Executive Summary

Athens-Hocking Recycling Centers, Inc. (AHRC), being the service provider for the City of Athens and the greater City of Athens community for over 30 years, is very familiar with the city in terms of service area, pickup locations, details of each location and special instructions. As our service shows, we are dedicated to meeting and exceeding the expectations of the contract between AHRC and the City of Athens. AHRC is a 501c3, with a mission that includes assisting our community in reducing waste, thereby creating a more sustainable community. Along with the city and the university, the Athens-Hocking Recycling Center participated in the creation of the Athens Hocking Zero Waste Action Plan, and shares the plan's goals to reduce waste and increase resource recovery in a way that benefits the environment, the people, and the local economy.

The recycling center processed over 6,000 tons of material in 2018, with a significant portion collected from the City of Athens. Continuing to service the City of Athens and the greater community directly benefits the community by providing jobs for Athens and Hocking county residents (and beyond), and a fast, reliable, and flexible service.

When the AHRC Materials Recovery Facility (MRF) came online in 2016, it was significant achievement and investment for our organization and the region. This MRF was called for in the Athens Hocking Solid Waste District plan to help increase the diversion rate for our district. Single stream has made recycling easier for the City of Athens, Ohio University, and the general public. AHRC has had a significant impact on the increase in diversion rate for the local solid waste district over the years. Diversion has increased from 8.8% in 2008 to 24.73% in 2017. Not only has single stream recycling provided by AHRC increased participation, AHRC has also increased access across Athens and Hocking Counties with household collection and increased availability and locations for drop-off opportunities.

AHRC strives to increase waste diversion, serve our customers, and provide jobs for the local community. In the process, we improve our local and global environment and help our community become more sustainable. AHRC currently employs 37 residents of Athens, Hocking, and surrounding counties.

Mission Statement

Athens-Hocking Recycling Centers, Inc. creates jobs and economic opportunity locally, while reducing waste, improving the economy, conserving energy and resources, and protecting public health and the environment. Recycling offers every citizen multiple opportunities, everyday, to make their world a cleaner, safer, and more beautiful place to live.

Introduction

The Athens Hocking Recycling Centers, Inc. is a solid waste and recycling service provider in Athens and Hocking Counties. AHRC bids on and competes for contracts with local and state governmental entities. Additionally, AHRC has commercial and residential customer accounts throughout the solid waste district. AHRC provides food waste collection and processing as an added service, further diverting materials from the landfill. AHRC also has an electronics drop off location in partnership with Rural Action (see attachment H) that serves Athens and surrounding communities.

Curbside recycling collection in the City of Athens started in 1984, born out of a grassroots community effort, and bolstered by the Athens City-County Health Department. In 1987 the Athens Recycling Center was established as a non-profit to act in partnership with the Athens City-County Health Department. In 1988, Ohio's solid waste laws were updated in HB 592 and solid waste districts were created. Districts must have approximately 100,000 residents. Athens has approximately 65,000 residents and Hocking County has about 35,000 to make a complete district. AHRC provides recycling access to residents in both counties via the contract with the Athens Hocking Solid Waste District (AHSWD).

AHRC has provided the City of Athens and Ohio University with recycling and refuse services for over 35 years and understands the dynamics of collection of these materials across a varied municipal and university landscape. From building demolition and construction to special events and education, AHRC can provide quality and timely service to the city. AHRC wants to continue to explore other collaborative efforts to bolster recycling in the city such as competitions between streets, neighborhoods and businesses. As an example, in the fall of 2018, AHRC working with city official and management at The Summit at Coates Run, piloted a recycling project for bringing greater access to large multi-unit apartment complexes. We would also like to assist in additional ways to achieve a greater recovery of reusables from Move-Out, other special events, and continue to tackle recycling access in large multi-unit apartment complexes. The more materials that can be recovered, the more that can be put back into the economy through reuse, processing, distribution, and use in new products which turns liabilities into assets.

The long-term relationship that has existed between AHRC and City of Athens has enabled the diversion of many thousands of tons from the landfill, which has buffered the City of Athens from collection industry consolidation in the past. Recycling was set up to give another opportunity to residents to actively engage in solid waste management reforms that have a positive impact on the economy and environment rather than just sending all material to the landfill and not having any positive impact on multitude of issues. Since the beginning of recycling collection in the city, AHRC has played a major role. The influx of out of state waste coming into the regional landfill greatly increased the filling up of the permitted and engineered facility and increased disposal costs for everyone. Recycling helps to reduce the overall landfill costs. Over the years, AHRC has facilitated reduction of overall costs of solid waste and acted as a buffer against cost increases, industry consolidation, and the subsequent decrease in competition.

The update to the new facility helped AHRC's customers divert more materials and provide better metrics on how much was landfilled and recycled is yet another way AHRC helped the push towards zero waste. Detailed in the remainder of this document is how AHRC can provide recycling and refuse services to the City of Athens. Services and customer service will be built upon the past experience of providing recycling and refuse collection and management for the City of Athens, the Ohio University Campus and the unique local community consisting of a high percentage of rental units and challenging geography.

Community

AHRC is committed to our service area, which includes; Athens County, Hocking County, and the surrounding communities throughout both counties. AHRC is a 501(c)(3) non-profit organization that is mission driven to promote recycling in our communities. With 37 employees from Athens, Hocking, and surrounding counties, AHRC creates jobs while reducing waste. Recycling, as compared to material going to the landfill, can create up to 10 or more jobs. If awarded the contract for the City of Athens Municipal Refuse and Recycling Collection, AHRC will retain all 37 employees. AHRC employees are part of the AFSCME Union Local 3050, which helps ensure the jobs pay competitive wages, provide good health insurance, retirement, and other benefits (see attachment I).

AHRC is committed to supporting local businesses for purchasing and services when at all possible, increasing the local multiplier effect in the area. Some of the local businesses we currently utilize for goods or services are ACME, Bedrock Rental, BFS

Petroleum, Buckley Bros, C&E Hardware, Diamond Stone, Don Wood Automotive, Edwards Heating and Cooling, Holzer Clinic, Hocking Valley Bank, Intelliwave, Kal Electric, Lance's Trailer Sales, Logan Welding, Mac's Thrifty Store, Minuteman Press, Muffler Man, OU Credit Union, Performance Signs, Quickloadz Containers, Ralph's Garage, Real World Cleaning, Reed & Baur, Warehouse Tire, and RVC Architects. AHRC supports local businesses through patronage of products and services in the local community, including but not limited to; truck and dumpster maintenance, fuel, and printing and office supplies. AHRC is a member of the Nelsonville, Hocking Hills, and Athens Area Chambers of Commerce. AHRC is committed to zero waste goals and considers solid waste management as resource management. We look at the components of waste as feed stocks that can be put back into our economy in a multitude of ways.

AHRC has expanded by adding curbside recycling and refuse service to thousands of residents in rural areas, in both counties of the solid waste district. AHRC remains committed to bringing recycling to residents who have previously lacked good access to recycling collection.

