

Bixby Public Schools was made aware of an incident in the wrestling locker room last Tuesday and immediately began an investigation. We understand the concern this situation causes within our school community and want to assure our families that we are taking this matter very seriously.

The district is aware of the many posts and discussions currently circulating on social media platforms. We want to clarify that much of the information being shared online is not accurate. While we would sincerely appreciate the opportunity to share further details to ensure our community has accurate information, we are simply unable to do so at this time. Student privacy is legally protected by confidentiality requirements (FERPA).

We can share that there are currently two investigations underway regarding the locker room incident: our internal administrative investigation and a separate, independent investigation conducted by law enforcement, with which the district will fully comply. To ensure the integrity of both processes and to protect the privacy of those involved, the district must refrain from further public comment on the specifics of the incident.

As a standard and vital part of the school district's investigative practice, our administration is conducting a thorough review of all relevant training, protocols, and requirements associated with this matter. In this specific case, it includes a comprehensive review of locker room supervision practices and procedures.

Bixby Public Schools remains deeply committed to maintaining a safe, supportive, and accountable environment for all students and staff. We appreciate the community's patience and cooperation as we allow these independent processes to move forward completely and objectively.

Thank you,
Lydia Wilson
Superintendent
