

VERAWANG

Comprehensive Eye Care Has Good News If You Need Glasses!

When it comes to buying prescription glasses, there are a few things that should matter to you. The first is the cost, but quality, service, selection and convenience are also important. Many people think that glasses can be purchased at low cost from national chains or regional outfits that have lots of offices in our area and all over the St. Louis area. If you have a Vision Insurance, like Spectera, NVA, VSP, or EyeMed, your insurance benefits apply to the purchase of prescription glasses the exact same way at any location that accepts your insurance.

**Vision Insurance levels the playing field for you.
Cost is no longer an issue.**

Now you can look at the other things that matter:

1. At Comprehensive Eye Care, we have a huge selection of eyewear and sunglasses. We proudly offer Vera Wang, Vera Bradley, Wiley X, Maui Jim, Dana Buchman, Skechers and Timberland products.
2. We have an in-house lab that enables you to keep your current glasses when you just need to get new lenses for the frames you already have.
3. We have a Dispensing Lane, where we double check to make sure that you are seeing well before you leave our office. This takes extra time, but it is well worth it to our patients. **Have you ever had your vision checked with your new glasses at any other place before you left the shop?**

Families are welcome here!

We offer considerable discounts on purchases of multiple pairs of glasses.

- You are welcome to come to our glasses dispensary with a current prescription that you obtained elsewhere. You will not be required to have an exam.