AHRC serves as the service provider for public recycling drop-off locations across Athens and Hocking Counties, in conjunction with the Athens Hocking Solid Waste District. See <http://www.athenshockingrecycle.org/rural-drop-off-.html> for locations. From these locations, over 3.2 million pounds of recycling were collected in 2018 alone.

Since the construction of the materials recovery facility (MRF) and improvement of the existing building purchased by AHRC at the Thiesen Industrial Park AHRC has further supported the 25% diversion goals of the Ohio Environmental Protection Agency and the Athens Hocking Solid Waste District. The diversion rate was 24.73% in 2017, and will likely be surpassing the state goal for reference year 2018. Reaching the state goal of 25% represents a significant increase since less than a decade ago the diversion rate was less than 9%.

Since AHRC takes waste material to the landfill within the Athens-Hocking Solid Waste District (AHSWD), more fees from solid waste stay in the district. The AHSWD is funded from tiered fees from solid waste however, more funding is generated from waste from the district when it is hauled to a landfill within the district, thereby keeping the funding in place for recycling education, recycling collection programs, etc., for the district (Athens and Hocking Counties). All public recycling drop-off locations set up by AHSWD are funded this way (ORC 3734.57).

In addition to direct collection of recyclable materials, AHRC accepts and processes recyclable materials from other haulers including Wood County Waste, A1 Sanitation, Farmer's Refuse, and others for processing at AHRC's facility. We also

provide for volunteer and community service work by partnering with organizations such as Athens County Diversion Program, Sechkar, SEPTA, etc.

Sustainability

One of the easiest steps a citizen or business can take in the name of sustainability is to recycle as much as possible from their residence or office. From food waste to plastic bottles, AHRC has made this process simpler and more efficient. The move to single stream has in great part facilitated this. Single stream utilizes fewer trucks and fewer miles driven, further reducing the carbon footprint of our pickup services. AHRC not only collects material for the City of Athens, Ohio University and commercial stops throughout, making overall collections very efficient. On an average, AHRC trucks travel approximately 57 miles per day each to collect and transport the material (includes miles traveled in city for collections, and transportation to MRF or landfill).

AHRC's facility has a solar panel installation that is net-metered. The system consists of (120) 230 watt modules on the roof, a 27.6 kW single phase system, designed to produce approximately 38,280 kWh/yr annually, which also helps to reduce our overall carbon footprint.

AHRC Accomplishments

- Curbside collection in City of Athens since the 1980s.
- Current service area across Athens and Hocking Counties
- Rural curbside recycling and trash collection since October 2014.
- Expansive list of recyclable materials accepted for processing.
- Community oriented; supports local partners and businesses.
- Continually exploring additional ways to help get local area closer to zero waste.
- Partnership/Role in RecycleMania since 2001
- Facilitates the timely, organized, and efficient services provided during move-out/in times while maximizing recovery of materials (especially cardboard).

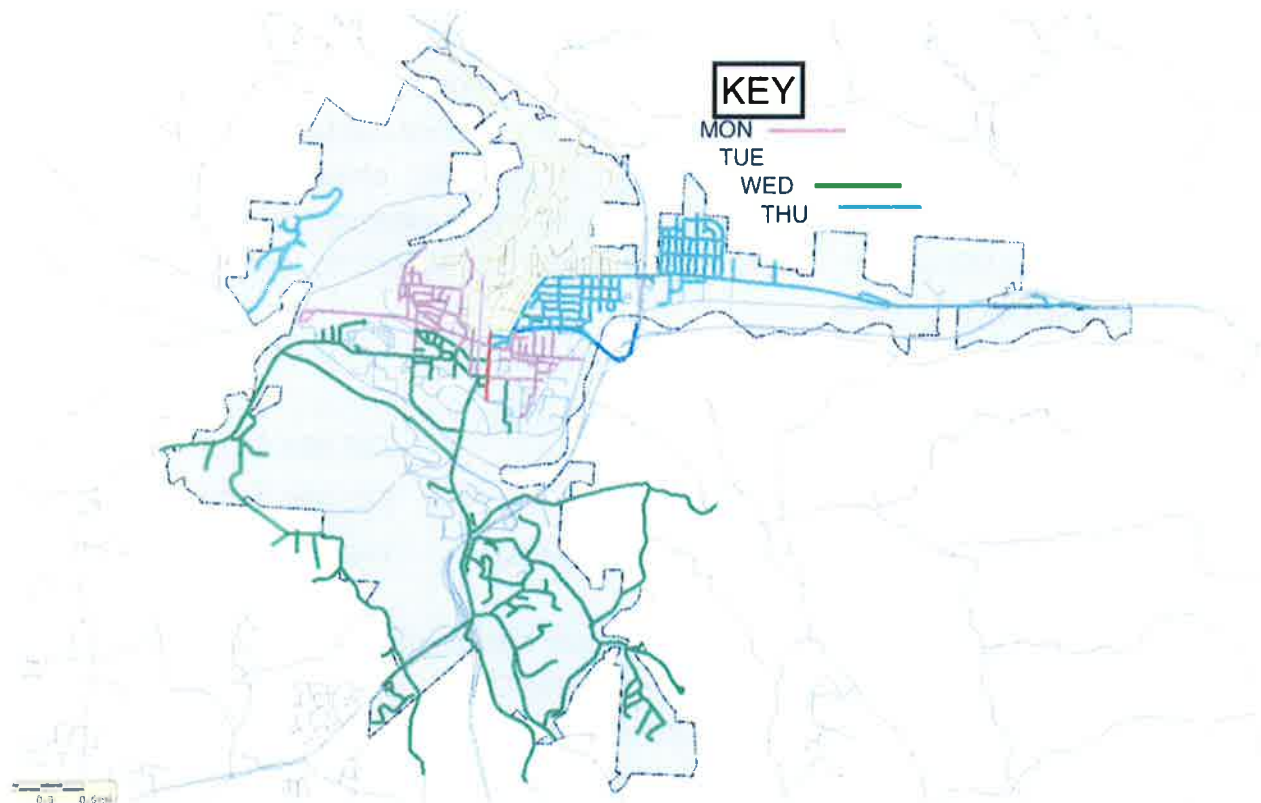

Service Category A - Residential Refuse Removal

1. AHRC fully understands the needs of residential refuse removal in the City of Athens, and is cognizant of the potential for disruptive noise, therefore AHRC's normal operations for residential refuse collection is 7:00 am to 5:00 pm, Monday through Thursday, with collections normally completed by 1:30 pm. AHRC has immediately altered past route schedules so as to not conflict with special events, school bus pickup and drop-off, or other instances where service trucks could cause disruptions. We will continue to work promptly if and when issues arise.

NOTE: Collection begins at 7:00 am.

1.1. All non-recyclable solid waste collected will be hauled to the Athens Hocking Reclamation Center (<https://kilbarger.com/athens-hocking-rec>) in Nelsonville, Ohio.

1.2. All residential refuse will be collected from customer provided bins/carts according to their service level with the exception of those particular addresses needing dumpster service with AHRC providing the dumpsters.

2. The service area for the city of Athens is outlined in the map above (Map 1.), with the color corresponding the day of residential collection. Note: Map 1 is a broad overview, please refer to Attachment B for detailed street schedule listings.

