WE OFFER HELP FOR...

**Prostate problems/urinary issues/
difficult or bothersome urination**

Proven, minimally invasive treatment options:

UROLIFT

- Uses tiny, biocompatible implants in the prostate to hold the urinary channel open
- 15 minute procedure under a light anesthetic in an outpatient surgical facility
- No catheter after procedure is typically required
- Quick return to your usual activities after procedure
- Long term durable response (5+ years possible)
- Close to zero rate of sexual side effects
- Proven, in use for 13 years

REZUM WATER VAPOR THERAPY

- Uses high temperature water vapor to shrink prostate tissue, no cutting involved
- 15 minute procedure under a light anesthetic
- Can be done in the office
- Requires a short term (one week) urinary catheter
- Quick return to your usual activities after procedure
- Long term durable response (5+ years possible)
- Close to zero rate of sexual side effects
- Proven, in use for 10 years

KIDNEY STONE TREATMENT

- Laser Lithotripsy
- Flexible and fast scheduling
- Treatment done in Cody

VASECTOMY

**PROSTATE/KIDNEY/BLADDER CANCER
SCREENING/DIAGNOSIS/TREATMENT**
