

CITY OF ROBBINSDALE

The City is proposing major reconstruction of its drinking water production and storage facilities. These changes will allow us to continue to serve the City's need for safe and clean drinking water for the next 50 to 100 years.

Before we start on detailed design for the new facilities, City Council has scheduled an opportunity for residents and business operators to review and gain an understanding of the plans being proposed and provide feedback / comments.

An informal Open House is scheduled to be held on Monday February 11th between 3:00pm and 7:00pm at City Hall, 4100 Lakeview Avenue. City staff will be available during this time to answer questions and provide more information about the proposed works.

All residents and other community members are welcome.