3. AHRC has serviced these neighborhoods for many years and is very familiar with the existing routes (and will keep these as is, on a four day per week collection schedule). AHRC holds that keeping to a four day per week collection schedule is the most efficient collection method and fits well when there are weeks with holidays (see attachment N) thereby preventing the need for residential collection on the weekend days. Please refer to attachment B for detailed refuse and recycling collection schedule by street. AHRC trucks have GPS units on them that allow real-time tracking (as well as historical data) which provides additional layer of information to help determine the best and most efficient truck routing in the residential areas.

4. Customer service is a high priority of AHRC. With quick turnaround times, fast and effective communication between the local office, city officials, and directly with customers in the city, AHRC corrects issues in a timely and satisfactory manner.

4.1. Weekday High Priority - AHRC has a quick response time to special instances. If information is conveyed by city officials before 2:00 p.m., response can be the same day (business days Monday through Friday). If issues are communicated between 2:00 pm and 5:00 pm, service will be provide next day. Depending on situation; extra service can be provided, extra containers can be set, maintenance of equipment can occur, or onsite cleanup can be provided. As past service has shown, AHRC can act quickly to respond to special instances or emergency situations.

Contacts:

Main Office	740.594.5312
Mark Call, Operations Supervisor	740.590.3320 (mobile)
Justin Turley, Asst. Operations Supervisor	740.856.2511 (mobile)

4.2. AHRC has and will continue to track special hauls on a daily basis and transmit that data electronically to the Utilities Billing office. In the past residential refuse data per household was collected on a city provided electronic device. AHRC recently worked with the city (via trial basis) to update data

collection and has put in place AHRC provided wireless tablet that collects the data in realtime, improving accuracy and reliability.

5. AHRC supports the use of a Pay-as-You-Throw (PAYT) system for refuse because it incentivizes greater recycling. AHRC can provide cost recommendations for the current levels (RB Rate Codes) and has based the total price for residential refuse upon those cost levels. AHRC cost recommendations are based on the true cost of collection and on the amount of refuse being disposed of on a weekly basis. Please see attachment A for total cost of residential refuse collection.

Service Category B - Residential Single-Stream Recycling

1. Processing of all recyclable materials collected from the City of Athens will be processed at AHRC's MRF at 5991 Industrial Dr, Athens Ohio 45701 (7.6 miles from the City of Athens)

1.1. Items accepted for single stream recycling include;

- Corrugated cardboard and paperboard
- Aluminum food and beverage containers
- Tin, steel, aluminum food containers, clean aluminum foil & baking pans
- Glass Food and Beverage Containers (food grade, all colors)
- Newspaper
- Mixed paper
- Magazines and catalogs
- Rigid plastics #1 through #7 (bottle and non-bottle shaped containers, etc)
- Exclusions include, but not limited to; Styrofoam (extruded polystyrene), flexible plastic packaging (film type plastic).

2. AHRCs MRF is designed to accept single stream recycling collected in designated containers or dumpsters without recyclables being contained in plastic bags. Bagged recycling contributes additional labor cost, machine maintenance, and disposal cost (of residuals). Recycling placed in opaque bags will automatically be sent to the landfill due to safety concerns. If recycling is bagged, it prevents the onsite inspection of material in single stream containers.

3. Possible contaminants in single stream recycling including but not limited to; refuse, compostable plastics, e-waste, yard waste, and food waste. Compostable plastics will be sorted out of the #1 through #7 plastics at AHRC on the sorting line to the greatest extent possible and will be landfilled so as to not contaminate the petroleum based plastics material. Single stream contaminants, if possible to capture, will be processed according to the materials list AHRC collects at our facility. Waste, as a recycling contaminant, will be separated at AHRC's facility and subsequently transported to the landfill. AHRC makes all attempts possible, within the confines of operational capacity to remove contaminants (non-recyclable materials). Materials that are recyclable (but not accepted in single stream collection) will be aggregated and recycled, which includes; ferrous and non-ferrous scrap metal, electronic waste, books.

3.1. Gable top cartons and aseptic packaging are low volume items. They are considered contaminants at many fiber recycling facilities, and are generally very difficult to recycle and thus will not be considered recyclable at the AHRC MRF through single stream collection.

3.2. Moisture as a contaminant to recyclable material is an ever present challenge. The AHRC facility alleviates much of this problem with a covered tipping-floor for cardboard and single stream recycling. The use of lids on single stream dumpsters and the city provided 65 gallon recycling receptacles also reduces moisture as a fiber contaminant.

4. The AHRC MRF recovery rate is calculated on a monthly basis and then averaged for the calendar year. In 2018 the recovery rate for the AHRC MRF was 91.03%. Supporting information on the recovery rate is available upon request. AHRC works to communicate clearly to the public what is recyclable and takes great efforts to manually remove contaminants that are recyclable to achieve the highest possible recovery rate.

5. Through processing of single stream recycling from City of Athens, contaminants and residuals will be removed and appropriately disposed of or recycled through other means. No material above the predetermined residual rate will be sent to the landfill as per terms of City of Athens - AHRC Recycling and Refuse Contract. AHRC is first and foremost a recycling facility with a goal of capturing as much valuable recyclable materials as possible.

6. AHRC will collect all recycling from all sites across City of Athens residential areas to be processed later at AHRC's facilities. AHRC employees will not sort or remove bags from recycling containers. AHRC will continue the

use of 'OOPS' cards to communicate why recycling was not collected due to contamination and will continue to work closely with Code Enforcement officers to rectify issues with individual residences and businesses.

7. See report of scale weights from the City of Athens (attachment R), and MRF, OUTBOUND scale weights (attachment S), and paid invoices from Trigon Plastics & Recycle Masters (attachment T) for a sample of verification that materials intended for recycling were sent to appropriate processing locations and not co-mingled with landfill waste.

8. Please reference Map 1 above and attachment B for residential recycling collection schedule, which is the same as residential refuse collection.

Service Category C - Franchise District Refuse Removal, Recycling, & On-Street Refuse/Recycling

Franchise District Refuse Removal

1. Refuse will be collected in the Franchise District Area (attachment O) in 1 through 8 cubic yard rear-load dumpsters (where space allows) and 35, 65, or 95 gallon wheeled containers as dictated by location need (see attachment C). Rear load dumpsters allow for lower overhead clearance while in operation and accommodate low hanging utilities, landscape trees, and the unique architecture across the City of Athens. Collection in the Franchise District Area requires backing down very narrow passageways, manual labor to move containers to truck for emptying, the cost incurred for damage to buildings and other infrastructure, the regular occurrence of material overages at most locations, which are all factored in the contract pricing. AHRC has extensive experience in providing service to the Franchise District Area with its narrow alleys, and other space constraints that make collection challenging. AHRC also recognizes the need for, and can continue to provide collection seven days a week and between the hours of 4 am to 7 am. AHRC recognizes the importance of the Franchise District Area in uptown Athens to the city administration, the importance it plays in the local economy, and the unique culture that stems from the proximity to the university. AHRC aims to continue a fast, efficient, and flexible service to the City of Athens.

