

New displaced left turn lanes will open to traffic on Feb. 2

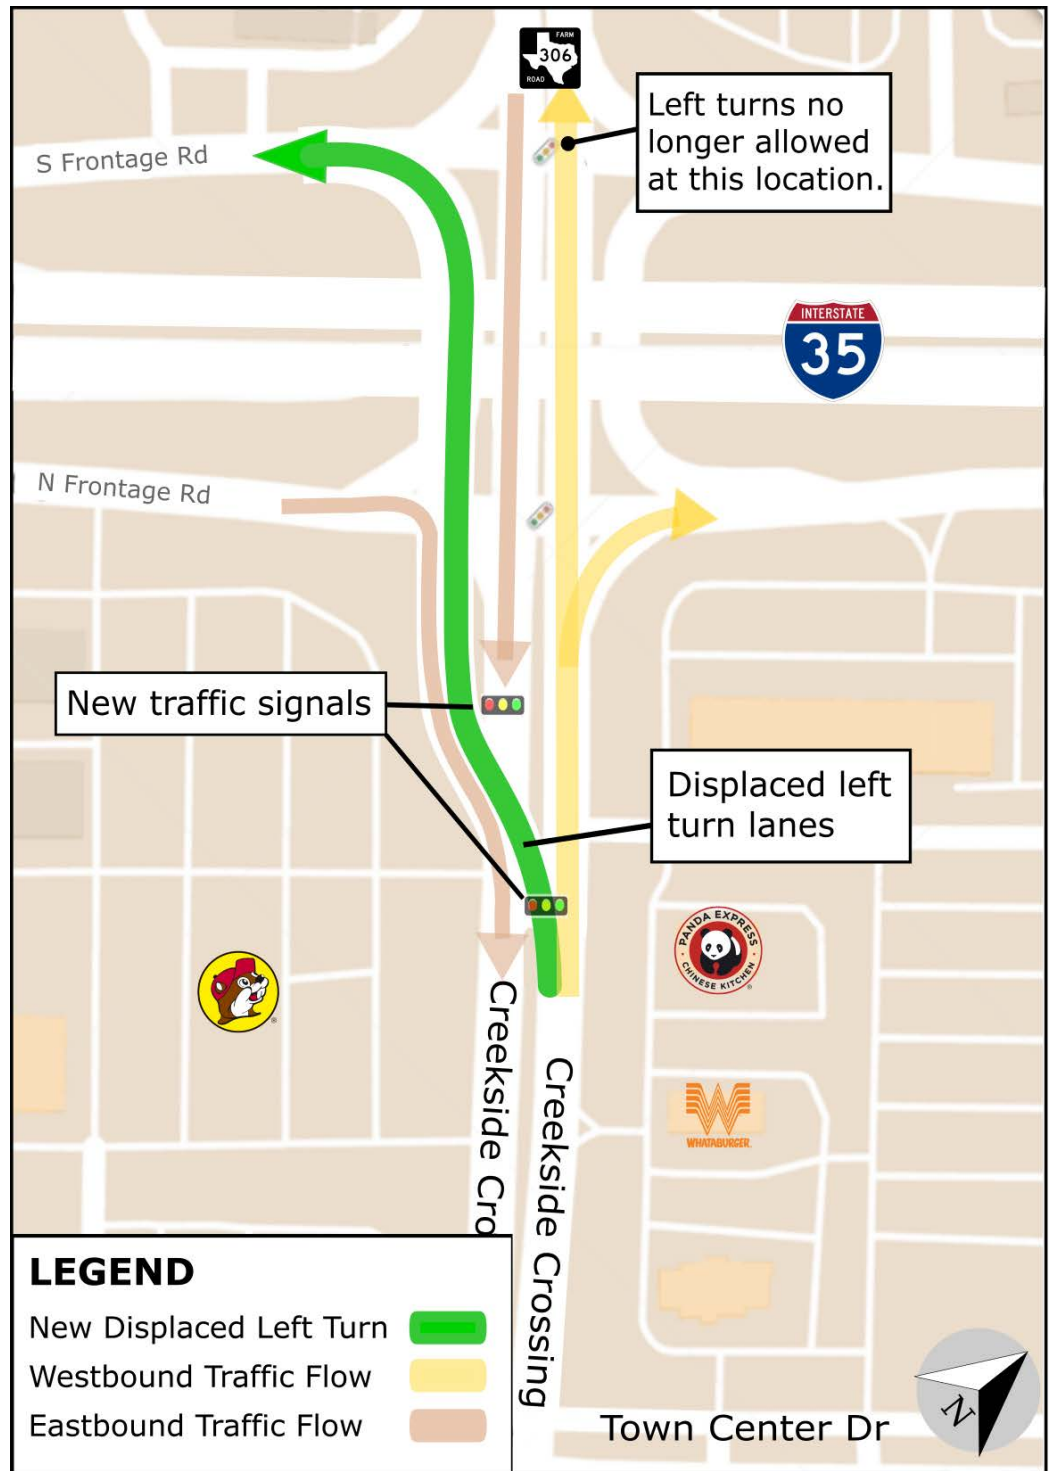

On Wednesday, Feb. 2, 2022, the new partial displaced left turn lanes on westbound FM 306 (Creekside Crossing) at I-35 will be operational for the traveling public.

Drivers who wish to turn left on I-35 southbound from FM 306 westbound will no longer go straight, under the I-35 overpass. They will be navigated to the new two displaced left lanes beginning near the Whataburger and Panda Express. As part of the displaced left turn lanes, drivers can expect new traffic lights in the area.

For safety, police officers will be present for a few days to assist drivers as they adjust to the new configuration.

The overall operational improvement project is expected to be completed the summer of 2022.
