Subject: [EXTERNAL] T & L Pump House

Hi Jacob. I talked to Keith yesterday about the pump house. Since our contractor will be dredging adjacent to it later this year, can you email us a copy of pertinent drawings T & L may have of the pump house foundation, etc.? Thanks!

Subject: RE: Pump House feedback

Hello Keith & Jacob. Per Joe's message below, our contractor is making great progress this year and will be dredging near the pump house soon. Can you give us an update on the possibility of the pump house being demolished? As you know, it is becoming a greater liability risk as it continues to deteriorate.

FYI, Ben Leonard left Great Lakes Dredge & Dock a few months ago. The new project manager is Jared LeFranc. Attached is his contact information.