2. All non-recyclable solid waste will be hauled (17.5 miles) from Athens to the Athens Hocking Reclamation Center (<https://kilbarger.com/athens-hocking-rec>) in

Nelsonville, Ohio. Recyclable material picked up by AHRC will not enter the waste stream at the site of collection. Only residuals (materials that entered the recycling stream but are not recyclable and/or are contaminated) will enter the waste stream after processing by AHRC.

3. AHRC can guarantee quick responses times for any emergent issues communicated to AHRC from the city.

3.1. Weekday High Priority. If information is conveyed by city officials before 2:00 p.m., response can be the same day (business days Monday through Friday). If issues are communicated between 2:00 pm and 5:00 pm, service will be provide next day. Depending on situation; extra service can be provided, extra containers can be set, maintenance of equipment can occur, or onsite cleanup can be provided. As past service has shown, AHRC can act quickly to respond to special instances or emergency situations.

3.2. Weekend and Holiday High Priority Issues

1. If information about high priority issues are conveyed by city officials before 8 a.m. on weekends (Saturday, Sunday, and Holidays attachment N) to after hours phone numbers, these issues will be resolved the same day. Information about high priority issues that are conveyed after 8:00 am and before 5:00 pm, service will occur next day or earlier. Depending on situation; extra service can be provided, extra containers can be set, maintenance of equipment can occur, or site cleanup can be provided.

2. Contacts:

2.1. Mark Call, Operations Supervisor 740.590.3320 (mobile)

2.2. Justin Turley, Asst. Operations Supervisor 740.856.2511 (mobile)

2.3. Bruce Underwood, Executive Director 740.541.1327 (mobile)

Franchise District Recycling

1. Recycling and refuse are collected most efficiently by dumpsters. However, given the space constraints of many locations across the City of Athens, AHRC will work with the city to continue the current system of collection or modify by location on an ongoing basis as the city deems necessary and as volumes of refuse and recycling change over time. Additional containers for any type of material can be set within two to four weeks after notification. Please refer to AHRC's Cost Proposal Form (attachment A) for these rates as it applies to each of the service types. AHRC wants to remain flexible in working with the city to determine on an ongoing basis the best service levels, schedules, and types at locations across the

city to meet fluctuating needs. AHRC maintains a similar system with Ohio University, Hocking College, and the Athens-Hocking Solid Waste District on a per location basis.

2. AHRC will continue to collect cardboard via dedicated cardboard containers in areas as identified by The City of Athens and AHRC. This method of collection is still the most economical for the recovery of cardboard in high volume situations. Due to the density of the uptown area and high volume producers across the city (excluding the university), AHRC will like to continue its current collection of source separated cardboard (see attachment D) Cardboard makes up a large portion (55% by weight) of the recyclables processed at AHRC.

3. Mixed Stream Recycling collection at centralized sites (see attachment P) and non-centralized commercial and residential collection in the Franchise District Area will be collected according to the collection schedule (see attachment E) that AHRC has developed by working with the city officials, business, and residences over the years. Dumpsters and 65 gallon carts (where necessary) will be provided by AHRC.

4. Residuals will be tracked as a percentage of total single stream recycling weight and as percentage of landfill materials.

5. All recycling collected from the City of Athens will be processed at the AHRC MRF (7.6 miles from the City of Athens). which is located in the middle of our service area, thus reducing our overall carbon footprint for collection services.

6. AHRC will collect all recycling from all sites across City of Athens Franchise District Area to be processed later at AHRC's facilities. AHRC employees will not sort or remove bags from recycling containers. AHRC will continue to work closely with Code Enforcement officers to rectify issues with individual residences and businesses.

Franchise District On-Street Refuse/Recycling Collection

1. Open Top Refuse Containers (8, provided by the City of Athens) in Franchise District Area will be collected on a daily basis.

1.1. Refuse containers placed by city, but out of Franchise District area; (1) on West Washington Street near Depot St. stairs, will be collected on Wednesdays and the (1) near West End Cider house on Mon-Wed-Fri.

2. All (26) recycling and all (26) refuse BigBelly Solar-Powered Compacting containers will be collected daily with the exception of certain special events when

a secondary pickup is required. AHRC will continue to monitor the BigBelly app as necessary for overflow situations.

3. Guaranteed Response Time, see Section A, 4.1 & Section C 3.2.

Service Category D - Special Events

Ohio University Move-In

1. Collection of increased volumes of recycling (especially cardboard) and refuse.
2. Double Saturday pickups for on-street containers in the Franchise District Area.

Ohio University Move-Out

2. AHRC has provided service to the City of Athens during Move-Out for many years, working with city official and the auxiliary Move-Out efforts of area organizations to not only divert as many materials as possible from the landfill, but first and foremost provide a timely reliable service that removes all materials (double normal volumes, placed erratically) from the city streets within 1 - 12 hours.
3. AHRC facilitates Move-Out times in the following ways:
 1. Placement of roll-off containers for refuse at strategic locations.
 2. Doubling worker shift hours leading up to, through and the days following the Ohio University Move-out effort, starting at 2 am (to avoid Move-out traffic).
 3. Increase in number of trucks used and rounds made to high volume neighborhoods such as Mill Street area.
 4. AHRC provides service to Ohio University and provides a seamless experience across campus and the city of Athens during special events, especially Move-Out.
 5. Increase collections in Franchise area. AHRC understands the complexities of Move-Out and its effects across the city. See image below for an example of how much material can collect within hours at a single location during move out.

6. Increased activity following the weeks of Move-Out when many rentals are being cleaned out both in the Franchise District area and across the city.

Ohio University Homecoming

1. Double Saturday pickups for on-street containers in the Franchise District Area.
2. Handle increased recycling output in residential areas and Franchise District Are.

Halloween Block Party

1. Work with city administration for the placement of (6) additional rear-load containers at strategic locations to handle additional volumes during the Block party.

2. Double Saturday pickups for on-street containers in the Franchise District Area.

Annual Spring Clean-up

1. Provide roll-off containers for refuse and recycling at the city complex on West State.
2. Collection of unlimited extra bags of refuse from residential areas.
3. Collection of increased number of special hauls.

Sandlot Baseball/Softball

1. Provide (1) permanent 20 cubic yard roll-off for use at the ball fields and will be emptied as needed pricing is included in the work for Section 'Additional Service' below.
2. Recycling and Refuse Rear-load containers are serviced year round are placed for public use at the Sandlot. Refer to pricing in Section D of the Cost Proposal Form (attachment A).

Service Category E - Safety and Cleanliness

1. AHRC maintains a safe environment for employees and the public that interacts with pick-up service. AHRC vehicles and equipment are inspected daily by crews, with any issues being dealt with immediately. All packer trucks are inspected annually by a third party to ensure compliance with the State of Ohio. AHRC employees are given truck, forklift, recycling equipment, and public safety meetings monthly. If a safety issue arises at any point during a workday, AHRC management resolves these issues immediately. Providing service with large trucks to a busy uptown area and narrow residential streets dictates the need for extra caution, of which AHRC's employees are fully acclimated. AHRCs past performance showcases our ability to perform the services for the City of Athens. Safety and Cleanliness costs are included in the individual service costs i.e. Residential Refuse/Recycling, Franchise District Area Refuse/Recycling, etc. Any additional costs outside of normal operations and services requested by the City of Athens are detailed in 'Additional Services'.

