Keith,

Thanks for the note and the pictures. Currently we do not have any plans with the pump house. We would certainly be interested in talking with your dredging company about what services they could perform. Can you please provide contact information so that we can reach out to the correct person.

Thanks.
Keith

Subject: RE: Pump House feedback

Jacob - Joe and I visited the pump house on April 15 and noticed that concrete from the overhang continues to deteriorate and fall into the lake. Hopefully it will not fall onto fishermen and boaters that visit the site. The security bars on one of the west facing window frames has been bent so that people can easily enter the pump house from a boat.

Attached are photos from April 15. Ignore the date on the them as that is the camera's default date.

While our dredging contractor continues to work on the lake, now would be an ideal time for your firm to decide what to do with the pump house. It is the City's recommendation that it be immediately removed. Our contractor may be interested in providing these services to Tate & Lyle.

Can you provide us an update on this subject? Thank you.
