

Oregon's Cap & Trade Rules

These are the total emissions caps proposed by the Oregon Department of Environmental Quality. They phase in over three-year periods, gradually lowering the total allowed emissions so as to cover more and more entities in the state.

Oregon's cap and trade emissions standards will phase in over time, in three-year increments. The emissions caps are as follows:

**2018-2022:
200,000 MTCO₂e**

MTCO₂e
stands for
metric tons
of carbon
dioxide

**2021-2025:
100,000 MTCO₂e**

**2024-2028:
50,000 MTCO₂e**

**2027-2031:
25,000 MTCO₂e**