1. AHRC recognizes the importance of the appearance and cleanliness of the uptown Franchise District Area and is equipped to continue providing the extra service the city requires. All solid waste locations in the franchise district area will be maintained with a 10' with overflow and litter cleaned up on an ongoing basis. Each collection truck is equipped with a shovel and broom for proper cleanup. AHRC will provide on site supervision on a regular daily schedule for the purposes of determining placement of trash, cleanup of any spills created by the collection process, reporting to Code office any nuisances or suspected nuisances that have been created by someone other than AHRC. AHRC staff will clean up any spoilage created by the collection process and maintain a 10' perimeter free from debris and litter on a daily basis when collection of each individual location occurs.
2. All AHRC compactor trucks have backup cameras installed. In addition to the back up cameras, crews use a spotter whenever possible to prevent accidents and property damage. This is crucial as many of the areas across the city require backing into narrow and restricted lanes, on street parking, and with many pedestrians present.
3. AHRC trains all staff to clean up debris that is created during pickups. AHRC also encourages communication between code, city officials, and residents to alert us to any issues that develop due to collection so that we can resolve those in a timely manner.
4. AHRC regularly empties, cleans, and repairs trucks, dumpsters, and other equipment to ensure they are free from foul odors.
5. See attachment F for proof of Vehicle and General Liability Insurance and attachment G for a list of all vehicles and equipment.

Service Category F - Residential Special Haul Service

1. Residences can set out large/bulky items on their normal collection day, to be set at the curb (where normal refuse is placed) for a base fee (for up to four cubic yards) plus a per cubic yard fee for each additional cubic yard (see attachment A). Special Haul Service excludes yard waste, hazardous waste, and construction/demolition wastes such as, but not limited to; lumber, shingles, masonry. Construction/demolition wastes will require a roll-off container (to be setup directly through AHRC by resident).
2. Guaranteed Response Time, see Section A, #5.

Service Category G - Extra Cans/Bags

1. Residents can set out extra containers (35 gallon bags or cans) of normal household refuse above their current service level, for an additional fee, to be set out at the curb and collected on their normal collection day. (see attachment A).

Service Category H - Municipal Facility Refuse/ Recycling Collection

1. AHRC will collect refuse and recycling from all City of Athens municipal facilities. See collection schedule for detailed collection information (attachments C, E).

1.1. City Hall & Law Admin Building are in the Franchise District Area, and are therefore accounted for in Section C - 1 & 2.

1.2. Locations outside of the Franchise District Area include the following;

1.2.1. Athens Parking Garage

1.2.2. Bus Garage

1.2.3. Community Center

1.2.4. Fire Station Headquarters

1.2.5. Fire Station 2

1.2.6. Office of Code Enforcement

1.2.7. Service Garage

1.2.8. Wastewater Treatment Plant

1.2.9. Water Treatment Plant

1.2.10. Vehicle Storage Building

1.3. All additional pickups outside of the normal, mutually agreed upon collection schedule, will incur additional costs.

2. Guaranteed Response Time, see Section A, 4.1.

Service Category I - Billing

Billing Process (reference attachment J)

1. The current system of billing for the City of Athens is an agreed upon base cost per month, and is paid to AHRC on a monthly basis derived from total year amount (per current contract terms). AHRC will continue to provide monthly billing invoices, sub-invoiced by site type (residential, special franchise area, special events, Municipal projects, etc). Data from residential refuse collection, i.e. special hauls and extra bags, are reference on this invoicing, with individual files per occurrence per address for special hauls. See attachment J & K for detailed bill procedure and sample invoice.

2. AHRC's billing of services provided to the City of Athens will reflect ongoing changes in dumpster size, quantity, and haul schedules as communicated by city officials on a monthly basis. Any changes in one particular month will be reflected on the next month's invoice.

3. AHRC will continue to utilize the city billing database (Authority) to create up to date route lists for the drivers on a daily basis with the number of bags that each stop is currently paying for to assist in the accurate billing of extra bags.

4. Billing for residences of extra bags and special hauls are calculated daily based off driver/crew response on a wireless device. Extra bags are sent as a separate report to Utilities Billing with; account number, address, and indication of tagged vs. untagged (see attachment L). Specials hauls are calculated in an individual spreadsheet which then are sent on a daily basis to Utilities Billing (see attachment M).

1. During Move-Out, in order to get special haul information to landlords and tenants in a timely manner, AHRC devotes one staff person full-time for 2 weeks for reporting batches of special hauls and extra bag information to Utilities Billing as soon as possible.

5. AHRC works closely with Utilities Billing to resolve billing disputes that may arise.

6. AHRC billing system is flexible and can show other pertinent information the city deems necessary.

7. Invoices are sent on the first of the month and due at the end of the month.

8. AHRC is supportive of the current billing system developed with the City of Athens to help meet the cities sustainability goals by encouraging residents to reduce refuse and encourage donating and recycling reusable items to avoid additional charges for trash collection.

9. AHRC can assist the city with cost-benefit analyses to examine materials flows, collection frequency, and location specifics upon request, to help establish best practices, identify problem areas, increase diversion, and manage costs within Residential Refuse/Recycling, Franchise District Area Refuse/Recycling, and Municipal Refuse/Recycling.

Service Category J - Other Potential Services

Curbside Compost (1000 users)

1. AHRC is currently offering compost collection in the City of Athens to 300 households as part of a pilot program proposed by Rural Action in partnership with the city and AHRC. Residents who have signed up to be part of the pilot program were given a 5 gallon bucket and place the bucket curbside on their trash/recycling day by 7am for weekly pick up. AHRC collects the food waste and brings it to the AHRC Class II composting facility. In the first phase of the pilot program 265 households participated and diverted 22.3 tons of waste from the landfill in a six month period. When enrollment was reopened in January, the remaining 35 spots in the pilot were filled and a waiting list is being maintained by Rural Action. According to the USEPA food scraps and yard waste currently make up about 30% of what people in the US throw away. Organic material is a significant source of landfill methane emissions, a potent greenhouse gas. Expansion of the city curbside compost program could play a significant role in helping this region meet the EPA landfill diversion goals and have a positive impact on the City of Athens attempts to reduce greenhouse gas emissions, thus reducing this regions contributions to climate change. AHRC would like to work with the city to maintain and expand the current composting program.

2. AHRC is willing and able to provide curbside compost service to 1000 households. AHRC is proposing a compost collection service for 1000 users (households) on a weekly basis. Collection will occur on the same day as their refuse and recycling (reference residential street schedule) and collected via 5 gallon sealed buckets. Households that are currently utilizing 13 gallon wheeled carts can continue to do so however, AHRC holds that buckets are a better option

due to various issues with the carts and will no longer be providing additional carts for compost collection. If a particular household needs additional capacity with those needs being evaluated on a case by case basis. In the case AHRC will provide slightly larger (6 or 7 gallon) buckets or provide additional 5 gallon buckets to that household. Material collected for curbside compost will be put in a sealed truck or trailer for transport to AHRC processing facility.

