Town Meeting Warrant, Spark Water Quality Discussion

By MACKENZIE RYAN

A recent review of the draft of the Town Meeting Warrant sparked some discussion about the need to revisit certain language related to water quality during the Mashpee Board of Selectmen meeting on Monday.

While the board voted to retain most of the recommendations within the warrant, some members expressed that the language was not written to fully represent the current conditions.

A recent case in Mashpee has community activists looking to expand their reach with a new Town Meeting warrant.

The Mashpee Board of Selectmen unanimously approved a warrant article that would allow for the construction of a cell tower to be built about 700 feet from the tower on Red Brook Road during the meeting Monday. The agreement to construct a cell tower to be built about 700 feet from the tower on Red Brook Road was approved on agenda items, one being the cell tower. The court allowed a motion to stay the litigation for six months in the further settlement to allow time for all parties to reach an agreement on all necessary permits without an appeal, which they did.

The 150-foot monopole will be built about 700 feet from the originally intended location for the tower behind Mashpee Fire Station 2, Blue Sky Tower III LLC, doing business as ETRMA III LLC, plans to start construction on the tower by September 1. The tower will still be located in the same area.

The tower is located about 3 miles from the town's water tower and will not be any further court proceedings on the matter.

TOWN MEETING WARRANT

3. "That was a location that was accepted by the Mashpee Zoning Board of Appeals and is for the future location of the cell tower."

4. "That the new tower we have been waiting years for is going to be a big benefit to the town," he said.

READER'S RESPONSE
