Incident Narratives

Primary Narrative: Upon arrival, smoke was observed coming from the roof of Rose Hill Wellness, located at 623 W. Main Street. The windows were blackened by smoke and warm to the touch. At 625 W. Main Street, a water flow alarm was sounding, with water flowing from the front door and window. Smoke was visible through the window, and the glass was warm to the touch.

I directed Ladder 111 (L-111) to make entry into both 623 and 625 W. Main Street and to set a ladder for roof access. Engine 113 (E-113) established a hydrant connection to supply L-111 and accessed the roof. E-113 crews reported no fire conditions on the roof, only light smoke.

Crews from L-111 found no fire in 625 W. Main Street, only smoke and water damage resulting from an activated sprinkler head. Crews did locate fire damage with minimal active flame in 623 W. Main Street. The fire was located in the fourth office from the front of the building at 623 W. Main Street.

Crew member Richards entered the room via the hallway and reported that the top half of the door was missing due to fire damage. While examining the room with a thermal imaging camera (TIC), Richards observed very little visible flame; however, a pot located in the center of the room appeared super-white on the TIC, indicating it was significantly hotter than most other objects in the room.

Crew members Larson, Richards, and Garcia reported that a massage table was positioned just left of center in the room, directly above the pot, which was used to heat stones for massage therapy. Burn patterns on the massage table indicated the fire originated beneath the table.

The rooms on the east side of 625 W. Main Street were connected to 623 W. Main Street. One sprinkler head in the front of 625 W. Main Street activated due to heat, with no fire damage noted in that area. Two electrical breakers were found tripped at 623 W. Main Street.

Positive pressure ventilation was conducted to clear smoke from 625 W. Main Street, 623 W. Main Street (Rose Hill Wellness), and 615 W. Main Street (Trends Salon).

Damage assessment was as follows:

625 W. Main Street: Smoke and water damage

623 W. Main Street: Fire, smoke, and water damage

615 W. Main Street: Smoke damage only

The cause of the fire is undetermined and remains under investigation at the time of this report.
