CONFLICT OF INTEREST DISCLOSURE FORM

In Tennessee, there is a conflict of interest if the inspector also built, installed, designed or repaired the device. If there is a potential conflict of interest, the inspection report is rejected and no annual permit is issued until a qualified third party inspector is obtained and all statutory compliance requirements are met. Program policy requires qualified third party inspectors to clearly identify and reveal the designer, builder, installer and/or repairer.

If at the time of the permit application it is unclear that the inspector, builder, installer, designer, repairer of the course are the same person, the administrative staff will immediately contact the inspector and obtain information for the file that clarifies the issue. This information is needed for all amusement devices including aerial adventure parks, trekking parks, team challenge courses, rope courses, canopy tours, zip lines, etc. Inspection reports should include the necessary information or the qualified third party inspector should provide an email that contains the necessary information for our file.

In Tennessee, a qualified third party inspector is certified by ACCT, NAARSO or AIMS. This person is neutral and detached, does not have a financial interest in the company.

Amusement Device Company Family Attractions Amusements LLC

I, FRANCIS (FRANK) GUENTHER (print name) have read the Conflict of Interest Disclosure Notice above. I certify that I am a neutral and detached third party inspector. I do not have a financial interest in the company (i.e. partner, co-owner or relative). I did not build, install, design or repair the device. **I understand that I am required to apply the latest American Society of Testing Materials (ASTM) Standard to Tennessee Inspections** and to include the proper standard in the inspection report. Inspection reports should also indicate the device is safe and operable on the date of the inspection.

Signed post accident of 8/8/2016 (FXG)
