

Keith

Sorry for the delay in response. Keith Oliger (Decatur Plant Manager) and myself would like to meet with you to help get everyone up to speed. Since you guys have a larger group please propose a time that will work and I will check our schedules.

Thanks

Jacob Elder

Subject: [EXTERNAL] T & L Pump House

Hi Jacob,

Good to see that T&L is picking up the pace on this subject. Matt, Paul, Joe and I would like to meet with you (and whoever else you would like to invite) so that the City can more accurately assist T&L with the project. Please let me know who else to invite so Concetta Guyse can schedule the meeting at our Engineering Office on the 3rd floor of the Civic Center – thanks.

Joe

The contractor is requesting the depth soundings for the area around the Staley pump house if this is done. I am not very familiar with this but thought you would know.

Thanks for all the help.

Jacob

Jacob,

1. In 2013 the DTM was done and area in front of the North wall of the pumphouse varied. Around the NE corner of pumphouse was 599, also on the NW corner area it appears to be around 603 according to
