

Protect yourself and your family from carbon monoxide

Carbon monoxide is a colorless, odorless gas that is a product of incomplete combustion. Exposure to carbon monoxide can cause flu-like symptoms. Prolonged exposure to carbon monoxide can lead to serious illness and even death.

Protection is as easy as installing a carbon monoxide alarm, and having your heating system, chimney, flues and vents checked once a year by a professional.

If you suspect a carbon monoxide problem, go outside!

Then call **911** or NYSEG at **800.572.1121**. We'll respond quickly to make sure you and your family are safe.
