Friend Wanted
By Imari Davis

I am looking for a friend that is funny and loves ice cream.
I want someone who likes board games and who loves to
read. They love gymnastics and likes hanging upside
down. I want a who loves Justice, Claires, and the colors
purple and sly blue. They should love the Iowa Hawkeyes
and neon colors. If you can be this friend, know I will keep
your secrets and help you if you need help.

NEPTUNE
Today I will tell you about Neptune. It is an amazing planet I researched. The average temperature is -353F. The weather is cold and windy. Neptune is 30,776 miles in diameter. It is the 8th planet from the sun and when it crosses Pluto's orbit it is the 9th planet from the sun. Neptune is a planet made of cold gasses with over 14 moons and several rings. Three interesting facts are Neptune has some of the same gasses as Uranus. It is the same size as Uranus. It's named after the Roman God of the Sea. Today we learned about Neptune. I hope you enjoyed it.

RESPIRATORY SYSTEM
Do you know about the respiratory system? It helps you breath and talk. It is very important because it helps keep us alive. If we couldn't breath we wouldn't be alive. There are many parts of the respiratory system. The lungs are the main organ. Air comes in through our nose and mouth. The trachea I like a tube that gets the air to the lungs. The capillaries are tiny blood vessels that help the respiratory system. First oxygen comes in your nose or mouth. Next air goes down your trachea. Then the air goes down to your lungs. The air goes into your bloodstream. Last it goes to your heart. Your respiratory systems helps you speak and breath. If you like to do that you should wash your hands and keep healthy. You should also drink lots of water and exercise. You should not smoke. This is what you need to know about the respiratory system. Also this is how you can keep it healthy. I hope you keep your respiratory system safe so you will be safe.

THE MUSCULAR SYSTEM
Let me tell you all about my system. There are 600-650 parts of my system. There are 8 major parts of it. Can you guess what it is? It is the muscular system! These are some of the parts. There are 600-650 muscles. I am going to tell you 8 main muscles. They are the biceps, triceps, deltoid, quadriceps, hamstring and the calf. The 3 main groups are skeletal muscles, cardiac muscles and smooth muscles. This is how it works let me tell you. My muscles crisscross they also help us move they work in pairs. Your leg muscles help us jump they also work together. Did you know your heart is a muscle! Your cardiac muscles can move when you are not even thinking about it. Now I am going to tell how to keep it healthy. You should eat healthy and exercise. To go along with exercising you should run, walk, jog or ride a bike or play sports, push ups and worked out. Two other facts are muscles make 40 percent of your weight and there are 3 types of important muscles. I learned a lot about the muscular system. I learned the parts, how it works and how to keep it healthy.

THE CIRCULATORY SYSTEM
Let me tell you about the circulatory system. You are going to learn about an amazing system! The system teaches you mostly about the blood vessels. This system is the circulatory system. These are the parts of the circulatory system. The capillaries are around the air sacs. The parts also includes your heart and all of your blood vessels. This is how the system works. The heart pumps blood through your blood vessels. The capillaries carry blood to every cell in your body. This is how you can keep this system healthy. You should exercise to keep it healthy. You should also eat healthy and drink a lot of water. I learned the part, functions and ways to keep it healthy.

MY TRIP TO TEXAS
Have you ever been on a family vacation? Well I have. It was a blast! So let me tell you about it. Texas was a 17 hour drive so we stopped at a hotel and stayed over night. When we got there we ate dinner then went to bed. The next day we went shopping then to the Dallas World Aquarium. Next we took a tour of Dallas on a horse. Then we saw where JFK's assassination was. After that we ate and headed back to the hotel. We were there for a whole week! We mostly swam while we were there. We also face timed family members on the iPads and phones. Then we drove home and it was a long drive home. I learned being with family is fun.
By: Caleigh Cady

CIRCULATORY SYSTEM
Did you know that without the circulatory system you would die? The parts of the system are the heart, all blood vessels, veins and arteries. The function of this system works like this. It transports blood through the arteries. Capillaries take blood to all body cells. After the blood flows through the capillaries it enters the veins. Veins return blood to the heart. Here are some possible ways to keep it healthy. You could exercise like running, dancing, biking and swimming. Also, you could stay away from harmful substances like tobacco, drugs, alcohol. I wonder what would happen if you didn't keep it healthy.

