We can stop HIV, Iowa—
by making sure women are part of the HIV conversation.

In 2022, **19%** of new HIV diagnoses in the U.S. were among women and **23%** of all people living with HIV were women.

Women are less likely to think they are at risk for HIV. Often, they don't get the information they need about HIV or HIV prevention.

Thankfully, there are steps all women can take to protect their health:

- Get tested for HIV at least once in your lifetime.
- Request HIV testing any time you get tested for other sexually transmitted infections (STIs).
- Learn about and access the best HIV prevention tools for you!
- If you're living with HIV, connect to care and services to protect you and your partners' health.

STOP HIV IOWA
