Water report puts 2020 slightly above average

By NECIA P. SEAMONS, Citizen editor

As of March 1, the Bear River Basin had received near-normal precipitation, and water-year precipitation in the Bear Lake was 74% and 100% of normal. Despite dry conditions in the second half of Feb-

The water outlook is promising for agriculture as well as recreation around the Bear River Basin.

Water from snow-covered mountainous areas surrounding Preston.

Earthquake rocks Wasatch Front, tremors felt in Franklin County

By NECIA P. SEAMONS, Citizen editor

A 5.7 earthquake woke residents of Utah on March 18 and some in Franklin County.

The U.S. Geological Service reported that the temblor from Burley to Star Valley was centered four miles NNE of Manna, Utah, and mea-
sured 5.7 on the Richter scale.

Over a dozen aftershocks followed about 1.8 to 10 seconds throughout the day. They have ranged from 2.8 to 3.5 in strength. A second one was felt in Franklin County at 8:03 a.m., and a third around 1:30 p.m. before press time on March 21.

The survey is also intended to help the district determine the level of assistance families will need to help their children continue to learn online. Parents need to think about how to schedule work with the devices they have,” he said. The district is sending personal devices home based on need, and is talking to Direct Communications to set up some hotspots in town. What materials from schools may be downloaded. Classes requiring hands-on instruct-

KSL News reported that this is the biggest earthquake to hit the Wasatch Front since 1992. The last earthquake that caused extensive damage in Franklin County was in the 1940s.

Locally, people are reporting that they felt their bed shake, lights swinging and porches chiming.

Facebook posts noted people feeling the tremor from BURNS to Salt Lake and south to Utah Valley.

Lyle Porter of the Consolidated Irrigation Company (CIC) said the water companies always check dams at local reservoirs when an earthquake happens. Gundale, Foster, Johnson, Glendale, Foster, Johnson, Lamont and Kellogg reservoirs, managed by the CIC re-

ere the courthouse or other county offices if they fit the following criteria.

A. United States, Iran, South Korea, and European countries, or any other high risk countries identified by the CDC during the

B. Traveling domestically within the United States (where COVID-19 is widespread) within the previous 14 days.

C. Being in contact with someone who has been in any of those countries within the previous 14 days.

The water outlook is promising for agriculture as well as recreation around the Bear River Basin.

Water from snow-covered mountainous areas surrounding Preston.