RED
Red looks like fire trucks and markers and roses.
Red sounds like police alarms and a fire alarm and a red bird chirping.
Red tastes like cherries and a red Starburst and watermelon.
Red smells like smelly markers and fyer and paint.
Red feels like yarn and a red holder.

MY MOVE
Have you ever lived or visited Wisconsin? I have done both. I am going to tell you about my move to Clinton. I was born in Wisconsin and I lived there until I was four. Then I moved to Clinton so I could be closer to my grandma. The reason we moved to Clinton is that our house in Wisconsin was getting run down and we couldn't afford to live there so we moved in with my grandma. I am so glad we moved to Clinton because we have a lot of family here. My grandma's house is really nice and I even have my own room. It is not always fun to move and leave your friends, but for me it was a good thing. I got a new house, new friends and a new room!

THE RESPIRATORY SYSTEM

Let me tell you about how you breathe. Can you guess what it is? It is the respiratory system. These are the parts of the respiratory system. Some of the part are lungs, mouth, nose. Larynx and trachea. This is how it works. First air enters your body through your nose or mouth. Then it goes down your trachea to your lungs. Then when you breath in your chest gets bigger and bigger. This is how you keep it healthy. First you do not smoke, wash your hands, eat good food and avoid contact with others when sick. I learned a lot about the respiratory system. I learned about the parts, how it works, how to keep it healthy.

THE MUSCULAR SYSTEM

The muscular system has three type of muscles. The muscular system is made of 650 muscles Parts of this system are the skeletal, cardiac and smooth muscles. There are calf, biceps and triceps muscles too. How this system works. This system comes in pairs. It allows us to move back and forth. It also circulates blood through out the body. The heart muscle pumps two ounces of blood with every heartbeat. The cardiac muscle can move without you thinking about it. How to keep this system healthy. You need to exercise, stretch, march and keep them flexible. You should eat fiber and be on a balanced diet. I have learned a lot about how to keep this system healthy, parts of this system and how this system works.

TIURKY IN THE PIRATES SHIP

In 1873 me Fred Turkey was on a island. A pirate ship came I went on it and saw a monkey. I walked to the monkey and we started to talk. The monkey heard his owner coming and told me to hide and I said why monkey said said we had to keep us being friends a secret otherwise I'd be cooked alive so I hide. Then monkey got in trouble for leaving his owners room. The next day I woke up in a net and monkey was tied up as a punishment but I got mad and I gobbled threw the net. I saw a sword on the ground an took it and fout all the pirates and won. I then fread my monkey friend then we both put all the pirates on an island monkey wanted a sword to so I got him one and we saild away far in the ocean as pirates. Me and monkey never were botherd again acpt when monkey practiced sword fightig but I'm getting used to it now.

THE DIGESTIVE SYSTEM

Today I'm going to tell you about the digestive system. How it works, parts of this system, and ways to keep it healthy. I hope you learn more than what you already knew! Digestion begins in your mouth, after you swallow your food hits the esophagus. Then, it will enter your stomach. After that it will pass the small intestine, then the large intestine. When you eat you chew and your saliva softens the food. Then you swallow and it enters your esophagus. After it will enter your stomach. The food will mix with the liquid and pass through the small intestine. The nutrients from the digested food pass walls of the small intestine into the capillaries. Blood carries the nutrients to the body cells and through the large intestine. It gets released through your rectum. Things you can do to keep your digestive system healthy are: eat healthy foods, give your body the nutrients it needs, and eat your meals at the right time. Now I know the parts of the digestive system, how it works and ways to keep it healthy!

GREEN

Green is like green M&M's when you first open it. Green sounds like a car when it's in action. Green tastes like a pickle when it is drained with hot sauce. Green smells like a laffy taffy. Green feels like a green beach ball getting thrown around.

HOW THE CIRCULATORY SYSTEM WORKS

I think you will love to learn how the circulatory system works and how to keep it healthy and the parts. The parts of the system are the heart, blood vessels, veins and arteries. Function to the system is that they are pushed into the larger arteries and then on the smaller arteries. The blood travels through the veins into ventricles. Oxygen is pumped into the blood. The possible ways to keep this system healthy is don't take cigarettres or drugs, exercise and stay away from harmful substances. I hope you loved my report about the circulatory system the parts, function and ways to keep it healthy.

