The city has gone over the bill for errors but it is correct. The city has agreed to the amount. Beutler said went over the city's budget for the year, which is expected to be $7.8 million.

The road has been repaired and Wes Wadsworth, president of the Idaho Falls Chamber of Commerce, said, "We appreciate the work that has been done." He added that the repair work was completed on time and within budget.

Five student teachers from the University of Idaho serve as a cooperating teacher/mentor for 36 Utah State University teachers and 8 Idaho State University teachers. The program he has supported throughout his career in agriculture and in agricultural education from USU in 1974, followed by a teaching career at the College of Idaho. He has been researching the problem, and it is a better investment because the likelihood of severe flooding is high.

The information that Beutler passed along was warmly greeted by officials from both irrigation companies. The companies will check with Idaho Fish and Game to get further clarification regarding importing the fish.

During his tenure at West Side High, Summers was instrumental in the development of the agriculture program into a successful and powerful force. The agriculture program at West Side High School is recognized as one of the best in the state and has been featured in national publications.

The public is encouraged to come.

The event will take place at the Shoshone-Bannock Hotel Events Center, Fort Hall, Ida. The event will begin at 5:30 p.m. and is expected to last until 9:30 p.m.

The council is also an updated version of the plant's wastewater treatment plant design, as presented by both the Idaho Falls Department of Public Works and the Idaho Department of Environmental Quality (IDEM) and the Environmental Protection Agency (EPA). The city is working to determine, such as the potential for Quagga infestation, which is a non-native species of mussel that has been introduced into the waterways of Idaho.

The event will also feature speakers from both the Idaho Department of Water Resources and the Idaho Department of Environmental Quality. The speakers will discuss the importance of water conservation and the impact of Quagga mussels on the local water supply.

The city has been researching the problem, and the threshold of 5 days is too close to the time frame needed to calculate the impact. Hence the well drilling options Beutler has recommended to the council will be a better investment because the likelihood of severe flooding is high.
