Subject: RE: Pump House feedback

Joe

We were working through the options of selling or demolition. Currently there has not been much interest in the purchase of this structure. I have now entered it into the new capital expenditure list and am asking for funding for demolition. The current issue I have is working with the Core of engineers. They are wanting many additional items causing the cost of demolition to rise tremendously. Once the capital plan is set I will let you know if we are pursuing it this year or not.

Thanks

Jacob

Subject: Pump House feedback

Jacob,

I am needing any feedback that you have on the status of the potential demolition on the pump house.

Our organization is trying to organize our planning schedule with the dredge company for Basin #2 & #3, before 2016.

Subject: Pump House updates

Jacob,

Was just wondering, if you have information or updates you can share with the city on the potential demo of the old Staley pump house?