THE SKELETAL SYSTEM

Let me tell you about the skeletal system. You can learn a lot from the skeletal system. Did you know that the skeletal system protects your organs. These are the parts of the skeletal system. Here are some of the parts the rib cage, breast bone, skull. This is how it works. It gives our body its shape and makes us move. It protects your organs and makes you bend your arms and legs. Possible ways to keep this system healthy. You can exercise and eat healthy. The other thing to keep it healthy is to drink milk and other dairy food are healthy for you. I learned parts of the system, how it works and how to keep it healthy.

LAKE OF THE OZARKS

Family vacation is fun! The summer of 2016 my family took a vacation to the Lake of the Ozarks in Missouri. We stayed for one week. My Mom, Dad, Bryn, Makenzie and I all went. My family got to do a lot of cool things. We rented a big cabin, went to the beach, went to Jacob's Cave, and of course shopping! Jacob's Cave was a big cave that was kind of cold and wet inside, it was still pretty cool though. My Mom, Dad and I like to shop so we got to do some of that too. I was so excited when I caught a fish! My favorite thing there was fishin with my Dad! I like catfish the best, My sisters didn't catch any fish just me and Dad. We took his boat out many times but we didn't fish every time sometimes we just went for a ride or a swim. This vacation was a great time. I hope we can go back there again next summer. Family time is the best time, especially when you catch fish!

THE DIGESTIVE SYSTEM

Your food goes through a lot of places after your chew. The digestive system parts, function and ways to keep your digestive system healthy will be in this report. These are parts of the digestive system. First your food goes through your mouth and gets chewed up. After that it goes into your esophagus and you swallow your food. Next your food goes into your stomach. Then your food goes into your small intestine and then goes into your large intestine. This is how the function of the digestive system works. First it starts in the mouth, then it goes into your esophagus that connects your mouth and stomach together. After that it goes into your stomach and squeezes the food and mixes the digestive juices with the food until the food is mostly liquid. Next the food passes into the small intestine and different digestive juices are added and other parts of the food are digested. Did you know that the small intestine does more than any part of the digestive system to digest food? The laSt part of the digestive system is the large intestine. Most food that reaches the large intestine can't be broken down anymore so the large intestine removes the water from the food. These are ways to keep your digestive system healthy. You should always eat at regular times. Chew your food w4ell so it can go down your esophagus. Stop eating before you feel full because you're full before you think you are. Sit up straight when you eat so your digestive system tract is not cramped. Avoid drinking lots of liquids half an hour before or after meals. I have learned about the digestive system parts, function and ways to keep it healthy.

SKELETAL SYSTEM

This system helps you stay up and move. It helps so you're not a big blob. What system is this? There are 206 bones in your body. The main bones are the rib cage, spine, pelvis and skull. The skeletal system helps us keep our shape of your body otherwise your would be like a starfish flat out. The system works with your muscular system. The system also helps you stay together like a bed frame. Ways to keep your skeletal system healthy is to drink a lot of milk. Your bones need lots of vitamins and minerals and exercise like sports help your bones get stronger. Also eat other dairy products like yogurt helps too and remember in a sport to practice good posture. I learned so much about the skeletal system. I learned the parts the function and how to keep it healthy. Hopefully you learned a lot too!

THE DIGESTIVE SYSTEM

Do you want to learn about the digestive system? Well you're in luck. Let's go to the science lab to find out more. The first thing we will learn about are the parts of the system. Th mouth, the esophagus, the small intestines and finally the large intestines and rectum are the parts of this system. The next thing we will learn is how it works. Your mouth chews your food up. Then you food goes down to the stomach. The stomach goes to the small intestines. Then it goes to the large intestines. Then it goes to the rectum. These are ways to keep it healthy. You should eat a variety of healthy food every day. Even exercise every day. I hope you learned a lot like I did. It was fun. Now I hope you learned the parts of the system, how it works, and how to keep it healthy.

