acid batteries
- Whole tires
- Medical/infectious/biohazard waste
- Any listed wastes in Title 40 Code of Federal Regulations part 261
- PCB waste 50 ppm or above
- Appliances containing refrigerant
- Pesticides, herbicides, and fertilizers
- Radioactive waste
- Fluorescent lamps and ballasts

Other types of materials may or may not be appropriate for disposal in a Municipal Solid Waste Landfill, depending on their specific characteristics. The following material types require prior approval by Rumpke.

- Manufacturing/process waste—sludge, sand, dust, filters, shot blast, various paint wastes
- Rags, absorbent, and other materials impacted with paint, cleaners, or chemicals
- Spill cleanup materials
- Obsolete chemicals/products
- Dirt/soil and contaminated dirt/soil
- Batteries
- Electronics including computers and monitors
- Solidified liquids
- Empty containers including drums, tanks, 5-gallon pails, aerosol cans
- PCB waste lower than 50 ppm
- Asbestos
- Appliances with refrigerant removed

Solid Waste Facility License Municipal Solid Waste Landfill

License Expires December 31, 2019

Facility: Rumpke Waste Inc Beech Hollow Landfill
CID: 54230
28 A W Long Rd
Wellston, OH 45692

Licensee: Rumpke Waste, Inc.
10795 Hughes Road
Cincinnati, OH 45251

This license has been issued in accordance with the requirements of state law, is subject to revocation or suspension for cause, and is not transferable without the consent of the approved Board of Health and the Director of the Ohio Environmental Protection Agency.

Licensing Authority: Jackson County Health Department

Conditions of Licensure:

The Licensee hereunder, its agents, employees, and all others in active concert with said licensee, including the facility owner and operator, shall be subject to and shall comply with the following conditions of this license:

1. All applicable requirements of Ohio Revised Code Chapters 3734, 3767, 6111, and 3704 and rules adopted thereunder.
2. Permits-to-install, plans, operational reports, other authorizing documents, and administrative and judicial orders applicable to this facility and as approved by the Director of the Ohio Environmental Protection Agency.
3. This license is conditional upon payment of the applicable fee to the Board of Health or the Director, as appropriate, within 30 days after issuance.
4. By applying for and accepting this license, the licensee specifically consents in advance and agrees to allow the Director, the Health District, or an authorized representative, to enter upon the licensee's premises at any reasonable time during the construction and/or operation of the facility for the purpose of inspecting, conducting tests, collecting samples, or examining records or reports pertaining to construction, modification, installation, or operation of the facility. The licensee hereby acknowledges and agrees that any and all rights of access granted herein shall not be deemed to be unreasonable or unlawful under Ohio Revised Code Sec. 3734.07. The licensee, its agents, employees, and all others in active concert with said licensee shall maintain and operate the facility to which the license pertains in a sanitary manner so as not to create a nuisance, cause or contribute to water pollution, or create a health hazard. This license shall not be construed to constitute a defense to any civil or criminal action brought by the State of Ohio or any duly authorized representative thereof to enforce the provisions of Chapters 3734, 3767, 6111, or 3704 of the Ohio Revised Code, or regulations issued thereunder. Issuance of this license does not relieve the licensee of the duty to comply with all applicable federal, state, and local laws, regulations and ordinances.
