

PUBLIC NOTICE

The Minnesota Department of Transportation (MnDOT) has released an Environmental Assessment/ Environmental Assessment Worksheet (EA/EAW) for public review and comment for the I-94 Resurfacing and Brockton Interchange Project. This project will resurface 9.6 miles of the existing pavement on I-94 from the I-494/I-694 interchange in Maple Grove to Highway 101 in Rogers, Minnesota. The project includes the construction of an interchange to the east of Brockton Lane in the City of Dayton. Finally, the project will involve the addition of a new lane in both the westbound and eastbound directions of I-94 from Highway 610 to Highway 101; pavement improvements and expansion of the Elm Creek Rest Area; modifying trails/sidewalks within MnDOT property to make them more accessible; replacing deficient stormwater management systems; and constructing a commercial vehicle enforcement lane in the westbound direction between Hennepin County Road 81 and Highway 101 in Rogers.

The EA/EAW, which outlines the purpose of the project and assesses the anticipated social, economic, and environmental impacts of the project, is available to review electronically at <http://www.dot.state.mn.us/i94-mg-clearwater/index.html> and during business hours at the following locations:
