

CITY OF ZIMMERMAN LAKE FREMONT AERATOR WARNING

The Lake Fremont Improvement Association may place and operate aerators in Lake Fremont this winter season. Aeration will create open water and thin ice conditions in the area west of the big island and along the western shore. Weather conditions may cause the open water and thin ice to fluctuate greatly. Stay clear of the signed areas when traveling on Lake Fremont. Additional County and/or local restrictions, such as night use of motorized vehicles, may apply on aerated lakes and/or inside the posted are or Thin Ice Zone. Use extreme caution traveling anywhere on the lake.

Questions regarding the aeration system can be referred to the Fremont Lake Association representative Tony Brisbin at 763-238-8197 or Zimmerman City Hall at 763-856-4666, x. 24.
