Thank you. Will do.

Hi Sarah! Yea, those additional documents were documents that I felt were not specific to the environmental work. But... that being said.... they all are part of the history of permits and coordination for the project. Some of these were provided to BLM previously but in an effort to put everything in one spot I would provide them with the following:

Entitlement Documents (Documents #1-#18):

Supporting Documents (Documents #A-#N)

This will fill in the blanks and add should support the efforts.

Let me know what else is needed.

Thanks
Mychal

Absolutely.

Mychal can you assist in answering this follow up question?

There appears to be missing numbered and lettered documents (i.e. #1, 9-11, B, D, etc.). Can you confirm what the missing number and letter documents are and whether they are pertinent to the environmental analysis and ultimate permitting of the project?

Thanks!

Sarah

Hi Mychal-

Sarah forwarded everything to BLM and we're just filling in some missing information.

Absolutely we can meet next week to discuss next steps and questions.

Bob

I hope you both had a wonderful Christmas!

I wanted to make sure you got my emails last week with the EA / NEPA information to forward on to BLM. Hopefully you were able to forward that on so they could get started reviewing everything so they can hopefully use that NEPA documentation to move things along. Let me know when you get a chance.

Also - could we schedule something for next week to discuss questions, concerns, and next steps going forward? Let me know what days / times you might have available next week.

Thanks guys - look forward to a great 2024!

Mychal