3. All compost will be hauled to the AHRC Class II Compost facility, located at 5991 Industrial Dr, Athens Ohio adjacent to the MRF in the industrial park. The facility is a static-aerated bay system that processes food and other organics wastes in 140 cubic yard bays. The compost facility is regulated by both the Ohio Environmental Protection Agency and the Athens City-County Health Department. Each batch of finished compost is sampled and tested at third party laboratories to ensure material is within certain parameters and safe for public sale. AHRC keeps testing information on file for each batch and is available upon request.

4. AHRC will continue tracking set-out rates and tonnages for food waste collected and will make data available on a live basis, as well as provide summaries as requested.

5. Education and outreach, as in the current pilot project, will be subcontracted out to Rural Action. Included in the price for providing the service are the education costs that include; social media and web postings, direct mail for recruitment, ongoing assessment, surveys, etc., similar to what was done in the pilot state of the program. Education and outreach will need to be tailored to the details of the program as proposed above, with collaboration between AHRC, Rural Action, and the City of Athens.

Education and Outreach for solid waste issues in the City of Athens

1. AHRC will continue to provide education for the City of Athens as needed with the creation of bill inserts, social media posts, website maintenance (see attachment J for an example), tours of the MRF for

schools and groups, and answering questions submitted to us by city officials and residents via phone, text, and email about resources and disposal options for recycling, compost, and other solid waste.

2. AHRC will also continue to partner with the City of Athens, Ohio University, Rural Action, Athens Hocking Solid Waste District, Keep America Beautiful, and The Recycling Partnership to provide education, programing, and resources on recycling, compost, and other solid waste disposal for the City of Athens and the region.

Downstream Recycling Information

1. Sale and Distribution of Recyclable Materials - AHRC aims to ship materials the shortest distance possible keeping downstream materials processing as local as possible. Most materials are sent within Ohio and adjacent states. The flow of materials, once departed from the AHRC MRF, are determined by market forces and facilitated by commodities brokers therefore the same material can have a multitude of outlets. See below for a summary by materials.

- **Food waste** - Collected at AHRC's main facility for composting, to make into a soil amendment that is sold to local farmers, landscapers, and gardeners.

- **Scrap Metal** - Collected in roll-off containers and shipped to McKee's Auto Parts in New Marshfield, Ohio for processing. Metals are separated and sent to various recyclers in Ohio where they are processed and sold to market.

- **Rigid Plastics #1 through #7** - Baled and shipped to Trigon Plastics in Pennsylvania. Materials are sorted, processed and recycled into plastic lumber or sold in pelletized form to be made into new products.

- **Fiber Containing Materials** - (newspaper, mixed office paper, cardboard, & paperboard) - Baled and shipped to Gary Grossman Recycling (Maysville, Kentucky and/or Big Island, Virginia), Recycling Masters, Recycling Exchange, or Royal Paper (Graffice Packaging, Middletown West Virginia), BKI Recycling (Chicago, Illinois) Materials are recycled into various products including new newspaper, paper, insulation, and other paper products.

- **Electronic Waste (e-waste)** - Electronic waste is a broad category of items and materials, and often includes other associated recyclable materials (e.g. cardboard, plastic film, packing materials, manuals, cords and wires, etc.). See <http://www.ait-recycle.com/recycling-items-accepted> for a full list of materials collected by Accurate IT Services, a R2 EPA certified electronics recyclers in Columbus, Ohio.

- **Steel Cans** - Baled and shipped to Schlezingers in Columbus, Ohio.
 - **Aluminum Cans** - Baled and shipped to Muskingum Steel in Zanesville, Ohio
 - **Glass Food and Beverage Containers (food grade)**- Sent to Rumpke's glass recycling facility in Dayton, Ohio, or is used as an aggregate replacement for available projects.
2. See attachment T for reference/sample.

Additional Work/Services

1. Additional work may include special hauls/collection or projects outside of the Franchise Area and not during a Special Event will incur additional costs. General rates for additional work involving a crew and packer truck will be billed at \$100.00 per hour plus disposal cost calculated at \$10.00 per cubic yard. Non-packer truck additional work will be billed at \$45.00 per hour.

2. Changes in normal service will require a written work order, describing the changes and cost.

1. New residential builds, new commercial sites (Uptown District or outside Uptown District within city limits), and new mixed use will need to be processed through a change order form (electronic or paper) so that additional costs can be calculated (determined by container sizes and frequency of collection), timelines can be established, and all details agreed upon by both parties before changes or additions are made. Charges will also be applied to changes in dumpsters sizes at a given location. e.g. restaurant changes from a (6) cubic yard dumpster collected five times per week to an (8) cubic yard dumpster x7/wk collection. Changes in residential service level will also need to be submitted through a change order, e.g. a residence switches from first to second tier service.

2. Associated Hauling/Processing Fees

2.1. Set new dumpster/change in dumpster size, \$50.00 per occurrence

2.2. Landfill Fees, \$35.25 per ton

2.3. Single Stream Processing fees are calculated at \$28.50 per ton.

3. Roadkill Removal - AHRC will provide cleanup of any nuisance dead animal (sleeper) located within a city right-of-way when requested by the city at a rate of \$50.00 per occurrence.

4. Weekend and Holiday High Priority Issues

4.1. If information about high priority issues are conveyed by city officials before 8 a.m. on weekends (Saturday, Sunday, and Holidays attachment N) to after hours phone numbers, these issues will be resolved the same day. Information about high priority issues that are conveyed after 8:00 am and before 5:00 pm, service will occur next day or earlier. Depending on situation; extra service can be provided, extra containers can be set, maintenance of equipment can occur, or site cleanup can be provided.

4.2. Contacts:

4.2.1. Mark Call, Operations Supervisor 740.590.3320 (mobile)

4.2.2. Justin Turley, Asst. Operations Supervisor 740.856.2511 (mobile)

4.2.3. Bruce Underwood, Executive Director 740.541.1327 (mobile)

5. Roll-off for Construction and Demolition Debris (C&DD) Collection and Hauling

5.1. Additional roll-off type dumpsters for C&DD are available to the city as needed on municipal projects. Delivery and pickup occurs Monday through Friday during normal operation (except for Special Events). See below for detailed costs and sizes. AHRC also provides this service to the greater Athens area.

5.2. Refuse Roll Off Containers for Municipal Projects, or other special projects and events not listed in Section D.

Size	Delivery Cost	Price Per Service	Tipping Fee per Ton	Total Minimum
10	\$50.00	\$225.00	\$35.25	\$310.25
20	\$50.00	\$250.00	\$35.25	\$335.25
30	\$50.00	\$250.00	\$35.25	\$335.25

6. Data Collection and Reporting

6.1. AHRC will report year end tonnages of refuse and recycling based off landfill weight tickets and onsite trucks scales at AHRC MRF. AHRC can use those two metrics to calculate the diversion rate for the city. See Attachments V, U, & R for examples).

6.2. AHRC can provide the following types of data at the city's request. AHRC will collaborate with city officials to determine the level of analysis, frequency, and format of reporting.