RESPIRATOR SYSTEM

Do you know what the respiratory system is? I tis a part of your body that contains the lungs, throat, diaphragm. That is what the respiratory system is. These are the parts of the respiratory system are carbon dioxide, lungs, trachea, capillaries, diaphragm, nose, mouth, bronchial and alveoli. This is how the system works. The respiratory system contains the lungs, throat, diaphragm, mouth and nose. Them working together these organs convert the air that is breathed into oxygen for the blood. You can keep it healthy by not smoking exercise 30 minutes every five days a week to promote overall health. Drink lots of water wash your hands eat a diet rich in nutrients necessary for a mouth. The respiratory system taught me so much about ways you can keep it healthy. Not smoking, exercise 30 minutes every five days a week to promote overall healthy. I learned the parts and the way it works.

THE FIRST TIME I RODE A DIRT BIKE

Have you every rode a dirt bike? I have and it was awesome and a thrill. First I put a helmet on then I put my dirk bike suit on. When I first rode a dirt bike I went so fast. The trail was muddy and filled with dirt I hit a jump I was in the air. My dirt bike is a Yamaha gt 80. Now I'm older and racing like a king one day I'm going to be a pro. So that was the first time I rode a dirt bike. I don't forget a helmet and other safety equipment to keep me safe.

Once there was a turkey named Fred. That's me I am Fred. I was told by my mom that there is a holiday called Thanksgiving. I really like the idea of giving thanks. What I don't like is they eat turkey like me. I told them "don't shoot me!" But they jut took of screaming. Like who hasn't seen a talking turkey? I rely don't like November it's just a bad month for me and my friends. We just all get jinxed. My friend Drew walked off a cliff. I almost ended up on a dinner table. Anyways my point is I will post this all over town until people start eating ham. If you were a turkey and your friends ended up on a dinner table how would you feel huh? Just saying I will protest. So start eating ham.

TURKEY

One day I decided to walk into school. I thought it was closer for the holiday but it was jut the day before Thanksgiving break. Nobody noticed me intill recess. Next they call the animal shelter and they said we don't take turkeys. While the techers were out of school I ate all of the apples and they were so good. After that they bought more for me and I ate them and happen on and on. So I was so big that cooked me I was lunch tommarrow. Then from that day on it was now newne as the day the turkey came to school. To celebrate they had turkey for lunch. Now I hount the school and I only come on the anual the day the turkey came to school. I'm making another book on that last part.

MY FIRST NERF WAR

Today is my birthday and I am having a slunber party and a nerf war. The nerf war was going to be awesome. First, B.J. came, then Blake and finally Grant and Colby. After that, it started. We all found hiding spots. Boom! Blake shot Colby. Then, Boom! Grant shot B.J. Then it was all up to meet to shoot my little sister. So I found my scope. Aim, fire Boom! I shot Molly. Finally me, Blake and Grant won. Nerf wars are very fun.

MY SPECIAL GAME

Have you ever wanted something and finally got it? Well that happened to me. My mom's friend gave me a demo game. I played it right away but it got deleted. My mom got me the real game and it was fun when I played it. My level in multiplayer is 39. My level in zombies is 35. I have a friend named Sossey Burger who plays games with me. Sometimes you have to wait for things like I ha to wait for my game.

HAPPY BIRTHDAY

Prince of Peace - 4th Grade - Ms. Noecker

If I got to spend my whole afternoon with a person of my choice I would spend it with my dad. We would have fun and we would go to see a movie. We would make a handshake and get ice cream. I wanted to pick my dad because I don't see him a lot. By Hakeal Powell

If I had one afternoon to spend with someone I would spend it with my grandparents. They always make me happy and I hardly get to see them (my dad's side). I would probably paint with my grandma (she is an artist) and paint the surprise I promised her. I'd probably eat lunch and see a movie with my grandpa. Then we would talk about what happened in the time we hadn't see each other or about the family news. The reason why we don't see each other is not because we live far away, it's because I'm so busy. I have dance, swimming, and piano. I love my grandparents. By Elena Brisch

If I had an afternoon to spend with anyone, it would be my friend Jhaira. We would play spies and go to Happy Joe's for pizza and win tickets and spend them on candy. Then we would go to the park and eat the candy. By Sara Hays

I would spend my afternoon with my Grandpa Joe. I picked him because he is the best Grandpa in the whole world and fun to be with. I would help him work in the afternoon. He lets me run the equipment. My favorite is the roller. Soon I hope he shows me how to run the excavator. Then he takes me for a ride in the Kubator. When the day is done, my dad picks me up. By Luke Detterman

