

ALICE, INCOME AND EDUCATION

INCOME AND ASSISTANCE FOR HOUSEHOLDS BELOW ALICE THRESHOLD

The amount of assistance available to Indiana residents is not enough to fill the gap between earned income and the resources needed to pull all Hoosier families above the ALICE (Asset Limited, Income Constrained, Employed) group.

It would require about
\$7 billion

in additional wages or public resources to make that happen.

SHIFTS IN SOURCES OF INCOME

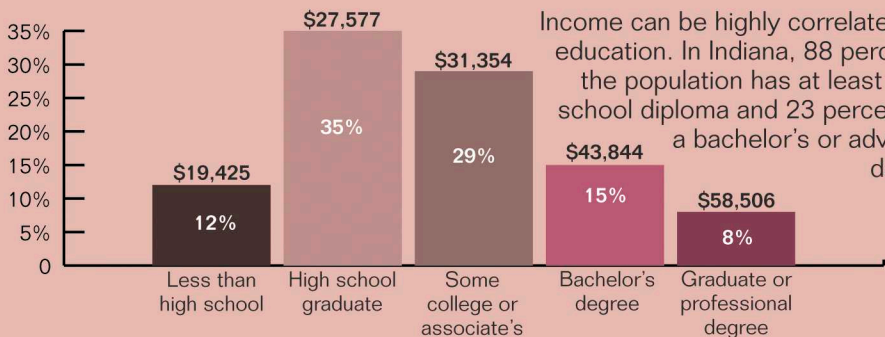

The sources of income for Indiana households shifted between 2007 to 2012. The number of households earning a wage or salary income decreased by 3 percent.

Percent change in household sources of income

* Temporary Assistance for Needy Families; General Assistance

EDUCATION ATTAINMENT AND MEDIAN ANNUAL EARNINGS

Income can be highly correlated with education. In Indiana, 88 percent of the population has at least a high school diploma and 23 percent has a bachelor's or advanced degree.

DEFINITIONS

Earned Income
Wages, dividends and Social Security

Nonprofits
Human services revenue not from the government or user fees

Cash Public Assistance
Supplemental Security Income and Temporary Assistance for Needy Families

Government programs
Head Start, SNAP, WIC, housing and human services, federal and state
