NEW & IMPROVED

## THIS WEEK'S SPOTLIGHT

## 100% Hand Car Wash

Quality and service to customers and their vehicles are important, but we must also be good citizens of the world. Highland Hand Car Wash is committed to being an environmentally-conscious company: we take all possible precautions to minimize our impact on the environment in terms of energy used, water used, and waste output.

All of the chemicals we use are biodegradable, so that they break down naturally rather than polluting the environment. Our car washes are designed to minimize water use through a reclaim process that treats and reuses water. We dispose of all water and biodegradable solutions used in the car wash process through the sewer system for purification at local water treatment plants. In order to minimize the amount of water used to clean each car today, we'll continue to research the latest in equipment and development, making necessary investments so that we can further use less, and reclaim more, of one of the earth's most valuable resources: water.

California law requires that contractors taking jobs that total \$500 or more (labor or materials) be licensed by the Contractors State Licensing Board. State law also requires that contractors include their license number on all advertising. You can check the status of your licensed contractor at [www.cslb.ca.gov](http://www.cslb.ca.gov) or 800-321-CSLB. Unlicensed contractors taking jobs that total less than \$500 must state in their advertisements that they are not licensed by the Contractors State License Board.