I would spend my time with my best friends Lilly and Alex. We would go to the movie theater. Then we would go to a photo booth and take funny pictures, talk about funny stuff, dance, and sing. By Yuliana Marcos

I would want to meet the Golden State Warriors. I chose them because they're good at basketball. I would want them to help me on my shooting and tricks. By SiVaughn Thomas

If I had a free afternoon I would spend it with my brother. We would play legos because we love playing with legos. We built the Empire State Building and we have so much fun. By Tate Ruden

If I had one afternoon to spend with someone, I would spend it with Michael Phelps. I would spend it with him because I am a swimmer. We would swim laps and do tricks. We would splash around in the water and practice our flip turn and starts. Finally we would dry off and get some ice cream. By Ava Kaup

If I had one afternoon with someone, I would choose Stephen Curry. I would choose him because he is my favorite basketball player. First we would go eat at Subway. Then we would go to the Golden State Stadium and shoot hoops for a little bit. Then we would go play outside and try to do every sport and see how good we are at those sports. Then we would go to the NBA shop and get a 30 Curry jersey and matching shorts. Then get Curry's blue and yellow shoes. That would be my best afternoon ever. By Lilly Smith

If I had one afternoon to spend with someone, it would be my old friend Cude Vasaburk. He was an awesome friend. We would play video games, shoot my bb gun, his pellet gun and we would wrestle around outside. I miss my friend. If you read this, come over. By Gaige Meurs

If I could I would spend an afternoon with Rizzo. That way I could learn more about baseball, and it would be fun to hang out with a World Series Champion. By Logan Detterman

If I could spend the afternoon with someone I would choose Meghan Trainer. She is a famous singer and I love her. I love her songs and she is amazing. We would spend time making songs, go to a movie and just have fun. By Megan Eads

I am from my school set.
From my living room and the snack cupboard.
I am from the rocks with our names on them,
to the tree I climb. It's green and wet.
I am from the block we walk our dog on.
From my family and friends.
I'm from my ipod and school supplies,
and from animals.

I'm from twizzlers and zebra cakes.
I'm from, "I love you more and want to go to mimi and
papa's house."
I'm from going to Pella every summer.

I'm from Clinton Hospital and my house.
Mac "n" cheese casserole and strawberry pretzel dessert.
From when my cousin was born and my great aunt died.
She will also be in my memories and in my heart.

Taekwondo Fun
By: Allyson Carpenter

"Black belt, Red belt, Blue belt, Hut!

My name is Allyson Carpenter and this is my story. I am
in Taekwondo and I am a blue belt. I've won 3rd place in
nationals. It was held in Fort Lauderdale, Florida. I was six
years old when I went the first time.

I've been to four nationals. This year is my last one,
because I'm moving to Byron, IL. If I do Taekwondo it will
have to be at a new location.

I've learned to be respectful to all my instructors and
students. The students look up to me as their role model.
So I have to do my best role modeling at all times. You
learn new things every day. They go up to ten-degree black
belt.

Taekwondo is not all learning. It's about having fun too.
Once in a while the instructors play fun games with us
too. I'm really close with my instructors. I have tons of fun
there but when one of the instructors are talking you don't
talk because it's disrespectful. Kids can start Taekwondo
when they are four years old. I really enjoy doing it and I
think you will too! It's a very fun sport.

The Hole
By Bailey Sandholdt

It was raining and my uncle and I were riding my four-wheeler at the baseball park in Sabula. It was a big four wheelers, and Justin let me drive. I was only four years old, and I didn't see the hole that I hit...

I hit the hole and the wheel went in it. The four wheeler flipped. I tried to jump, but I couldn't. The entire big four wheeler fell on my leg! I didn't know what was happening. The second that I could, I started screaming.

Justin got his phone and called my mom. Mom came with everyone. I didn't want that though. Justin was angry at himself. My mom brought me to the hospital. It was so scary. When we got there, my mom found a wheel chair, I got in it of course. They had to do an x-ray on my leg. It felt like it was broken, but I wasn't sure at the time because I was really little. The doctor said, "You broke your leg!" I had to go in this room to put my cast on. It kind of hurt, but it was white so everyone could sign it. Then they gave me crutches. I tried to use the crutches, but I fell. I kept trying. I finally got it. Everybody signed my cast. A little after that my uncle sold the four wheeler.

THE END
