\$140,000.00 per year is not commensurate with the financial hardship that Prestage will impose on the school system.

Hello all,
Attached is a press release from Chad Scheck NICooridor related to the
City Council's most recent negotiations with Prestage Farms. Wanted
you to have this right away.

Janna

The company proposed this on their own and Mayor Bookmeyer and Chad Schrek were facilitating the process. I had no idea that this was even in process until late yesterday afternoon when the Mayor contacted me by phone. I have also asked the Mayor to provide the property tax amounts that the schools would start receiving and am hoping that this will come later today. In addition, I am having John Berg run the costs associated with our ELL programming and per pupil expenditures. This will help us get a better idea overall.

Dr. Micich,

I'm not very happy about the 1.4 million Prestage has offered. If Mason City receives 100 students that would be almost a million dollars that first year that we would need to front load that first year.

Please remove this line "We are pleased Prestage has shown interest in supporting the additional costs they would bring to the schools." The offer they gave is a joke and I do NOT want to thank them for it.
