FOOD ESTABLISHMENT INSPECTION REPORT

Establishment	Whit's End 3663 E William St. Decatur, IL 62521	Zone: <u>2</u>
		Risk: <u>1</u>
OBSERVATIONS AND CORRECTIVE ACTIONS		
Item Number	Violations cited in this report must be corrected within the time frames below.	
	Complaint #F-4211	
	Details of complaint: Customer ordered 3 chicken strip salads and had them delivered by door dash around 12:30pm on 7/6/21. In one of the containers, the customer observed a cockroach. Photographs were included.	
	Investigation of complaint: cockroach activity observed in the following areas	
	- dough press machine / spice rack (moderate activity) - production cooler (under) near grill (heavy activity) - gap between walls of kitchen and prep station (heavy activity) - base board near drive thru window (moderate activity) - salad prep station (floor/ceiling) (heavy activity)	
	Recommendations: Engage pest control company to effectively eradicate pests.	
	Final Disposition of complaint: Founded	
	Due to observations made during investigation, facility is closed. In addition to cockroach activity mentioned above, heavy house fly activity was observed. Fly strips (6) were observed covered with flies and live flies observed landing on food / food equipment. The concentration of vector activity constitutes an imminent health hazard.	
	This is the third closure in a 12 month period for this facility. Previous closures were November 2020 for multiple risk factors including roach activity, and March 2021 for water / plumbing issues. The Macon County Food Ordinance dictates that the permit for an establishment is revoked if there are <u>three</u> closures within a 12 month period. The operator can petition the board of health for reinstatement.
