

## To family members, close friends and loved ones of our healthcare colleagues:

We now face one of the worst times since the pandemic began. We know this has been stressful for you, and we want to thank you for the support you continue to give your healthcare hero.

Your loved one courageously supports the needs of our patients—from our front-line doctors, nurses and techs in our hospitals and Memorial Care locations to everyone who works behind-the-scenes to ensure the best possible experience for all those interacting with Memorial Health during this pandemic.

Our front-line healthcare workers and support teams care for each patient and member of our community—no matter their illness or their background—with exceptional care. The same loving way they care for you reflects the kind of quality care they provide for our community. Their dedication is unmatched. And so is yours. We see you.

We know you have walked alongside them these past two years.

We know you have taken precautions with them.

We know you have supported them as they carried the burden of every surge, every wave of this terrible pandemic.

We know you have shared this heavy burden, and we sincerely thank you for your support. It is important to us that you understand how grateful we are for your loved one—your mom, dad, spouse, child, sister, brother, aunt, uncle, grandparent or friend—and for their continued dedication to helping and healing people who are facing some of the worst days of their life.

We are grateful to still have a light in the darkness—like you and your loved one—to help guide us through this storm.
