....

Campground: ~~A business, public or private establishment operated as a recreational site for tents, camper, trailer, and travel trailer or other forms of temporary living shelter that can accommodate two or more parties~~. A parcel or contiguous parcels of land developed, operated, or held out as a unified facility where five (5) or more sites are established, operated, or made available for compensation or indirect compensation for temporary occupancy by persons using tents, recreational vehicles, campers, travel trailers, rental cabins, cottages, or other similar accommodations for overnight lodging. The term includes facilities providing temporary recreational or transient lodging through a combination of such accommodations. Classification as a campground shall be based on the overall use and operation of the property, including the nature and intended duration of occupancy and the manner in which accommodations are offered. A property shall not be classified as a campground solely because it contains five (5) or more dwelling units or cabins intended for permanent residential occupancy. The term does not include a private campsite as defined in this Article or a parking lot or other area where camping or overnight occupancy is not authorized by applicable law or permit.

Campsite: Private Land for exclusive personal use; not associated with a business or a campground, which is developed for repeated camping, and which involves site improvements that may include, but not limited to gravel pads, parking areas, fireplaces, or tent platforms.