6.3. Set-out rates

6.3.1. Recycling set out rates have been tabulated before, in partnership with the City of Athens and the Recycling partnership. AHRC would welcome the chance to work with the city to examine providing this metric if requested.

6.3.2. Refuse set out rates have not been tabulated by AHRC in the past however, as with above for recycling set-out rates, AHRC would welcome the chance to work with the city to examine providing this metric if requested.

6.4. Site specific data based on weight or EPA conversions for cubic yards to weight can be provided, with costs based on the depth and frequency of the reporting as requested by the City of Athens.

6.5. AHRC tracks all outgoing commodities from the MRF and can provide data upon request.

7. Standardized Refuse Carts

7.1. AHRC worked with the City of Athens to implement the use of standardized recycling carts in the city, and in collaboration with the Recycling Partnership. AHRC is again willing to work closely with the City of Athens to explore standardized refuse containers sizes, brand, cost, etc., and whether they will be owned by the city or leased/rented through AHRC.

Cost Sharing

Given the contract length of 3 to 6 years (3 years with potential extensions), and the factors that are wholly or partially, out of AHRC or the city's control, AHRC would require a fair and equitable adjustment of key costs that AHRC has identified to include; fuel, landfill rates, and commodity values. The base contract price would be adjusted monthly on future potential changes in the three key areas. AHRC, under this three year contract will assume all inflationary risk for the first 12 months. Thereafter, if any of the price levels illustrated by the tables below are met, line item charges will be added to invoicing according to the frequency of the reporting for that particular category. AHRC has worked diligently to keep the overall cost to the city for these services as low as possible, however large fluctuations in those three key areas can have a major impact on the viability of AHRC overall, and in sustaining the efficient, tailored, quality services provided to the City of Athens while also supporting the local economy to the greatest extent possible.

Fuel

AHRC will be using the United States Energy Information Administration's (EIA) Tables of U.S. On-Highway Diesel Fuel Prices for the Midwest (PADD2) (<https://www.eia.gov/petroleum/gasdiesel/>). See below for table and illustration of monthly adjustments at potential future price points.

EIA Table Price (end of previous month) / gal	% increase above base of \$3.25/gal	Monthly Adjustment
3.25	0.00%	\$0.00
3.35	3.08%	\$294.87
3.45	6.15%	\$589.74
3.55	9.23%	\$884.62
3.65	12.31%	\$1,179.49
3.75	15.38%	\$1,474.36
3.85	18.46%	\$1,769.23
3.95	21.54%	\$2,064.10
4.05	24.62%	\$2,358.97

4.15	27.69%	\$2,653.85
4.25	30.77%	\$2,948.72
4.35	33.85%	\$3,243.59
4.45	36.92%	\$3,538.46
4.55	40.00%	\$3,833.33
4.65	43.08%	\$4,128.21
4.75	46.15%	\$4,423.08
4.85	49.23%	\$4,717.95
4.95	52.31%	\$5,012.82
5.05	55.38%	\$5,307.69

Landfill Tipping Fees

Landfill tipping fees have been fairly stable over the past decade however, recently AHRC has seen a \$2.50 increase (beginning January 1st, 2019). AHRC does not own or operate a landfill therefore is reliant on the use of public or private landfills in the area. Below is a table illustrating potential future increases in tipping fees and the corresponding monthly adjustment on invoicing to the city.

Tipping Fee	% increase of base of \$35.25	Monthly Adjustment
\$35.25	0.00%	\$0.00
\$36.25	2.84%	\$458.63
\$37.25	5.67%	\$917.26
\$38.25	8.51%	\$1,375.89
\$39.25	11.35%	\$1,834.52
\$40.25	14.18%	\$2,293.14
\$41.25	17.02%	\$2,751.77
\$42.25	19.86%	\$3,210.40
\$43.25	22.70%	\$3,669.03
\$44.25	25.53%	\$4,127.66
\$45.25	28.37%	\$4,586.29

Tipping Fee	% increase of base of \$35.25	Monthly Adjustment
\$46.25	31.21%	\$5,044.92
\$47.25	34.04%	\$5,503.55
\$48.25	36.88%	\$5,962.17
\$49.25	39.72%	\$6,420.80
\$50.25	42.55%	\$6,879.43

Commodity Price Index

Commodity values per ton have taken a significant hit since October 2017 and have overall continued to decrease. Industry expectations are a multiple-year recovery of market prices with possible continued short term decreases. The current weighted average price for AHRC of single stream recycling per ton is currently at \$45.00. If the average price of single stream recycling per ton drops below an average gross value of \$30.00 per ton, there will be a monthly adjustment, illustrated in the table below. The weighted average price is calculated on a monthly basis based off of the Yellow Sheet (<https://www.risiinfo.com/product/ppw-yellow-sheet/>), Ohio prices for aluminum, and direct values from materials buyers (where AHRC direct ships), and according to AHRC's composition of material in single stream recycling.

Monthly Average Price of Mixed Stream Recycling	Monthly Adjustment
\$30.00	\$187.50
\$25.00	\$225.00
\$20.00	\$281.25
\$15.00	\$375.00
\$10.00	\$562.50
\$5.00	\$1,125.00
\$0.00	\$1,750.00
-\$5.00	\$2,375.00
-\$10.00	\$3,000.00

Monthly Average Price of Mixed Stream Recycling	Monthly Adjustment
-\$15.00	\$3,625.00
-\$20.00	\$4,250.00
-\$25.00	\$4,875.00
-\$30.00	\$5,500.00
-\$35.00	\$6,125.00

Rural Action

4/10/19

To Whom It May Concern,

Rural Action supports the Athens-Hocking Recycling Centers (AHRC) in their bid application for the City of Athens waste hauling contract, which starts in January of 2020.

Since AHRC opened its state-of-the-art materials recovery facility in 2015, Rural Action has partnered with the nonprofit on numerous successful projects that have moved our region closer to a zero waste economy. Many of these efforts have benefited the City of Athens. AHRC hauls and processes food waste from the Athens Curbside Compost Pilot and works around the clock to expeditiously keep the streets of Athens clean during Student Move Out. AHRC provides excellent waste hauling services while keeping the jobs and material processing local.

Due to AHRC's quality servicing and its mission to foster local economic development while conserving resources and protecting the environment, we endorse AHRC in its pursuit of the opportunity to continue servicing City of Athens residents.

Sincerely,

Debbie Phillips

RE: Athens Hocking Recycling Center — AFSCME Local 3050

Dear Sir/Madam:

I am happy to recommend to you the high-quality services of Athens-Hocking Recycling Center. This Employer maintains approximately 40 Union Members of AFSCME Local 3050. These men and women are members of our communities. They are our friends and neighbors. As in all communities, we share common interests. We shop in our communities; we pay taxes in our communities; and we support our schools, churches and levy's.

Local communities survive by hiring the people around us. People who don't live in our communities certainly don't pay taxes, and they do not spend as much money here as those who live and work here each day. Sure, people who only work here and live somewhere else may buy a pop, or perhaps a meal ... but, those who live here? They buy everything (*i.e.*, their groceries, their utilities, etc.), and they support other local businesses by buying their products too, such as gas, clothing, household items, lumber, vehicles, etc. They are productive members of what we all call "HOME."

