A patented pill costing less than \$1 a dose stands to help millions of men with failing sex lives; no prescription will be required

**AHP** – A new sex pill is set to take the spotlight with the Viagra patent about to expire. But unlike the former, it won't require a prescription and is priced just under a \$1 a dose.

The new pill called *Vesele* is part of a new class of performance enhancers for men, which work instantaneously on the body and mind triggering arousal and firmer, harder erections.

Formulated with a special compound known as an "accelerator", *Vesele* can transport its active ingredients faster and more efficiently into the blood stream, where it begins to work its magic.

The patented ingredient blend initiates a process known as vasodilation, which causes arteries and vessels throughout the body to expand. This allows blood to flow directly to penis and genitals, resulting in harder erections which last longer. Cialis and Viagra are based around a similar concept.

But what makes *Vesele* so remarkable, and what these other sex pills can't do, is that also directs a small portion of this blood flow to the brain, which creates feelings of intense arousal. In laymen's terms, users become incredibly excited and turned on.

This is why the makers of *Vesele* say their pill has worked so effectively in clinical trials. It stimulates the two most important organs for great sex, the penis and the brain.

## The Brain Erection Connection

Until now, medical researchers did not fully understand the brain-erection connection. It has now been made clear with *Vesele*. When both are supplied with a constant blood flow, men are harder and firmer for longer... and have unbelievable sex drives.

"Most of the research and treatment methods for men's sexual failures have focused on physiological factors and have neglected the emotional ones. For the leading sex drugs to work, like Cialis and Viagra, you need visual stimulation" explains Dr. Henry Esber, the creator of *Vesele*.

"And although they work for some men, the majority experience absolutely no fulfillment during sex.

According to research published by the National Institute of Health, 50% of men taking these drugs stop responding or can't tolerate their side effects... and on top of that they spend \$50 per pill and it doesn't even work half the time.

This is what makes *Vesele* so different and effective. It floods the blood stream with key ingredients which cause arteries all over the body to expand. The patented accelerator speeds up this process even more.

The result is a rush of blood flow to the penis and brain, helping to create an impressive erection and a

surging desire for sex. Often, this is all men need to get going. And when taken regularly, many men say they are energized and aroused all day."

## Great Sex At Any Age

With the conclusion of their latest human clinical use survey trial, Dr. Esber and his team are now offering *Vesele* in the US. And regardless of the market, its sales are exploding.

Men across the country are eager to get their hands on the new pill and according to the research, they should be.

In the trial above, as compared to baseline, men taking *Vesele* saw a staggering 85% improvement in erection hardness over a four-month period. Their erections also lasted twice as long.

These same men also experienced an astounding 82% increase in the desire for sex (libido/sex drive) and an even greater improvement in overall satisfaction and ability to satisfy their partners.

Many men taking *Vesele* described feeling horny and aroused through the day. The anticipation before sex was amazing. They were also easily turned on. Their moods were more upbeat and positive, too.

## Faster Absorption into the Blood Stream

*Vesele* is made up of three specialized ingredients: two clinical strength vasodilators and a patented absorption enhancer often called an accelerator. According to an enormous amount of clinical data, each is very safe.

Research shows that with age, many men lose their desire and interest in sex. They also struggle to produce an erection firm enough for penetration.

And although there are many theories as to why this happens (including a loss in testosterone) one thing is certain, inadequate blood flow is virtually always to blame. That's why sex drug manufacturers focus on blood flow, it makes your erection hard.

But what's more surprising, and what these manufacturers have failed to consider, is that lack of blood flow can also kill your sex drive. That's because blood supplies energy for the brain. This energy is required for creating brainwaves that cause excitability and arousal.

Studies show the *Vesele* stimulates the entire cardiovascular system,

including the arteries that lead to both the brain and penis. The extreme concentration of the ingredients combined with the accelerator ensures that this process starts quickly.

The sexual benefits of *Vesele* are also multiplied as its ingredients build up in the system over time. This is why many men take it every single day.

## Recent Studies Show Positive Effects on Women

In the same study referenced throughout, *Vesele* was also shown to have an amazing (and somewhat surprising) effect on women too. That's because the same arteries and vessels that carry blood and oxygen to the brain and genitals are the same in men and women.

"In our most recent study, women taking *Vesele* saw a stunning 52% improvement in arousal and sex drive. Perhaps more impressive, they also experienced a 57% improvement in lubrication.

You can imagine why some couples are taking *Vesele* together. Everything feels better. Everything works better. Everyone performs better. It's truly amazing."

## A New Frontier of Non-Prescription Sex Pills

With daily use, *Vesele* is helping men (and women) restore failing sex lives and overcome sexual let downs without side effect or expense.

Through a patented absorption enhancer, the *Vesele* formula hits the bloodstream quickly, resulting in phenomenal improvements in erection firmness and hardness. By boosting blood flow to the brain, users also experience sexual urges and arousal they often haven't felt in years.
