friend,

I just got this email from Congressman Steve Stockman.

We are seeing a tremendous response, but this fight is still coming down to the wire.

We just aren't reaching people fast enough.

That's why I need you to forward the Congressman's email to all your friends and family by [clicking here](#).

Obama is looking for any excuse to kill this job creating project.

It's up to you and me to tip the scales in our favor.

-Chris Michael

P.S. Please don't delay, we need every signature we can get.

**From:** Congressman Steve Stockman. Republican-Texas

**Subject Line:** Fw: Will Obama save the Keystone Pipeline?

**Steve Stockman**  
—  
United States Congressman  
Republican, Texas

Good afternoon friend,

Won't you please take a quick moment and read the attached email from my good friends at *FuelingJobs.com*?

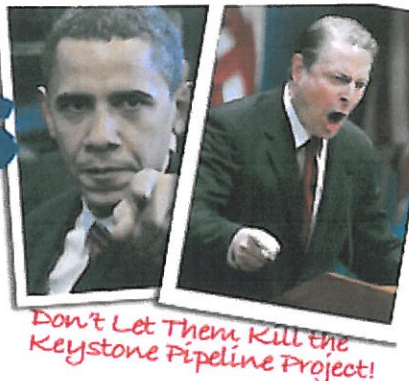

I sure hope you will.

**FuelingJobs.com** is the leading organization in the fight against the radical environmentalists.

They're tough. They're principled. And they know how to win.

**So please take a moment to read this letter and, hopefully, lend FuelingJobs.com your support.**

Sincerely,  
The Hon. Steve Stockman  
U.S. Congressman (R-Texas)

Dear friend,

Our own State Department is joking about killing Global Warming realists.

Radical environmentalists have gotten dangerously extreme -- and their number target is the **Keystone Pipeline**.

You may have heard of it.

This massive -- and 100% privately funded -- project will ship oil from Alberta, Canada, to refineries in Texas.

The construction of the pipeline alone will generate thousands of jobs and pump money into Midwest communities.

And the work at the refineries and ongoing maintenance of the pipeline will create nearly 40,000 more permanent positions.

Lastly: **It will directly lower the price you pay at the gas pump** by relieving our dependence on foreign overseas oil.

So of course, the radical environmentalists and "green-energy" lobby can't stand it.

And their "buddy" in the White House wants to appease them.

Even though the State Department just confirmed the Keystone Pipeline WILL NOT HURT THE ENVIRONMENT. Not one bit.

We only have days left to save the Keystone Pipeline from Obama's veto.

The issue is now entirely up to the White House, and the Official Comment Period ends next week.

But *FuelingJobs.com* is determined to bury President Obama in a flood of signed petitions.

[And you can sign yours quickly and easily by clicking right here.](#)

In his State of the Union Address, Obama said he wants to "slash the bureaucracy and streamline the permitting process for key projects."

He wants more "shovel-ready" construction jobs to put Americans back to work.

Well my friend, projects don't get more "shovel-ready" or more beneficial to America than the **Keystone Pipeline Extension**.

And right now Obama has the power to authorize all the necessary permits with a stroke of a pen.

So why didn't he mention Keystone XL by name in his SOTU

address?

Because cheaper fuel is bad news for "Gang Green" and their radical energy agenda.

Obama has already invested billions of our tax dollars into so-called green energy companies under his administration.

**Companies like the infamous Solyndra.**

But even with Obama's massive subsidiaries, these experimental (and EXPENSIVE) companies can't really compete with natural energy sources like oil and gas.

That's why Obama is looking for any excuse he can find to kill the Pipeline and shore up his Gang Green buddies.

It's up to you and me to push him the other way.

*FuelingJobs.com* has the [petition](#) that will make Obama sit up and take notice.

[Please sign it by clicking right here.](#)

Obama's opposition to Keystone is nothing more than crony capitalism at its absolute worst.

That's why your [signed petition](#) is so critical before the Official Comment Period ends next week.

The good news is, national support is on our side.

Polls show Americans are FED UP with the radical environmentalists' chaining of our fragile economy under regulatory lock and key.

But unless *FuelingJobs.com* delivers the petitions needed, President Obama is likely to kill Keystone again.

Our window to collect and deliver petitions was only 30 days long... and that window is almost closed.

That's why I need you to take action right now.

Your [signed petition](#) will show Obama definitively that you will not tolerate any denial of the Keystone permits.

With Obamacare proving to be one big disaster, the president can't afford any more unpopular decisions.

Right now, the White House is gathering comments from U.S. citizens, which Obama will take into account before deciding whether or not to approve the Keystone Pipeline.

If he knows you and thousands more want this pipeline, he'll be forced to approve it.

[So please, click here right now to sign your Keystone Pipeline Petition!](#)

Every voice matters in this fight.

Sincerely,

Geoff Goble

Chairman, FuelingJobs.com

P.S. We only have days left to send your comments directly to the White House.

If Obama doesn't hear from enough pro-energy Americans, he's likely to kill the Keystone Pipeline once and for all.

That's why I'm counting on you to send a loud-and-clear message to Barack Obama that there will be a political price to pay for blocking construction of the Keystone Pipeline.

[Click here to sign your petition DEMANDING President Obama approve the critical Keystone Pipeline Project.](#)
