Windstream-provided modems will be capable of in-home wireless networking, but devices supported by in-home wireless networking connections may experience speeds not equal to advertised speeds or the speed referenced in your Internet plan. With wireless networking, actual throughput speed may be impacted by several factors including interference from other equipment or devices at the location, distance from the modem, modem location, types of devices connected, physical obstructions, and time of day. To obtain advertised speed, connecting a device directly to the modem to provide a wired connection is recommended. Modem equipment must be returned upon termination, and if not, Windstream reserves the right to charge for the modem or a \$100 fee. **Installation/Activation:** Activation charge may apply. Plans with speeds 25 Mbps and higher may qualify for free professional installation. Plans with speeds less than 25 Mbps may incur a fee for professional installation. © 2019 Windstream Services, LLC. All rights reserved.
