

The Scandal of the Century

How Election Was Stolen

Analysis Shows Obvious Fraud By Computer in States of GA, PA

Woody Jenkins

CENTRAL — Election Day in the United States, held this year on Tuesday, Nov. 3, 2020, was really a series of 51 separate elections — one in each of the 50 states and the District of Columbia. The vote total in each determines how the electoral votes of that state or district will be cast in the Electoral College on Dec. 14, 2020.

Thirty of those states and more than 2,000 counties have something in common. The citizens of those areas vote on voting machines provided by Dominion Voting Systems with software from Smartmatic Vote Counting System.

While supporters of President Trump cast about for evidence of vote fraud in the form of unsigned ballots, mishandled paper ballots, and evidence of “retail” vote fraud,

President Donald Trump

Former Vice President Joe Biden

While the mainstream media has crowned former Vice President Joe Biden as “President-elect,” the facts on the ground are quite different, at least in two swing states that have been called for Vice President Biden — Georgia and Pennsylvania.

In those two states, a careful analysis of the data shows that both states voted for President Trump and the election was stolen.

It was fraud by computer. Since Dominion and Smartmatic have control of the voting machines, the software, and the reporting of the results, it should be up to the owners and officials of those two entities to explain how it was done. But it was done, as will be shown.

Unraveling this mystery begins with *The New York Times*. After polls closed on Election Day, *The Times* begin to report the results hour after hour. The coding for that data is still online, and we have downloaded it in case it is taken down.

The data from *The Times* shows the time, expressed as UTC, or Universal time, which is Greenwich mean time in England.

It also shows the totals for Trump and Biden, Trump’s lead, and then new votes for Trump and Biden as each change in the results was uploaded. Then it shows something very significant: The increase or decrease in votes.

Fake Votes Were Reported in Multiples of 4,800 Votes in GA, 6,000 in PA in Identical Fashion

proof of massive computer-based vote fraud is right before the nation’s eyes. It is going unnoticed in this hyper-partisan atmosphere.

Ironically, *The New York Times*, a vocal critic of the President, has recorded the fraud for all times, even though they have not reported it.

New York Times Election Report Reveals 104,984 Stolen Votes in Ga, 347,768 in PA

Millions of Mail Ballots Made It Impossible to Track Which Votes Were Being Tabulated

CENTRAL — After every election, the *Central City News* publishes precinct-by-precinct voting returns to let our readers know how the people of Central voted. In preparation for this issue, we did that once again. However, we found the data to be virtually useless.

Nearly 100,000 voters in East Baton Rouge Parish took part in early voting or voted by mail. Those votes are not attributed to the voter’s home precinct but simply lumped in with other votes from across the parish. As a result, the only thing we can report on a precinct basis would be the votes cast on election day itself, which is a far cry from reality.

Additional Votes for Joe Biden received in multiples of 4,800 = 104,984

AN AMAZING CONSISTENCY IN REPORTED RESULTS — At 16:35 UTC on Wednesday, Nov. 4, 2020, President Trump was leading Joe Biden in the State of Georgia by 103,997 votes. Over the next seven days, Biden picked up 104,984 votes from 16 vote dumps. Amazingly, all of the vote dumps were either 4,800 votes each or a multiple of 4,800. The same thing happened in Pennsylvania, where a series of 44 vote dumps in multiples of 6,000 each resulted in 347,786 votes for Joe Biden.
