BEACHWOOD PLACE

Parking area expanded since photo was taken.

Houses removed since photo was taken.

LIGHTING DESIGN

PLAN | PATHWAY MODE

- Pathway lights at full output to encourage travel along path
- Otherwise, pergola and seating area dimmed to maintain hierarchy on path

DIMMED

DIMMED

LIGHTING DESIGN

PLAN | MOVIE MODE

DIMMED

DIMMED

- Perimeter tree lighting provides sense of safety and defines edge condition
- Pathway lighting dimmed for glare control while watching movie and “limited” periphery pathway movement

LIGHTING DESIGN

PLAN | ALL ON

- All on for safety and cleaning

LIGHTING DESIGN

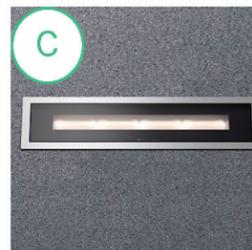

SKETCHES

Small recessed uplights integrated within columns accent structure

Recessed fully shielded step lights at base of columns provide low-level lighting

Linear in-grade fixtures graze fins from below to provide vertical brightness and texture

Small profile LED tape within center trellis, millwork, and under benches provide ease in wayfinding

Decorative outdoor pendants add visual interest

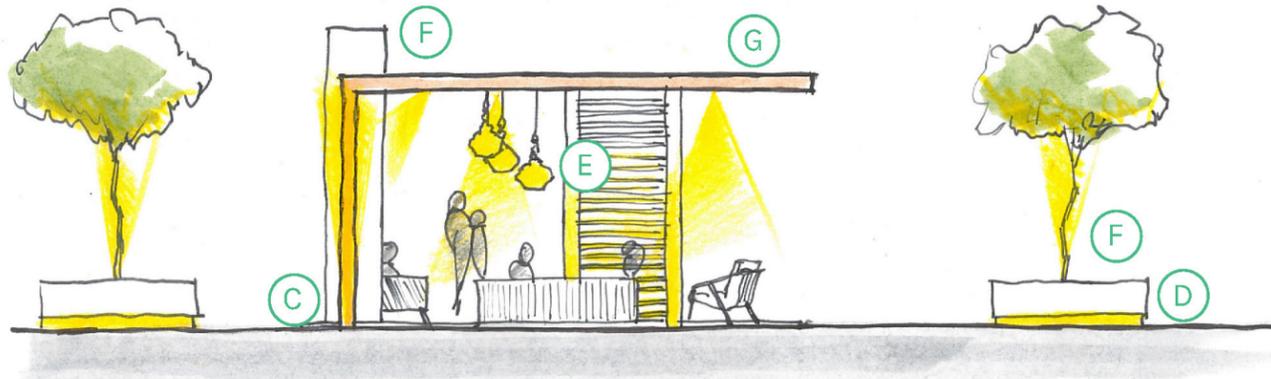

Landscape spot/flood lights highlight trees from below

Low brightness cylinder downlights provide supplemental lighting in pergola and trellis