Athens-Hocking Recycling Center counts on our business. This Contract with the City of Athens is somewhere in the neighborhood of 40% of their livelihood. A loss like that to an Employer in our county would impact us in so many ways. What if your revenue were cut with the swoop of a pen by 40%? How would you handle it? You would have to cut back somewhere wouldn't you?

Job loss or a cut in hours is devastating for people who find themselves in that situation. Routines, income and even relationships can abruptly change overnight. The impact is not limited to those directly affected; the community connections we share spread the consequences and touch the lives of all.

Attachment I

April 15, 2019

Page 2

Any cutback would force people in our communities to face immediate financial burdens, but that is only the beginning. When family income falls, it leaves a loss of purchasing power, which impacts those who own and /or work at community establishments, shops, restaurants, and even dentists and vets. Sometimes people who face a financial decline must also draw from any savings and /or retirement accounts they may have for survival, a move that will impact them further in older age.

AFSCME Local 3050, AFSCME Ohio Council 8, AFL-CIO and Athens-Hocking Recycling Center have worked well together in the past and have every reason to believe that it will continue. They closely work to solve issues, to grow employment and to provide a safe work site for all employees.

I strongly recommend maintaining the contract with Athens-Hocking Recycling Center for the good of us all.

Respectfully,

Deborah L. Chonko
Staff Representative
AFSCME Ohio Council 8

John Fletcher, Jr.
President, AFSCME Local 3050

RE: Billing procedure for invoicing City of Athens

The following billing procedure addresses steps in the billing process, which involve collecting the information needed to construct an invoice, creating invoices, and issuing them to City of Athens.

Review Billing Information (Billing Clerk)

1. Access the monthly log for untagged / tagged bags and special hauls in the computer system.
2. Verify the details for each line item to ensure that it is ready for billing.
3. Access the invoice in the billing software double check with spreadsheet for accuracy.
4. Verify that all amounts have been entered correctly by entry staff. If not, match the listed amounts against the official list.
5. Check for any Special Events for the month billing.
6. Make additional entry for Special Events if so noted for month.

Print / Email Invoice (Billing Clerk)

1. Select the option in the billing software to print all flagged invoices.
2. Prepare invoice for emailing. Double check selected recipients.
3. Attach invoice to email and prepare body of email with current information.
4. Send email to designated parties.
5. Print invoice and attach to any related paperwork. (Pink slips)

File Invoice Copies (Billing Clerk)

1. File the retained invoice copies as needed, either by invoice number or by customer name.

Athens-Hocking Recycling Centers, Inc. (AHRC) is a 501c3 nonprofit striving for a zero waste economy, creating local jobs along the way. We have 23 full time positions and two part-time positions, all occupied by employees from Athens and Hocking Counties. We aim to be a resource for the community, and our service is but one part of the picture. We have many other initiatives, including, a compost collection service named Athens-

Cereal boxes, beer cartons, paper tubes, paper egg cartons. Brown corrugated, paper grocery sacks, manila envelopes.

Do Not Include

- liquids
- food waste
- compostable plastics
- styrofoam
- CDs
- DVDs
- electronics
- chemicals
- paint
- mirrors
- scrap metal
- lightbulbs
- batteries
- ceramics
- cookware
- hangers
- wires
- chains
- window glass
- toys

Mixed Recycling

Frequently Asked Questions

Q: Do I need to sort my recyclables?

A: No. All recyclables can be placed together loosely in your recycling container. please do not bag the recycling.

Q: What trucks are used for recycling collection now?

A: Since recycling is no longer sorted by you, Athens Hocking Recycling Centers, Inc. (AHRC) is using packer trucks that are very similar to the traditional refuse trucks to pick up your recycling. We also use split body trucks that can pick up recycling & refuse at the same time.

Q: What should I do with items that are not allowed in the recycling bin, but are recyclable?

A: Electronics can be taken to the AHRC office at 5991 Industrial Dr. M-F 7:30-4:30. Call 740.594.5312 or visit athenshockingrecycle.org for resources on other hard to recycle materials.

Q: Where do all of the collected recyclables go?

A: All recyclable materials go to the AHRC for processing at the Material Recovery Facility at 5991 Industrial Dr.

Q: Should recyclables be cleaned before placed in the recycle container?

A: Yes. Please scrape out or rinse all food and drink containers.

Q: May I still sort my recyclables?

A: Yes. Residents may still sort, but recyclables will be mixed when picked up.

Q: Where do I get a recycling bin if I don't have one yet?

A: Call the City Code Office at 740.592.3306

Q: What do I do if my refuse/recycling is missed?

A: Recycling and refuse need to be set at curbside by 7:00am the day of your pick up or the night before. Please check to make sure you set out containers on the proper day by visiting the City of Athens website. Click on "City Services" then "Utilities Billing" then "Garbage & Recycling". If your refuse and/or recycling still has not been picked up, please contact the AHRC office at 740.594.5312.

Q: Should recyclables be bagged?

A: No. Please do not bag your recyclables. Place them loose in the bin.

Q: Who do I contact about billing?

A: For general billing questions, please contact the City of Athens Utilities Billing Office at 740.592.3347. for questions about special hauls and extra bags contact AHRC at 740.594.5312

Load Inspection:

Are all containers of asbestos-containing waste intact, leak-tight, and properly labeled? Yes ☐ No ☐

Describe all containers that are non-conforming _____

Is there any visible debris on or outside the containers? (describe) _____

☐ This load was accepted for disposal and did not require Asbestos Spill Contingency Procedures.

☐ This load was accepted for disposal, but required Asbestos Spill Contingency Procedures.*

☐ This load was rejected.*

* The Ohio EPA Southeast District Office was notified by telephone at _____ a.m./p.m. on _____

The undersigned certifies that the material disposed of at the Athens-Hocking Reclamation Center as noted above is non-hazardous solid waste as defined by the Ohio Revised Code and Ohio Administrative Code.

If the waste material has been specifically approved for acceptance at this landfill by the submission of chemical analysis or other laboratory data, it is certified that this material conforms with the samples analyzed. If the waste material is asbestos, it is certified that the material has been properly packaged, labeled, and transported, and that the hauler will hold the landfill harmless from all claims, fines or penalties imposed upon the landfill operator for the violation of law or regulations for improper transportation, packaging, labeling or handling, prior to being put into the possession of the landfill operator.

All parties disposing of any waste at this landfill agree to fully indemnify the landfill operator for any and all claims, fines or penalties, including clean up costs, engineering fees and claims of any third parties, which may be caused, either directly or indirectly, by those parties bringing in waste materials to the landfill which are not permitted to be disposed of at this facility by limitations in any landfill permits or by the Ohio Solid Waste Laws and Regulations.

All parties disposing of any waste at the landfill or otherwise entering the premises agree to hold the landfill harmless and waive all claims for any personal injury or property damage to any vehicle or person entering the premises whether caused by an act or neglect of landfill Personnel or equipment or by persons entering the landfill. This waiver will not discharge any intentional torts by landfill personnel.
