

Kerr County and the City of Kerrville hereby gives notice of the County and City's intent to revise the flood hazard information, generally located between Third Creek downstream of 1351 North to just downstream of 1485 North and Second Creek downstream of Seabee Hwy North. The flood hazard revisions are being proposed as part of Letter of Map Revision (LOMR) Case No. 2 6-06-1584P. The County has completed the grading and built infrastructure as part of Kerr County Animal Services Building. Specifically, the flood hazard information shall be revised along Second Creek from the confluence of Second Creek and Third Creek to a point approximately 50 feet downstream of Suddenly Road North, and along Third Creek from Riverside Drive to a point approximately 1,500 feet upstream of Landfill Road North. The Letter of Map Revision (LOMR) will revise the following flood hazards along Third and Second Creeks:

1. The 1% annual chance water-surface elevations shall decrease and increase along Third Creek upstream of Spur 100 and be established elsewhere.
2. The 1% annual chance water-surface elevations shall be established along Second Creek upstream of its confluence with Third Creek.
3. The 1% annual chance floodplain shall widen and narrow within the area of revision.

Maps and detailed analysis of the revision can be reviewed at the Kerr County Road and Bridge office at 3766 State Highway 27. Interested persons may call the County engineer at (830) 896-9046 for additional information from 9 am to 5 pm Monday through Friday.
